Contents

Preface	xi
Acknowledgments	xiii
Trademarks	xv

Part 1 AIX Overview

Chapter 1. Introduction to the RS/6000

- 1.1 Hardware
- 1.2 Software

Chapter 2. Introduction to AIX/6000 19

- 2.1 The Kernel 19
- 2.2 Files 19
- 2.3 Processes 24
- 2.4 Shells 25
- 2.5 Input and Output 26
- 2.6 Logging In, Logging Out, and User Profiles 28
- 2.7 Commands 30

Chapter 3. AIX/6000 Architecture 37

- 3.1 Overview 37
- 3.2 Kernel Overview 39
- 3.3 Memory Management 42
- 3.4 Process Management 49
- 3.5 Interprocess Communication 52
- 3.6 Logical and Physical Volumes 53
- 3.7 File Systems 56
- 3.8 Input and Output 64
- 3.9 Networking 67

Part 2 Basic Operating System Usage

Chapter 4. Starting and Stopping the System	73
4.1 Booting	73
4.2 Normal System Initialization	74
4.3 Starting Processes Automatically During Initialization	75
4.4 Shutting Down the System	79
4.5 Standalone System Initialization	80
4.6 Performing a Standalone Boot	80
4.7 Additional Restart and Stop Commands	81
Chapter 5. Files and Directories	83
5.1 File-Naming Conventions	83
5.2 Creating Files	83
5.3 Displaying Files	94
5.4 Removing Files	101
5.5 Linking Files	102
5.6 File Ownership and Access	105
5.7 File Information	111
5.8 Compacting Files	116
5.9 File Comparisons	120
5.10 Manipulating the Contents of Files	125
5.11 Joining, Merging, and Translating Files	127
5.12 Sorting Data	135
5.13 Directories	137
Chapter 6. File Systems, Logical Volumes, and Physical Volumes	151
6.1 Physical Volumes	151
6.2 Volume Groups	156
6.3 Logical Volumes	166
6.4 File Systems	177
6.5 Backup and Restore	189
6.6 Backing Up the System	203
6.7 Diskettes	204
Chapter 7. Processes and Subsystems	209
7.1 Starting Processes	210
7.2 Stopping a Process	212
7.3 Suspending and Restarting Processes	214
7.4 Scheduling Processes	215
7.5 Process Status	222
7.6 Miscellaneous Process Control Commands	228
7.7 Subsystem Control	230
Chapter 8. Printing	235
8.1 Printing Files	236
8.2 Controlling Print Facilities	239
8.3 Print Queue Administrator Functions	247

Chapter 9. Users, Groups, and Security Considerations	259
9.1 Users	259
9.2 User Passwords	267
9.3 Groups	269
9.4 Remote Hosts	272
9.5 System Integrity	275
9.6 Access Control Lists	283
9.7 The Disk Quota System	285
9.8 Auditing	290
Chapter 10. Hardware Management	303
10.1 General Device Configuration	304
10.2 Magnetic Tapes	311
10.3 Terminal Control	315
10.4 Miscellaneous Configuration Commands	330
10.5 Status Information	334
10.6 Login Processing Enablement	335
10.7 Paging Space Definition	337
10.8 Program Product Information	340
Chapter 11. Networking and Communications	347
11.1 TCP/IP Basics	348
11.2 TCP/IP Advanced Configuration and Control	354
11.3 TCP/IP Tuning and Diagnosis Commands	364
11.4 TCP/IP Applications	373
11.5 BNU (uucp)	391
11.6 Mail	391
11.7 NFS	397
11.8 NIS	400
11.9 SNA Services	403
11.10 HCON (3270/Host Connection)	411
Part 3 User Interface Topics	
Chapter 12. vi	419
12.1 An Introduction to vi	419
12.2 Movement within a File	421
12.3 Editing Text	423
12.4 Operations on Files	426
12.5 Exiting to the Shell	428
12.6 Customizing the vi Environment	428
12.7 Exiting from vi	431
Chapter 13. The Korn Shell	433
13.1 Input and Output Redirection	434
13.2 Types of Processing	436
13.3 Metacharacter Substitution	438
13.4 Variables	441

Contents

13.5	Aliases	448
13.6	Positional Parameters	449
13.7	Functions	449
13.8	Constructing Shell Scripts	450
Chapter 14. Miscellaneous Commands		455
14.1	Terminal Commands	455
14.2	Informational Commands	457
Appendix A. Basic Problem-Solving Tools		459
Appendix B. Error Log Identifiers		463
Appendix C. LED Indicators		473
Glossary	483	
Abbreviations	489	
Bibliography	493	
Index	495
