

**Stabilization of β -Turn Conformations in Peptides Containing
the NPNA Repeat Motif of the
Plasmodium falciparum Circumsporozoite Protein**

INAUGURAL-DISSERTATION

ZUR

ERLANGUNG DER PHILOSOPHISCHEN DOKTORWURDE

VORGELEGT DER

PHILOSOPHISCHEN FAKULTÄT II

DER

UNIVERSITÄT ZÜRICH

VON

Christian Peter Bisang

aus Zürich (ZH)

BEGUTACHTET VON

Prof. Dr. John A. Robinson

Prof. Dr. Wolfgang von Philipsborn

Zürich 1997

Zentralstelle der Studentenschaft

Table of Contents

1. Introduction	1
1.1 Coupling Procedures in Peptide Synthesis.....	1
1.2 The Conformationally Constrained Diketopiperazine Framework.....	4
1.3 β -Hairpins - Secondary Structure Elements in Proteins and Peptides.....	7
1.4 The Sporozoite Stage within the Life-Cycle of <i>P. falciparum</i>	20
1.5 Peptide-Based Vaccine Design.....	24
2. Stabilization of β-Turn Conformations in Peptides Containing the NPNA Repeat Motif of the <i>Plasmodium falciparum</i> Circumsporozoite Protein by Substituting Proline for (S)-αMethylproline	27
2.1 Project Outline.....	27
2.2 Peptide Synthesis.....	29
2.3 CD Analysis.....	32
2.4 NMR Analysis of Peptides 3d, 4c, 6, and 8a Containing the NP ^{Me} NA Motif, and of 9 Comprising Three NPNA Units.....	34
2.5 Structure Calculation and Analysis.....	43
2.5.1 Determination of Distance and Torsion Angle Restraints.....	43
2.5.2 Structure Calculations for Ac-(NP ^{Me} NA) ₃ -OH (6) Based on Restrained Molecular Dynamics Simulations <i>in vacuo</i>	44
2.5.3 Structure Calculations for Ac-(NP ^{Me} NA) ₃ -OH (6) and Ac-(NPNA) ₃ -OH (9) Based on Time-Averaged Restrained MD Simulations in Water.....	51
2.5 Biological Activity.....	58
2.6 Conclusions.....	60
3. Design of Diketopiperazine Based Templates and their Application in the Stabilization of Loop Conformations in Cyclic Peptides	63
3.1 Project Outline.....	63
3.2 Template Design.....	67
3.3 Synthesis of the Bifunctional Template 13d	70

3.4	Synthesis and Conformational Studies of cydo(-Ala-Asn-Pro-Asn-Ala-Ala-Temp-) (15).....	72
3.4.1	Peptide Synthesis.....	72
3.4.2	CD Analysis.....	72
3.4.3	NMR Analysis.....	75
3.4.4	Structure Calculations.....	83
3.5	Comparative Conformational Studies of Template Bridged Cyclic Peptides 15 and 16, Containing the ANPNAA and ANP ^{Me} NAA Loop, Respectively, and of a Disulfide Bridged Analogue 17.....	90
3.5.1	Peptide Synthesis.....	90
3.5.2	CD Analysis.....	91
3.5.3	NMR Analysis.....	92
3.6	Conformational Analysis of Template Bridged Cyclic Peptide 18 Containing the RGD-Motif, a Common Recognition Sequence of Integrin Ligands.....	97
3.6.1	Peptide Synthesis and CD Analysis.....	97
3.6.2	NMR Analysis.....	97
3.6.3	Biological Studies.....	102
3.7	Conformational Analysis of Template Bridged Loop Mimetic 19, Containing a Seven Amino Acid Portion of the CDRL1 from an Anti INF γ Receptor Antibody.....	103
3.8	Design of Trifunctional Template 14b for the Solid-Phase Synthesis of Protein Loop Mimetics - The Solid-Phase Synthesis of cyclo(-Ala-Asn(Mtt)-Pro-Asn(Mtt)-Ala-Ala-Temp-)-resin (28).....	106
3.8.1	Template Synthesis.....	106
3.8.2	Peptide Synthesis.....	107
3.8.3	NMR Analysis.....	110
3.9	Conclusions.....	117
4.	Experimental Part	119
4.1	General Notes.....	119
4.2	Synthesis of Linear Peptides Containing NP ^{Me} NA and NPNA Motifs.	122

4.3	Immunization Procedure and Immunological Assays.....	127
4.3.1	Polyclonal Antisera Against NP ^{Mc} NA and NPNA Peptides.....	127
4.3.2	Immunological Assays.....	128
4.4	Synthesis of the Template (3S,7S,8aS)-7-[[<i>(</i> 9H-fluoren-9-yl)methoxycarbonyl]amino]-per- hydro-1,4-dioxopyrrolo[1,2-a]pyrazine-3-acetic Acid (13d).....	132
4.5	Synthesis of Template Constrained Peptides 15, 16, 18, and 19, Containing the Bifunctional Template 13e, of Disulfide Bridged Peptide 17 and of 26.....	136
4.6	Solid-Phase Synthesis of <i>cyclof</i> -Ala-Asn-Pro-Asn-Ala-Ala-Temp- (20b) Containing the Trifunctional Template 14e	140
Appendices		142
Appendix A.	Experimental Restraints for 6.....	142
Appendix B.	Experimental Restraints for 15.....	145
Appendix C.	SA Protocol.....	149
Appendix D.	Additional NMR Data.....	150
Appendix E.	Abbreviations.....	153
Appendix F.	WEXII Pulse Program.....	155
Appendix G.	List of Compounds.....	157
