

# Antimicrobial and Autolytic Systems of Dairy Propionibacteria

Susanne Miescher

Diss. ETH No. 13486

Zurich, 1999

# Contents

Summary	V
Zusammenfassung	VII
<b>1 Introduction</b>	<b>1</b>
<b>1.1 The genus <i>Propionibacterium</i></b>	<b>1</b>
<b>1.2 Antimetabolites of dairy propionibacteria</b>	<b>2</b>
<b>1.3 Bacteriocins — a short characterisation</b>	<b>3</b>
1.3.1 Bacteriocins and other antimicrobial proteins	3
1.3.2 General structure of bacteriocins	4
1.3.3 Genetics of bacteriocins	4
1.3.4. Mode of action of bacteriocins	5
<b>1.4 Autolysins and their role in cell metabolism</b>	<b>6</b>
<b>1.5 Biological preservation of dairy products with propionibacteria and lactic acid bacteria</b>	<b>8</b>
<b>1.6 Aims of this thesis</b>	<b>10</b>
<b>2 Material and methods</b>	<b>11</b>
<b>2.1 Bacterial strains and growth conditions</b>	<b>11</b>
<b>2.2 Isolation and identification of food-spoiling yeasts and moulds from yoghurt</b>	<b>17</b>
<b>2.3 Analyses of antimicrobial activities</b>	<b>18</b>
2.3.1 Screening methods for detecting antimicrobial activities	18
<b>2.3.1.1 Agar spot method</b>	<b>18</b>
<b>2.3.1.2 Well diffusion method</b>	<b>18</b>
2.3.2 Bacteriocin assays	19
2.3.2.1 Activity determination	19
2.3.2.2 Enzymatic and temperature sensitivity	19
2.3.3 Determination of propionate and acetate concentrations in <i>Propionibacterium</i> cultures	19
<b>2.4 Methods for analysis of autolytic enzymes</b>	<b>20</b>
<b>2.4.1 Induction and measurement of autolysis</b>	<b>20</b>
2.4.2 Extraction of autolysins from whole cells	21
<b>2.5 Techniques used for protein analyses</b>	<b>21</b>
2.5.1 <b>Methods of protein electrophoresis in polyacrylamide gels</b>	<b>21</b>
2.5.1.1 Dissociating buffer system	21
<b>2.5.1.2 Non-dissociating buffer system</b>	<b>21</b>
<b>2.5.1.3 Renaturing polyacrylamide gel electrophoresis of bacteriocins</b>	<b>22</b>

2.5.1.4	Renaturing polyacrylamide gel electrophoresis of autolysins	23
2.5.1.5	Western blotting	23
2.5.1.6	N-terminal amino acid sequence analysis	24
<b>2.6</b>	<b>Protein purification methods</b>	<b>24</b>
2.6.1	Purification of bacteriocins	24
2.6.2	Molecular weight determination	25
2.6.3	Determination of protein concentration	25
<b>2.7</b>	<b>Techniques used for DNA analyses</b>	<b>26</b>
2.7.1	Methods of DNA isolation and gel electrophoresis	26
2.7.1.1	Small scale plasmid DNA isolation	26
2.7.1.2	Large scale plasmid DNA isolation	26
2.7.1.3	Agarose gel electrophoresis	26
2.7.2	Hybridisation analysis	26
2.7.2.1	Random primed DNA labelling	26
2.7.2.2	DNA blotting and hybridisation	27
2.7.3	Restriction endonuclease analysis of DNA	27
<b>2.8</b>	<b>Use of antifungal bacteria in yoghurt</b>	<b>27</b>
2.8.1	Investigation of antifungal activities in a food system	27
2.8.2	Application of protective propionibacteria to yoghurt production	28
<b>3</b>	<b>Results</b>	<b>31</b>
<b>3.1</b>	<b>Isolation and identification of yoghurt-spoiling yeasts and moulds</b>	<b>31</b>
<b>3.2</b>	<b>Antimicrobial activities of dairy propionibacteria</b>	<b>33</b>
3.2.1	Screening for antimicrobial activities	33
3.2.2	Kinetics of acetate and propionate production of propionibacteria and their influence on antifungal activities	35
3.2.3	Detection of an antibacterial activity in the cell-free supernatant of <i>Propionibacterium jensenii</i> DF1	36
3.2.4	Enzymatic and temperature sensitivity of the antibacterial activity of <i>Propionibacterium jensenii</i> DF1	37
3.2.5	Production of antibacterial activity during culture growth of <i>Propionibacterium jensenii</i> DF1	39
3.2.6	Detection of two novel bacteriocins of <i>Propionibacterium jensenii</i> DF1	40
3.2.7	Purification of propionicin SMI and SM2	41
3.2.8	Complete nucleotide sequence of the structural gene of propionicin SMI	45
3.2.9	N-terminal amino acid sequence of propionicin SM2	48
3.2.10	Detection of inhibitory activities similar to propionicin SMI and SM2 in other <i>Propionibacterium</i> strains	48
<b>3.3</b>	<b>Autolysis of dairy propionibacteria</b>	<b>52</b>
3.3.1	Screening for autolysis in 108 <i>Propionibacterium</i> strains	52
3.3.2	Autolysis during growth of <i>Propionibacterium freudenreichii</i> SM208	54
3.3.3	Detection of a 120-kDa autolysin in <i>Propionibacterium freudenreichii</i> SM208	55
3.3.4	N-terminal amino acid sequence of a putative 120-kDa autolysin of <i>Propionibacterium freudenreichii</i> SM208	56

<b>3.4</b>	<b>Plasmid screening of antimicrobial and high autolytic propionibacteria</b>	<b>56</b>
<b>3.5</b>	<b>Approaches to biological preservation of yoghurt with protective propionibacteria and lactobacilli</b>	<b>58</b>
3.5.1	Benefits of antifungal propionibacteria and lactobacilli in a food system tested at laboratory scale	58
3.5.2	Storage of commercial yoghurt with propionibacteria as protective culture	59
<b>4</b>	<b>Discussion</b>	<b>63</b>
<b>4.1</b>	<b>Yeasts as spoilage organisms in yoghurt</b>	<b>63</b>
4.1.1	Diversity of spoiling yeasts and moulds in yoghurt	63
4.1.2	Taxonomy of yeasts	64
<b>4.2</b>	<b>Studies of antimicrobial activities</b>	<b>65</b>
4.2.1	Fungicidal activities detected in propionibacteria and lactobacilli	65
4.2.2	Propionate and acetate acting as fungicidal agents ?	66
<b>4.3</b>	<b>Bacteriocins of dairy propionibacteria</b>	<b>68</b>
4.3.1.	Detection and characterisation of two novel bacteriocins of <i>Propionibacterium jensenii</i> DF1	68
4.3.2	Activity spectra of bacteriocins of dairy propionibacteria	70
4.3.3.	Antimicrobial activities of <i>Propionibacterium jensenii</i> and <i>Propionibacterium thoenii</i>	72
4.3.4	Plasmid association of bacteriocins	72
4.3.5	Analysis of the whole amino acid sequence of propionicin SMI	73
<b>4.4</b>	<b>Autolysis and autolysins</b>	<b>77</b>
4.4.1	Autolysis of dairy propionibacteria	77
4.4.2	Analysis of <i>Propionibacterium freudenreichii</i> autolysins	77
4.4.3	Relation of bacteriocins and autolytic activities ?	79
<b>4.5</b>	<b>Potential of propionibacteria and lactobacilli in biological preservation of food</b>	<b>79</b>
<b>4.6</b>	<b>Conclusion and prospects</b>	<b>82</b>
<b>5</b>	<b>References</b>	<b>85</b>
<b>6</b>	<b>Appendix</b>	<b>99</b>
6.1.	Identification of spoiling yeasts and moulds isolated from propionibacteria	99
6.2.	Screening for antimicrobial activities	102
