

# A Non-Random Walk Down Wall Street

Andrew W. Lo

A. Craig MacKinlay

Princeton University Press  
Princeton, New Jersey

# Contents

<b>List of Figures</b>	<b>XIII</b>
<b>list of Tables</b>	<b>XV</b>
<b>Preface</b>	<b>xxi</b>
<b>Introduction</b>	<b>3</b>
1.1 The Random Walk and Efficient Markets. . . . .	4
1.2 The Current State of Efficient Markets. . . . .	6
1.3 Practical Implications. . . . .	8
<b>Parti</b>	<b>13</b>
<b>Stock Market Prices Do Not Follow Random Walks: Evidence from a Simple Specification Test</b>	<b>17</b>
2.1 The Specification Test. . . . .	19
2.1.1 Homoskedastic Increments. . . . .	20
2.1.2 Heteroskedastic Increments. . . . .	24
2.2 The Random Walk Hypothesis for Weekly Returns. . . . .	26
2.2.1 Results for Market Indexes. . . . .	27
2.2.2 Results for Size-Based Portfolios. . . . .	30
2.2.3 Results for Individual Securities. . . . .	32
2.3 Spurious Autocorrelation Induced by Nontrading. . . . .	34
2.4 The Mean-Reverting Alternative to the Random Walk . . . . .	38
2.5 Conclusion. . . . .	39
Appendix A2: Proof of Theorems	41

<b>3</b>	<b>The Size and Power of the Variance Ratio Test in Finite Samples: A Monte Carlo Investigation</b>	<b>47</b>
3.1	Introduction	47
3.2	The Variance Ratio Test	49
	3.2.1 The IID Gaussian Null Hypothesis	49
	3.2.2 The Heteroskedastic Null Hypothesis	52
	3.2.3 Variance Ratios and Autocorrelations	54
3.3	Properties of the Test Statistic under the Null Hypotheses	55
	3.3.1 The Gaussian IID Null Hypothesis	55
	3.3.2 A Heteroskedastic Null Hypothesis	61
3.4	Power	68
	3.4.1 The Variance Ratio Test for Large $q$	69
	3.4.2 Power against a Stationary AR(1) Alternative	70
	3.4.3 Two Unit Root Alternatives to the Random Walk	73
3.5	Conclusion	81
<b>4</b>	<b>An Econometric Analysis of Nonsynchronous Trading</b>	<b>85</b>
4.1	Introduction	85
4.2	A Model of Nonsynchronous Trading	88
	4.2.1 Implications for Individual Returns	90
	4.2.2 Implications for Portfolio Returns	93
4.3	Time Aggregation	95
4.4	An Empirical Analysis of Nontrading	99
	4.4.1 Daily Nontrading Probabilities Implicit in Auto- correlations	101
	4.4.2 Nontrading and Index Autocorrelations	104
4.5	Extensions and Generalizations	105
	Appendix A4: Proof of Propositions	108
<b>5</b>	<b>When Are Contrarian Profits Due to Stock Market Overreaction?</b>	<b>115</b>
5.1	Introduction	115
5.2	A Summary of Recent Findings	118
5.3	Analysis of Contrarian Profitability	121
	5.3.1 The Independently and Identically Distributed Bench- mark	124
	5.3.2 Stock Market Overreaction and Fads	124
	5.3.3 Trading on White Noise and Lead-Lag Relations	126
	5.3.4 Lead-Lag Effects and Nonsynchronous Trading	127
	5.3.5 A Positively Dependent Common Factor and the Bid-Ask Spread	130
5.4	An Empirical Appraisal of Overreaction	132

5.5	Long Horizons Versus Short Horizons . . . . .	140
5.6	Conclusion. . . . .	142
	Appendix A5 . . . . .	143
<b>6</b>	<b>Long-Term Memory in Stock Market Prices</b>	<b>147</b>
6.1	Introduction . . . . .	147
6.2	Long-Range Versus Short-Range Dependence. . . . .	149
	6.2.1 The Null Hypothesis. . . . .	149
	6.2.2 Long-Range Dependent Alternatives. . . . .	152
6.3	The Rescaled Range Statistic. . . . .	155
	6.3.1 The Modified $R/S$ Statistic. . . . .	158
	6.3.2 The Asymptotic Distribution of $J^{\lambda}$ . . . . .	160
	6.3.3 The Relation Between $Q^{\lambda}$ and $J^{\lambda}$ . . . . .	161
	6.3.4 The Behavior of $Q^{\lambda}$ Under Long Memory Alternatives . . . . .	163
6.4	$R/S$ Analysis for Stock Market Returns. . . . .	165
	6.4.1 The Evidence for Weekly and Monthly Returns . . . . .	166
6.5	Size and Power. . . . .	171
	6.5.1 The Size of the $R/S$ Test . . . . .	171
	6.5.2 Power Against Fractionally-Differenced Alternatives . . . . .	174
6.6	Conclusion. . . . .	179
	Appendix A6: Proof of Theorems . . . . .	181
<b>Part II</b>		<b>185</b>
<b>7</b>	<b>Multifactor Models Do Not Explain Deviations from the CAPM</b>	<b>189</b>
7.1	Introduction . . . . .	189
7.2	Linear Pricing Models, Mean-Variance Analysis, and the Optimal Orthogonal Portfolio. . . . .	192
7.3	Squared Sharpe Measures. . . . .	195
7.4	Implications for Risk-Based Versus Nonrisk-Based Alternatives. . . . .	196
	7.4.1 Zero Intercept $F$ -Test. . . . .	197
	7.4.2 Testing Approach . . . . .	198
	7.4.3 Estimation Approach . . . . .	206
7.5	Asymptotic Arbitrage in Finite Economies. . . . .	208
7.6	Conclusion. . . . .	212
<b>8</b>	<b>Data-Snooping Biases in Tests of Financial Asset Pricing Models</b>	<b>213</b>
8.1	Quantifying Data-Snooping Biases With Induced Order Statistics. . . . .	215
	8.1.1 Asymptotic Properties of Induced Order Statistics . . . . .	216
	8.1.2 Biases of Tests Based on Individual Securities . . . . .	219

8.1.3	Biases of Tests Based on Portfolios of Securities . . .	224
8.1.4	Interpreting Data-Snooping Bias as Power . . . . .	228
8.2	Monte Carlo Results. . . . .	230
8.2.1	Simulation Results for $9_p$ . . . . .	231
8.2.2	Effects of Induced Ordering on F-Tests. . . . .	231
8.2.3	F-Tests With Cross-Sectional Dependence. . . . .	236
8.3	Two Empirical Examples. . . . .	238
8.3.1	Sorting By Beta . . . . .	238
8.3.2	Sorting By Size . . . . .	240
8.4	How the Data Get Snooped . . . . .	243
8.5	Conclusion . . . . .	246
<b>9</b>	<b>Maximizing Predictability in the Stock and Bond Markets</b>	<b>249</b>
9.1	Introduction. . . . .	249
9.2	Motivation. . . . .	252
9.2.1	Predicting Factors vs. Predicting Returns. . . . .	252
9.2.2	Numerical Illustration. . . . .	254
9.2.3	Empirical Illustration. . . . .	256
9.3	Maximizing Predictability. . . . .	257
9.3.1	Maximally Predictable Portfolio. . . . .	258
9.3.2	Example: One-Factor Model. . . . .	259
9.4	An Empirical Implementation . . . . .	260
9.4.1	The Conditional Factors. . . . .	261
9.4.2	Estimating the Conditional-Factor Model . . . . .	262
9.4.3	Maximizing Predictability. . . . .	269
9.4.4	The Maximally Predictable Portfolios. . . . .	271
9.5	Statistical Inference for the Maximal $\#^2$ . . . . .	273
9.5.1	Monte Carlo Analysis. . . . .	273
9.6	Three Out-of-Sample Measures of Predictability. . . . .	276
9.6.1	Naive vs. Conditional Forecasts. . . . .	276
9.6.2	Merton's Measure of Market Timing . . . . .	279
9.6.3	The Profitability of Predictability. . . . .	281
9.7	Conclusion . . . . .	283
<b>Part III</b>		<b>285</b>
<b>10</b>	<b>An Ordered Probit Analysis of Transaction Stock Prices</b>	<b>287</b>
10.1	Introduction . . . . .	287
10.2	The Ordered Probit Model. . . . .	290
10.2.1	Other Models of Discreteness. . . . .	294
10.2.2	The Likelihood Function. . . . .	294
10.3	The Data . . . . .	295
10.3.1	Sample Statistics. . . . .	297
10.4	The Empirical Specification . . . . .	307

10.5	The Maximum Likelihood Estimates . . . . .	310
10.5.1	Diagnostics . . . . .	316
10.5.2	Endogeneity of $A^{\wedge}$ and $J55_{fe}$ . . . . .	318
10.6	Applications . . . . .	320
10.6.1	Order-Flow Dependence . . . . .	321
10.6.2	Measuring Price Impact Per Unit Volume of Trade . . . . .	322
10.6.3	Does Discreteness Matter? . . . . .	331
10.7	A Larger Sample . . . . .	338
10.8	Conclusion . . . . .	344
<b>11</b>	<b>Index-Futures Arbitrage and the Behavior of Stock Index Futures Prices</b>	<b>347</b>
11.1	Arbitrage Strategies and the Behavior of Stock Index Futures Prices . . . . .	348
11.1.1	Forward Contracts on Stock Indexes (No Transaction Costs) . . . . .	349
11.1.2	The Impact of Transaction Costs . . . . .	350
11.2	Empirical Evidence . . . . .	352
11.2.1	Data . . . . .	353
11.2.2	Behavior of Futures and Index Series . . . . .	354
11.2.3	The Behavior of the Mispricing Series . . . . .	360
11.2.4	Path Dependence of Mispricing . . . . .	364
11.3	Conclusion . . . . .	367
<b>12</b>	<b>Order Imbalances and Stock Price Movements on October 19 and 20, 1987</b>	<b>369</b>
12.1	Some Preliminaries . . . . .	370
12.1.1	The Source of the Data . . . . .	371
12.1.2	The Published Standard and Poor's Index . . . . .	372
12.2	The Constructed Indexes . . . . .	373
12.3	Buying and Selling Pressure . . . . .	378
12.3.1	A Measure of Order Imbalance . . . . .	378
12.3.2	Time-Series Results . . . . .	380
12.3.3	Cross-Sectional Results . . . . .	381
12.3.4	Return Reversals . . . . .	385
12.4	Conclusion . . . . .	387
	Appendix A12 . . . . .	389
A12.1	Index Levels . . . . .	389
A12.2	Fifteen-Minute Index Returns . . . . .	393
	<b>References</b>	<b>395</b>
	<b>Index</b>	<b>417</b>
