

Classical Genetic Research and its Legacy

The mapping cultures of
twentieth-century genetics

**Edited by
Hans-Jorg Rheinberger and
Jean-Paul Gaudilliere**

Introduction

HANS-JORG RHEINBERGER AND JEAN-PAUL GAUDILLIERE

PART I

Mendelian genetics and linkage mapping 7

1 Linkage before Mendelism? Plant-breeding research in Central Europe, c. 1880-1910 9

JONATHAN HARWOOD

Nineteenth-century breeders' work on correlation 9

Early Mendelian views of correlation 13

Conclusion 15

2 Carl Correns and the early history of genetic linkage 21

HANS-JORG RHEINBERGER

Introduction 21

*Experiments with *Matthiola* 22*

Correns' chromosome theory 25

Concluding epistemological considerations 29

3	Applying and extending the notion of genetic linkage: the first fifty years	34
	RAPHAEL FALK	
	<i>Compound unit-characters</i> 35	
	<i>Chromosomes constrain independent segregation</i> 36	
	<i>Linkage as an analytic tool</i> 38	
	<i>Recombination mechanics: chiasmatype or else?</i> 41	
	<i>Linkage maps</i> 45	
	<i>The cytological link</i> 49	
	<i>Conclusions: the impact of the linkage concept on genetic analysis</i> 52	
4	Classical genetics and the geography of genes	57
	LISA GANNETT AND JAMES R. GRIESEMER	
	<i>Introduction</i> 57	
	<i>Historiography of genetic mapping</i> 58	
	<i>Hybrids all the way down (and up): problems, protocols, and maps</i> 60	
	<i>Pragmatic aspects of geographical maps</i> 73	
	<i>Conclusion</i> 84	
PART II		
	Mapping work, mapping collectives, mapping cultures	89
5	Mapping and seeing: Barbara McClintock and the linking of genetics and cytology in maize genetics, 1928-35	91
	LEE B. KASS AND CHRISTOPHE BONNEUIL	
	<i>Emerson, maize, and genetics</i> 92	
	<i>Cytology meets corn genetics</i> 101	
	<i>Conclusion: seeing and mapping</i> 109	
6	The ABO blood groups: mapping the history and geography of genes in <i>Homo sapiens</i>	119
	LISA GANNETT AND JAMES R. GRIESEMER	
	<i>Introduction</i> 119	
	<i>The human genome diversity project: contesting disciplinary boundaries and the historical legacy of ABO blood group research</i> 121	
	<i>Mapping the history and geography of genes in <i>Homo sapiens</i></i> 124	
	<i>Conclusion: mapping people, mapping flies</i> 165	

7 Mapping as technology: genes, mutant mice, and biomedical research (1910-65)	173
JEAN-PAUL GAUDILLIERE	
<i>Introduction</i> 173	
<i>Inbreeding, and physiological studies within the Bussey school</i> 174	
<i>Mouse genetics as tool: the Jackson Biomedical Culture</i> 185	
<i>Scaling-up: mapping in the era of big biomedecine</i> 193	
<i>Conclusion</i> 200	
Commentaries	205
Genetic mapping: approaches to the spatial topography of genetics	207
DAVID TURNBULL	
<i>Maps as representations</i> 208	
<i>Maps as discursive devices for making connections and assemblages</i> 209	
<i>Maps as devices to materialize questions</i> 210	
<i>Maps as tools for control, appropriation, and ideological expression</i> 210	
<i>Mapping as a fundamental cognitive process</i> 211	
<i>Mapping and knowledge spaces</i> 212	
<i>Mapping as boundary objects—devices for handling multiplicity, heterogeneity, and messiness</i> 212	
<i>Maps as spatial and temporal narratives</i> 213	
<i>Unmapping and remapping</i> 214	
<i>Evolution, mapping, narrativity, and reflexive difficulties</i> 215	
Mapping as a cultural practice	220
JENS LACHMUND	
<i>The diversity of maps</i> 221	
<i>Mapping as a cultural category</i> 222	
<i>The stabilization of cartographic knowledge</i> 223	
<i>Concluding remarks</i> 225
