

INVESTIGATIONS OF HIGH CURRENT DENSITY ARC PLASMAS FOR DIAMOND DEPOSITION

THESE N° 1462 (1996)

PRESENTÉE AU DÉPARTEMENT DE PHYSIQUE

ÉCOLE POLYTECHNIQUE FÉDÉRALE DE LAUSANNE

POUR L'OBTENTION DU GRADE DE DOCTEUR ES SCIENCES

PAR

Mauro PEDRAZZINI

Physicien diplômé de l'Université de Berne
de nationalité liechtensteinoise

acceptée sur proposition du jury:

Dr Ch. Hollenstein, directeur de thèse
Dr A.A. Howling, corapporteur
Dr J. Karner, corapporteur
Prof. D.C. Schram, corapporteur
Prof. M.Q. Tran, corapporteur

Lausanne, EPFL
1996

Contents

1	Introduction	3
2	The Low Pressure High Current DC Arc	5
2.1	Classification of Discharges	5
2.2	Thermal Equilibrium	6
2.3	Plasma Parameters and their Measurement	8
2.3.1	Electron Temperature	10
2.3.2	Heavy Particle Temperature	13
2.3.3	Electron Density	15
2.4	Mechanisms of Hydrogen Dissociation	19
2.4.1	Potential Energy of the Hydrogen Molecule	20
2.4.2	Thermal Dissociation	21
2.4.3	Dissociation by Direct Electron Impact	21
2.4.4	Dissociation of Vibrationally Excited Molecules	23
3	Low Pressure Diamond Synthesis	27
3.1	Synthetic Diamond	27
3.2	Mechanisms of Metastable Diamond Film Deposition	27
3.2.1	Selective Etching	28
3.2.2	Surface Kinetics	29
3.3	Nucleation	32
3.4	Growth Rates	32
3.5	Diamond Film Deposition Techniques	34
3.5.1	Thermal Dissociation	35
3.5.2	Low-pressure Plasma Discharges	37
3.5.3	Conclusion: Deposition Techniques	38
4	Experimental Set-Up	41
4.1	The Reactor	41
4.2	Control Electronics	42
4.3	Plasma Stability Limits	42
4.4	Thermal Loading	43
4.5	Plasma Diagnostics Set-Up	43
4.5.1	Electrical Probes	43
4.5.2	Optical Emission Spectrometry	46
4.5.3	Mass Spectrometry	48

CONTENTS

5	Measurements and Results	49
5.1	Plasma Characterisation	49
5.1.1	Operational Space	49
5.1.2	Electrical Probe Measurements	52
5.1.3	Plasma Emission in the Visible and Near-UV	56
5.1.4	Temperature of Atomic Hydrogen	61
5.1.5	Rotational Temperature of CH and C ₂ -Radicals	65
5.1.6	Mass Spectrometry	71
5.1.7	Plasma Diagnostics: Discussion	76
5.2	Diamond Film Deposition	82
5.2.1	Substrate Position	82
5.2.2	Diffusion Model for Atomic Hydrogen	83
5.2.3	Temperature Change During Deposition	87
5.2.4	Load Effects	88
5.2.5	Diamond Purity and Growth Rate	89
6	Applications	95
6.1	Diamond Coated Cemented Carbide Cutting Tools	95
6.1.1	Diamond Tools	95
6.2	The Industrial Reactor	96
6.2.1	Basic Considerations	96
6.2.2	Reactor Features	97
6.2.3	Diamond Film Deposition	97
6.3	Tool Performance	97
7	Conclusions	103
A	Determination of Substrate Emissivity	105
