<b>Acknowledgments</b>	<b>xxi</b>
<b>Introduction</b>	<b>xxiii</b>
<b>Chapter 1: RHEL 3 Basics</b>	<b>1</b>
<b>Desktop Overview</b>	<b>2</b>
GNOME	2
XFree86	4
Exporting a Display	5
<b>Command-Line Overview</b>	<b>6</b>
Virtual Terminals	6
gnome-terminal	7
Bash Shell Basics	7
<b>Hardware Configuration</b>	<b>10</b>
Using Kudzu	10
Listing Detected Hardware	10
Adding Modules	11
Configuring Network Cards	13
Configuring Video	13
<b>GUI Applications</b>	<b>14</b>
Text Editors	14
Browsing the Internet	14
Using Nautilus	15
Using the GNOME Help Browser	17
<b>System Administration Tools</b>	<b>18</b>
Viewing the System Log with the GUI	18
Viewing System Logs at the Command Line	20
Viewing System Performance with the GUI	22
Viewing System Performance at the Command Line	23
<b>Managing Users</b>	<b>24</b>
Building Default Profiles	25
Adding a User with the GUI	26
Adding a User with useradd	28
Modifying Users with the GUI	29
Modifying Users with usermod	32
Deleting a User with the GUI	33
Deleting a User with userdel	33

<b>Managing Files and Directories</b>	<b>34</b>
<b>Examining Processes</b>	<b>38</b>
Using the GUI	38
Using ps	39
Using top	40
<b>Summary</b>	<b>40</b>
<b>Chapter 2: Using Red Hat Network</b>	<b>41</b>
<hr/>	
<b>What Is RHN?</b>	<b>41</b>
RHN Concepts and Benefits	41
<b>RHN Modules</b>	<b>43</b>
Update Module	43
Management Module	43
Provisioning Module	44
Receiving RHN Functionality	45
Overview of Red Hat Support	45
<b>RHN Architecture</b>	<b>46</b>
Different Architecture Models Provided by RHN	47
<b>RHN Security Overview</b>	<b>50</b>
Hosted Architecture Model Security Features	50
Proxy Architecture Security Features	52
Satellite Architecture Security Features	52
<b>Activating Entitlement for the RHN</b>	<b>53</b>
Prerequisites for RHN	53
Red Hat Update Agent	54
Registering Your System with RHN	59
Registering Your System Profile with RHN	61
<b>Updating the System</b>	<b>65</b>
Updating the System Manually	65
<b>RHN Alert Notification Tool</b>	<b>80</b>
RHN Alert Notification Tool Configuration	81
<b>Overview of the Red Hat Network Service Daemon</b>	<b>85</b>
<b>The RHN Web-Based Management Interface</b>	<b>87</b>
Creating a New Account on the RHN Web Site	87
Browsing the RHN Web Site	88
Activating System Entitlements with RHN	90
<b>Advanced RHN</b>	<b>93</b>
Allocating System Entitlements to Systems	93
Checking System Details	93
Systems Groups	94
Using Management Entitlement Functionality to Manage a Group of Systems	94

Schedule System Updates	94
Creating Multiple Users and Allocating Access	95
<b>Managing Systems Using Provisioning</b>	<b>97</b>
Kickstart	98
Tag Systems	98
Roll Back System to Last Snapshot	98
Remote Command	99
<b>Downloading Red Hat Enterprise Distributions</b>	<b>99</b>
<b>Miscellaneous Tasks</b>	<b>99</b>
Update Hardware/Package Profile	99
Reboot Systems	100
Lock/Unlock Systems	100
Delete System Profile	101
<b>Summary</b>	<b>102</b>
<hr/>	
<b>Chapter 3: The File System</b>	<b>1Q3</b>
<b>Understanding the Filesystem Hierarchy Standard</b>	<b>103</b>
<b>Understanding File System Permissions</b>	<b>105</b>
<b>Managing Files and Directories</b>	<b>106</b>
Dealing with Ownership and Access	107
Changing Ownership of Files/Directories Using chown	108
Changing the Group of Files/Directories Using chgrp	108
Special Notes on Directory Permissions	114
Managing Permissions for Links	114
Setting System Defaults	115
Reorganizing Files and Directories	116
Renaming a Specific File Type in the Current Location	116
<b>Managing Disks and Partitions</b>	<b>117</b>
Adding New Disks	118
Taking Advantage of the ext3 File System	123
Mounting File Systems as Read-Only	123
Migrating from Old to New Disks	124
<b>Working with the proc File System</b>	<b>124</b>
<b>Enabling an Access Control List</b>	<b>127</b>
Preparing a Partition for ACL	128
Using ACL to Control Access to Files and Directories	128
<b>Troubleshooting the File System</b>	<b>129</b>
Resolving Disk Space Issues	129
Resolving File Access Issues	130
<b>Summary</b>	<b>131</b>

# Contents

---

<b>Chapter 4: Storage Management</b>	<b>133</b>
<b>What Is Storage Management?</b>	<b>133</b>
<b>Raid and Volume Management</b>	<b>134</b>
Creating Space	134
RAID	135
Implementing a RAID in RHEL 3	139
Taking a Step beyond RAID—Volume Management	162
<b>Summary</b>	<b>172</b>
<b>Chapter 5: High Availability: Ensuring You're Always Up</b>	<b>123</b>
<b>Cluster Overview</b>	<b>174</b>
<b>Clustering Hardware</b>	<b>176</b>
Hardware Selection	176
Hardware Configuration	180
<b>Cluster Software Configuration</b>	<b>180</b>
External Storage Devices	185
Raw Devices	186
Setting Up Partitions	187
<b>Installing and Configuring the Cluster Software</b>	<b>190</b>
Installing the Packages	190
Configuring the Cluster	192
Configuring Cluster Daemons	194
Adding Cluster Members	197
<b>Setting Up a Service with Failover Clustering</b>	<b>204</b>
Adding a Service	205
Testing the Cluster Configuration	206
Troubleshooting the Cluster Configuration	207
<b>Installing the Apache Web Server as a Service</b>	<b>208</b>
Configuring the Shared Storage	208
Installing the Apache Server	208
Adding the Service to the Cluster	209
<b>Cluster Administration</b>	<b>210</b>
Command-Line Administrative Tools	210
GUI Administrative Tools	210
Starting a Member	211
Stopping a Member	212
Backing Up the Cluster Configuration	212
<b>Summary</b>	<b>212</b>

---

<b>Chapter 6: Red Hat Enterprise Applications</b>	<b>215</b>
<b>Installing Red Hat WAF</b>	<b>216</b>
Installing the Web Server	216
Installing the JRE	216
Installing PostgreSQL	218
Installing Tomcat	221
Installing Additional Packages	224
Installing WAF Packages	224
Modifying the Database	224
<b>Configuring WAF</b>	<b>225</b>
Starting WAF	228
<b>Installing Portal Server</b>	<b>229</b>
Configuring and Starting Portal Server	229
<b>Installing Content Management System (CMS)</b>	<b>230</b>
Configuring and Starting CMS	230
<b>Summary</b>	<b>230</b>
<b>Chapter 7: System Administration</b>	<b>233</b>
<b>Becoming the Superuser</b>	<b>233</b>
<b>Assigning Privileges to Ordinary Users</b>	<b>236</b>
<b>Managing Users with Command-Line Tools</b>	<b>238</b>
Creating a New User Account	238
Creating a New Group	240
Modifying an Existing User Account	240
Modifying an Existing Group	242
Deleting or Disabling a User Account	243
Creating Default User Settings	243
<b>Using Disk Quotas for Users</b>	<b>245</b>
Installing Disk Quota Software	246
Configuring Your System to Support Disk Quotas	246
Assigning Disk Quotas to Users	247
Monitoring Disk Usage	248
<b>Process Management</b>	<b>249</b>
How Processes Get Started	249
Controlling and Monitoring Processes	250
Monitoring Processes and System Load	259
Logging Processes	261
Scheduling Processes	263
<b>Backups</b>	<b>266</b>
Using rsync to Back Up Files and Directories	266

# Contents

---

Automating rsync Backups via SSH	267
Hiding the Source Directory from the rsync Backup Server	269
Managing Backups Online via the Web	270
<b>Summary</b>	<b>274</b>
<b>Chapter 8: Building Web Server Services</b>	<b>225</b>
<b>Apache 2</b>	<b>275</b>
Overview of Apache 2 Modules	278
Installing Apache 2 on RHEL 3	280
Configuring the Apache 2.0 Web Server	288
Configuring Apache 2.0 for the Enterprise/Production Web Server	301
Using the Red Hat HTTP Configuration Tool	306
Adding DSO (Dynamic Shared Objects) Modules	309
Configuring a Secure Web Server Using SSL	310
Apache Security Tips	318
<b>Red Hat Content Accelerator</b>	<b>321</b>
Installation of Red Hat Content Accelerator	322
Overview of the Red Hat Content Accelerator Directory Structure	322
Starting and Stopping Red Hat Content Accelerator	323
Setting Up Your First Web Site Using Red Hat Content Accelerator as an HTTP Server	325
Using Red Hat Content Accelerator as a Web Server	328
Using Red Hat Content Accelerator as an Anonymous FTP Server	329
<b>Summary</b>	<b>330</b>
<b>Chapter 9: Building Remote Access Services</b>	<b>331</b>
Overview of the FTP protocol	332
Overview of a vsftpd Server	334
Installing the vsftpd Server	335
Starting/Stopping Your FTP Server	337
Testing Your FTP Server	338
Configuring the vsftpd Server	339
<b>Working with an SSH Server</b>	<b>352</b>
Overview of the SSH Protocol	352
Overview of OpenSSH	353
Use of OpenSSH	353
Configuring the OpenSSH Server	354
The OpenSSH Client Configuration File (ssh_config)	358
Starting/Stopping OpenSSH Daemons	359

Using ssh, scp, sftp Clients	361
Public-Key Authentication	366
X11 Forwarding	369
Port Forwarding	370
Additional Resources	371
<b>Summary</b>	<b>372</b>

---

**Chapter 10: Building Print Services** **323**

<b>Installing Print Services</b>	<b>373</b>
Print Servers on Red Hat Enterprise Linux 3	374
Print Server Functions	375
<b>Managing Printers</b>	<b>375</b>
Installing a Printer	376
Configuring Printers	381
Configuring a Default Printer	382
Deleting an Existing Printer	382
Editing Printer Settings	382
Sharing a Printer	383
<b>Maintaining Print Services</b>	<b>386</b>
Backup and Recovery of Printing Configuration	386
Starting (and Stopping) the Printer Daemon	386
Managing Print Jobs	387
Printing from Applications	388
Creating Print Jobs at the Command Line	388
<b>Additional Resources</b>	<b>390</b>
CUPS Web Interface	390
Administration	391
Web Resources	398
<b>Summary</b>	<b>398</b>

---

**Chapter 11: Building File Sharing Services** **401**

<b>Setting Up a File Server</b>	<b>401</b>
An Overview of Samba	402
Samba Configuration Using Graphical User Interface	410
Samba Configuration with SWAT	413
Samba Troubleshooting	424
<b>Building NFS Server</b>	<b>425</b>
NFS Overview	425
Features and Benefits of NFS	425

## Contents

---

NFSv2 and NFSv3	425
How NFS Works on RHEL 3	426
NFS Configuration	427
NFS Server Administration	434
Setting Up an NFS Client	437
NFS Security	444
NFS Troubleshooting	445
<b>Summary</b>	<b>447</b>
<b>Chapter 12: Building Enterprise Email Services</b>	<b>449</b>
<b>RHEL 3 Mail Services</b>	<b>449</b>
Sendmail	449
qmail	450
Postfix	450
<b>Setting Up DNS for Your Mail Server</b>	<b>450</b>
Creating an Address and Mail Exchange (MX) Record	451
Creating a Reverse DNS (PTR) Record	451
Testing Your DNS Setup with dig	452
<b>Installing and Configuring Postfix</b>	<b>455</b>
Installing Postfix Using RPM	455
Enabling Postfix for the Internet	456
<b>Setting Up Mailboxes and POP/IMAP Services</b>	<b>457</b>
Creating User Accounts	457
Configuring POP3/IMAP	458
<b>Sending Mail from Anywhere!</b>	<b>459</b>
Setting Up POP-before-SMTP	460
<b>Fighting Spam Using SpamAssassin</b>	<b>461</b>
Installing SpamAssassin	462
Preparing SpamAssassin for Postfix	464
<b>Setting Up Postfix for Virtual Domains</b>	<b>467</b>
<b>Managing Postfix via Webmin</b>	<b>468</b>
<b>Setting Up a Web Mail Client</b>	<b>471</b>
Meeting Squirrel Mail Requirements	471
Installing and Configuring Squirrel Mail	471
Running SquirrelMail	474
<b>Summary</b>	<b>478</b>
<b>Chapter 13: Building DNS &amp; LDAP Services</b>	<b>479</b>
<b>How Does DNS Work?</b>	<b>479</b>
<b>Configuring a DNS Client (Resolver)</b>	<b>481</b>

---

<b>Setting Up a DNS Server</b>	<b>483</b>
Understanding the Basics of DNS configuration	484
Master/Primary DNS Server	491
Slave/Secondary DNS Server	492
Reverse DNS Server	492
Cache-Only/Slave DNS Server	494
Controlling the DNS Server	494
<b>Testing Your DNS Server</b>	<b>495</b>
<b>Performance Testing Your DNS Server</b>	<b>496</b>
<b>Balancing the Load Using the DNS Server</b>	<b>498</b>
<b>Understanding DNS Spoofing</b>	<b>499</b>
<b>Checking the DNS Configuration Using Dlint</b>	<b>499</b>
Getting Dlint	500
Installing Dlint	500
Running Dlint	500
<b>Securing BIND</b>	<b>503</b>
Using Transaction Signatures (TSIG) for Zone Transfers	503
Running BIND as a Nonroot user	506
Hiding the BIND Version Number	506
Limiting Queries	506
Turning Off Glue Fetching	508
Configuring a chroot Jail for the DNS Server	508
Using DNSSEC (Signed Zones)	508
<b>Setting Up an LDAP Server</b>	<b>509</b>
Installing OpenLDAP	509
Configuring OpenLDAP	510
<b>Summary</b>	<b>512</b>
<b>Chapter 14: Advanced System Administration</b>	<b>513</b>
<hr/>	
<b>Monitoring System Logs and Activities</b>	<b>513</b>
Using swatch to Monitor Log Files	513
<b>Monitoring Network Activities</b>	<b>517</b>
Monitoring Network Connections Using netstat	517
Monitoring Network Clusters Using Nagios	518
<b>Tuning the Kernel for Performance</b>	<b>531</b>
Increasing the System-Wide File Descriptor Count	534
Tuning Shared Memory for Large Applications	535
Rebooting after Kernel Panics	535
Tuning TCP/IP Performance Parameters in the Kernel	536
Regenerating initrd	538
<b>Summary</b>	<b>539</b>

# Contents

---

<b>Chapter 15: RHEL 3 Security</b>	<b>541</b>
<b>Security Basics</b>	<b>542</b>
File Permissions	542
Managing File Permissions	543
Setting a umask	546
Working with sudo	546
Potential Security Risks with sudoers	548
Using last and who	549
<b>System Hardening Using Bastille Linux</b>	<b>550</b>
Installing Bastille Linux	550
Configuring Bastille Linux	551
Using Red Hat Security Level Configuration	555
<b>Managing Firewalls with IPTables</b>	<b>557</b>
Configuring IPTables	559
Saving and Restoring IPTables	565
Starting and Stopping IPTables	567
<b>System Integrity Using Tripwire</b>	<b>568</b>
Installing Tripwire	568
Configuring Tripwire	569
Generating the Tripwire Database	570
Checking Tripwire Integrity	571
Tripwire Resources	574
<b>Analyzing Network Traffic with tcpdump</b>	<b>574</b>
<b>Port Scanning with nmap</b>	<b>576</b>
<b>Encryption with GnuPG</b>	<b>577</b>
Installing GnuPG	578
Generating Keys	578
Exchanging Keys	580
Using Keys as Signatures	581
<b>Virtual Private Networks</b>	<b>584</b>
Using IPSec	585
Using CIPE	588
<b>Summary</b>	<b>592</b>
<b>Chapter 16: Managing Your System with Perl and Shell Scripting</b>	<b>595</b>
<b>Perl Scripting</b>	<b>595</b>
<b>Understanding Perl Basics</b>	<b>595</b>
What Is Perl?	596
What Is CPAN?	596
<b>Useful Perl Scripts</b>	<b>598</b>

Automatically Updating CPAN Modules	598
Automatically Reminding Users of Their To-Do List	599
Autoresponder Script	604
<b>Shell Scripting</b>	<b>614</b>
Managing Apache Virtual Domains	615
<b>Useful Shell Scripts for Managing Web Sites</b>	<b>622</b>
Locking Out Bare Web directories	622
Renaming .htm to .html	623
Modifying *.html files	625
Password Protecting Web Directories	625
<b>Summary</b>	<b>631</b>
<b>Chapter 17: Where to Now?</b>	<b>633</b>
<b>Linux Resources</b>	<b>633</b>
Internet Resources for Linux	634
Internet Resources for Open Source Software	635
Linux Documentation Resources	635
<b>Security Resources</b>	<b>635</b>
Security News Resources	635
Security Vulnerability and Patch Alerts Sites	636
Open Source Security Software Resources	637
<b>Red Hat Commercial Support</b>	<b>637</b>
Support Options Available from Red Hat	637
<b>Red Hat Fedora Project</b>	<b>638</b>
<b>Open Source Application Development</b>	<b>638</b>
PHP	638
Python	640
Mysql	641
PostgreSQL	643
<b>System Administration Applications</b>	<b>644</b>
Webmin	644
<b>SELinux</b>	<b>646</b>
What Is SELinux?	646
Features and Benefits of SELinux	647
<b>Summary</b>	<b>647</b>
<b>Appendix A: Installing RHEL 3</b>	<b>649</b>
<b>Appendix B: Installing Software</b>	<b>665</b>
<b>Index</b>	<b>685</b>
