

Diss. ETHNo. 9952

FROM LONG RANGE ORDER TO GLASS
ORDER :
**STATIC AND DYNAMIC PROPERTIES OF THE
SOLID SOLUTION $\text{Rb}_{1-x}(\text{ND}_4)_x\text{D}_2\text{PO}_4$**

A dissertation submitted to the
Swiss Federal Institute of Technology
Zurich
for the degree of
Doctor of natural sciences

presented by

Norman Hermann Korner

dipl. phys. ETH
born December 30, 1962
citizen of Eschen (Liechtenstein)

accepted on the recommendation of
Prof. Dr. R. Kind, examiner
Prof. Dr. P. Günter, co-examiner
Prof. Dr. E. Brun, co-examiner

1993

Table of Contents

Abstract	1
Zusammenfassung	3
1. Introduction	5
2. Static Aspects: NMR-NQR Line Shape	8
2.1 Introduction.....	8
2.2 Theory of the orientational dependence of the frequency shift and the line shape for quadrupole perturbed NMR.....	9
2.3 Experimental.....	14
2.4 Exploring the (x - T) phase diagram using ^{87}Rb NMR-NQR.....	14
2.4.1 Paraelectric phase.....	15
2.4.2 Ferroelectric phase.....	16
2.4.3 Antiferroelectric phase.....	16
2.4.4 Glass phase.....	18
2.4.5 Smearing of the phase transition.....	18
2.5 Model calculations of the EFG tensor at the Rb site.....	20
2.5.1 The model.....	23
2.5.2 Uncorrelated deuteron ordering.....	26
2.5.3 Correlated deuteron ordering.....	27
2.5.4 Mixed model: partial correlation.....	29
2.6 Determination of the Edwards-Anderson order parameter qEA	30
2.7 The ^{87}Rb NMR-NQR line shape and its orientational dependence.....	32
2.7.1 General considerations.....	33
2.7.2 ^{87}Rb line shape in the PE region of the phase diagram.....	35
2.7.3 ^{87}Rb line shape in the long range order phases.....	38
2.7.4 ^{87}Rb line shape in the glass phase.....	40
2.8 Summary.....	43
3. Dynamic Aspects: NMR Relaxation	45
3.1 Introduction.....	45
3.2 Experimental.....	46
3.3 Theory.....	47
3.3.1 General NMR-NQR relaxation.....	47
3.3.2 Phenomenological treatment of the relaxation in the glass state.....	52
3.3.3 Microscopic model of the relaxation.....	53

3.3.4	Frequency resolved relaxation.....	56
3.4	Glass dynamics: spin lattice relaxation in D-RADP-50.....	56
3.4.1	Inverse relaxation rates $1/2W_{\parallel}$ and $1/2W_{\perp}$	57
3.4.2	W_2/W_1 and the inhomogeneous stretched exponent j_3	60
3.4.3	^{55}Rb magnetization recovery.....	63
3.4.4	Microscopic model.....	64
3.4.5	Extensions to the microscopic model: restoring of ergodicity and spin diffusion.....	67
3.4.6	Frequency resolved relaxation.....	71
3.4.7	Arrhenius and Vogel-Fulcher law.....	72
3.5	Soft mode and "relaxor" type dynamics.....	73
3.6	Summary.....	79
4.	Spin Diffusion.....	81
4.1	Introduction.....	81
4.2	Results and discussion.....	82
5.	References.....	86
	Acknowledgements.....	89
	Curriculum vitae.....	90
