Contents

Preface	.	1
1.	COGNITIVE AND SOCIAL PSYCHOLOGY IN COLLABORATION	7
1.	INTRODUCTION	7
2.	COGNITIVE MODELS	8
	2.1 Software Methods and Cognitive Models	8
	2.2 Models of Group Cognition	9
	2.3 Models of Individual Cognition	13
3.	COGNITIVE EFFECTS AND BIASES	15
4.	SOCIAL PSYCHOLOGY FACTORS	19
	4.1 Norms, Roles and Protocols	19
	4.2 Social Psychology: Processes and Effects	21
5.	SOCIALLY AWARE SYSTEMS	24
2.	MEDIA FACTORS IN COLLABORATION	27
1.	INTRODUCTION	27
2.	ENVIRONMENTAL FACTORS AFFECTING COLLABORATION	28
3.	VISUAL AND AUDITORY CUES IN FACE-TO- FACE COLLABORATION	32
4.	VIDEO VERSUS AUDIO-ONLY	35
5.	PROXEMIC EFFECTS	40
6.	DIALOG STRUCTURE	41

COMPUTER-SUPPORTED COLLABORATION

7.	SOCIAL CONTEXT CUES	43
8.	MANAGERIAL BEHAVIOR AND INFORMATION RICHNESS	46
9.	EFFECTS OF I/O RATES AND ASYNCHRONY	50
10.	PHYSICAL ARTIFACTS	51
3.	GROUP PROBLEM-SOLVING: TASKS, PRODUCTIVITY, EARLY EXPERIMENTS	55
1.	INTRODUCTION	55
2.	GROUP PRODUCTIVITY AND TYPES OF TASKS	56
3.	GROUP PROBLEM SOLVING ON DISJUNCTIVE TASKS	61
4.	CHARACTERISTICS OF GROUPS	64
4.	COMPUTER-SUPPORTED PROCESSES AND PRODUCTIVITY	67
1.	INTRODUCTION	67
2.	PROCESS GAINS AND LOSSES	67
2.1	Production Blocking	67
2.2	Anonymity and Free-Riding	71
3.	STRUCTURING INTERACTIONS	74
3.1	Cognitive Engineering	74
3.2	Structuring Methods	76
3.2.1	Process and Task Structures	76
3.2.2	Process Support Tools	76
5.	COMMUNICATION AND INFORMATION IN ORGANIZATIONS AND GROUPS	81
1.	INTRODUCTION	82
2.	EFFECTS OF ORGANIZATIONAL EMBEDDING	82
2.1	The Effect of Organizational Context	82
2.2	Communication and Coordination in Software Teams and Organizations	84
3.	INFORMATION SHARING	87

3.1	Exchange and Use of Information	87
3.2	Opinion Formation in Groups	91
3.3	Opinion Formation in Computer-mediated Groups	92
3.4	Information Push and Pull in Computer-mediated Environments	94
3.5	Information Needs in Collaborative Software Development	96 •

i i

6. **GROUPWARE** 99

1.	INTRODUCTION	'-'•&'
2.	GROUPWARE APPLICATIONS AND EFFECTS	99
3.	IMPEDIMENTS TO DEVELOPING AND USING GROUPWARE	101
4.	DESIGN PRESUPPOSITIONS IN GROUPWARE	106
5.	VIRTUAL WORKSPACES	108
6.	SHARED I/O AND DEVELOPMENT TOOLKITS	109

7. **A BRIEF SURVEY OF EXPERIMENTAL RESULTS ON COMPUTER-SUPPORTED COLLABORATION AND SOFTWARE DEVELOPMENT** 111

1.	INTRODUCTION	111
2.	STANDARDIZED FRAMEWORKS	112
	2.1 Basic Frameworks	112
	2.2 Cognitive Models and Frameworks (C3P)	114
3.	META-ANALYSES	116
	3.1 Survey of Laboratory, Field and Case Studies	116
	3.1.1 Laboratory Studies and Controlled Experiments	116
	3.1.2 Field and Case Studies	121
	3.2 Differences between Laboratory and Field Studies	122

3.3 Task, Information, and Compositional

x	<i>COMPUTER-SUPPORTED COLLABORATION</i>		
**•		Effects	127
		3.4 Experimental Design Recommendations and Critique	130
IV	4.	COMPUTER-SUPPORTED BRAINSTORMING STUDIES	132
>0		4.1 Brainstorming Studies	132
,		4.2 Brainstorming Techniques	135
H?		4.3 Experimental Critique	136
OG	5.	SOFTWARE DEVELOPMENT TASKS	138
'		5.1 Collaborative Design Activities	138
^		5.2 Communication Patterns in Development	141
-'		5.3 Collaboration in Technical Reviews	143
8.	COLLABORATIVE-COGNITIVE MODEL FOR INTRODUCTORY SOFTWARE DEVELOPMENT		149
	1.	INTRODUCTION	149
	2.	PROBLEM SOLVING	150
		2.1 Problem Solving Methods and Concepts	150
		2.2 A Standard Model for Problem Solving	152
	3.	SOFTWARE DEVELOPMENT	154
		3.1 Language Acquisition	155
		3.2 Program Composition	156
, J	J	3.3 Comprehension, Reuse, and Integration	156
•	of	Existing Programs	156
		3.4 Debugging	157
		3.5 Testing	157
		3.6 Modification and Maintenance	157
		3.7 Documentation	158
	4.	COMPOSITE COGNITIVE MODEL FOR PROBLEM SOLVING BASED INTRODUCTORY SOFTWARE DEVELOPMENT	158
		4.1 Explicit Cognitive Model For Problem Solving	159
		4.1.1 Bloom's Cognitive Processes	160
		4.1.2 Steinberg's Cognitive Structure	161
		4.1.3 Gagne's Cognitive Results	162
		Individual Level Cognitive Model	163

4.2.1	Problem Formulation	163
4.2.1.1	Preliminary Problem Description	164
4.2.1.2	Preliminary Mental Model	164
4.2.1.3	Structured Representation of Problem	165
4.2.1.4	Relation to Cognitive Model	165
4.2.2	Planning the Solution	166
4.2.2.1	Strategy Discovery	167
4.2.2.2	Goal Decomposition	167
4.2.2.3	Data Modeling	167
4.2.2.4	Relation to Cognitive Model	168
4.2.3	Designing the Solution	169
4.2.3.1	Organization and Refinement	170
4.2.3.2	Function/Data Specification	170
4.2.3.3	Logic Specification	171
4.2.3.4	Relation to Cognitive Model	171
4.2.4	Translation	172
4.2.4.1	Implementation	172
4.2.4.2	Integration	172
4.2.4.3	Diagnosis	172
4.2.4.4	Relation to Cognitive Model	173
4.2.5	Testing	174
4.2.5.1	Critical Analysis	174
4.2.5.2	Revision	174
4.2.5.3	Evaluation	175
4.2.5.4	Relation to Cognitive Model	175
4.2.6	Delivery	176
4.2.6.1	Documentation, Presentation and Distribution	176
4.2.6.2	Relation to Cognitive Model	177
5.	COLLABORATIVE FACTORS IN SOFTWARE DEVELOPMENT	178
5.1	Global Collaborative Factors	179
5.2	Local Collaborative Factors	180
5.2.1	Problem Formulation	180
5.2.2	Planning	183
5.2.3	Solution Design	184
5.2.4	Translation	184
5.2.5	Testing	185
