Introduction	xvii

Part I Windows Programming Basics

1 Hello Windows CE	3
What Is Different About Windows CE	3
Fewer Resources in Windows CE Devices	4
Unicode	4
New Controls	4
Componentization	5
Win32 Subset	5
It's Still Windows Programming	6
Hungarian Notation	6
Your First Windows CE Application	7
Building Your First Application	9
Running the Program	11
What's Wrong?	11
Hello2	12
Anatomy of a Windows-Based Application	14
The Window	14
The Window Class	15
The Window Procedure	15
The Life of a Message	15
Registering the Window Class	19
Creating the Window	20
The Message Loop	23
The Window Procedure	24
HelloCE	27
The Code	28
Running HelloCE	33

What do you think of this book? We want to hear from you!

I'm interested in hearing your feedback so we can continually improve our books and learning resources for you. To participate in a brief online survey, please visit:

2	Drawing on the Screen	35
	Painting Basics	36
	Valid and Invalid Regions	36
	Device Contexts	37
	Writing Text	39
	Device Context Attributes	40
	The TextDemo Example Program	42
	Fonts	47
	The FontList Example Program	53
	Bitmaps	61
	Device-Dependent Bitmaps	61
	Device-Independent Bitmaps	62
	DIB Sections	63
	Drawing Bitmaps	65
	AlphaBlending	68
	Lines and Shapes	69
	Lines	69
	Shapes	72
	Fill Functions	75
	The Shapes Example Program	77
3	Input: Keyboard, Mouse, and Touch Screen	85
	The Keyboard	85
	Input Focus	85
	Keyboard Messages	86
	Keyboard Functions	91
	The KeyTrac Example Program	93
	The Mouse and the Touch Screen	101
	Mouse Messages	101
	Working with the Touch Screen	102
	The TicTacToe Example Program	109
4	Windows, Controls, and Menus	119
	Child Windows	119
	Window Management Functions	120
	Enumerating Windows	120
	Finding a Window	121
	Moving a Window	121
	Editing the Window Structure Values	122

Windows Controls	124
Working with Controls	124
Button Controls	126
The Edit Control	128
The List Box Control	129
The Combo Box Control	130
Static Controls	130
The Scroll Bar Control	131
Controls and Colors	135
Menus	135
Handling Menu Commands	137
Resources	137
Resource Scripts	138
Icons	139
Accelerators	140
Bitmaps	141
Strings	141
The DOIView Example Program	142
5 Common Controls and Windows CE	161
Programming Common Controls	161
The Common Controls	164
The Command Bar	164
Other Menu Controls	184
The Month Calendar Control	185
The Date and Time Picker Control	187
The List View Control	190
The CapEdit Control	192
Other Common Controls	193
Unsupported Common Controls	194
6 Dialog Boxes and Property Sheets	197
Dialog Boxes	197
Dialog Box Resource Templates	198
Creating a Dialog Box	201
Dialog Box Procedures	202
Modeless Dialog Boxes	206
Property Sheets	207
Common Dialogs	213
The DlgDemo Example Program	214

Part ii Windows CE Programming

7	Memory Management	241
	Memory Basics	241
	About RAM	241
	About ROM	242
	About Virtual Memory	242
	An Application's Address Space	246
	The Different Kinds of Memory Allocation	247
	Virtual Memory	248
	Heaps	254
	The Local Heap	254
	Separate Heaps	256
	The Stack	260
	Static Data	260
	String Resources	263
	Selecting the Proper Memory Type	263
	Managing Low-Memory Conditions	264
8	Modules, Processes, and Threads	267
	Modules	267
	Processes	270
	Creating a Process	271
	Terminating a Process	274
	Other Processes	274
	Threads	275
	The System Scheduler	276
	Creating a Thread	278
	Setting and Querying Thread Priority	281
	Setting a Thread's Time Quantum	282
	Suspending and Resuming a Thread	282
	Fibers	283
	Thread Local Storage	285
	Synchronization	287
	Events	288
	Waiting	289
	Semaphores	293
	Mutexes	295
	Duplicating Synchronization Handles	296

Critical Sections	297
Interlocked Variable Access.	298
Interprocess Communication.	300
Finding Other Processes.	300
WM_COPYDATA.	301
Named Memory-Mapped Objects.	301
Point-to-Point Message Queues.	304
Communicating with Files and Databases.	308
The XTalk Example Program.	308
Exception Handling.	320
C++ Exception Handling.	321
Win32 Exception Handling.	324
9 The Windows CE File System	329
The Windows CE File System API.	330
Standard File I/O.	330
Memory-Mapped Files.	338
Navigating the File System.	339
Dealing with Storage.	346
The Object Store.	347
Accessing Volumes With the File API.	347
The Storage Manager.	349
10 The Registry.	357
Registry Organization.	357
The Registry API.	359
Opening and Creating Keys.	359
Reading Registry Values.	360
Writing Registry Values.	360
Deleting Keys and Values.	361
Enumerating Registry Keys.	362
Flushing the Registry.	362
Registry Change Notifications.	363
The RegView Example Program.	363
11 Windows CE Databases.	381
The Two Databases.	381
Basic Definitions.	381
The Database API.	383

12	Notifications	405
	User Notifications	405
	Setting a User Notification	406
	Timer Event Notifications	410
	System Event Notifications	411
	The NoteDemo Example Program	412
	Querying Scheduled Notifications	425
	Bubble Notifications	426
	Adding a Notification	427
	Modifying a Notification	430
	Removing a Notification	430

Part III **Advanced Windows CE**

13	Windows CE Networking	433
	Windows Networking Support	433
	WNet Functions	433
	The ListNet Example Program	444
	TCP/IP Programming	454
	Socket Programming	455
	Blocking versus Nonblocking Sockets	465
14	Device-to-Device Communication	469
	Infrared Communication	469
	IR Basics	469
	Discovery	470
	Publishing an IR Service	472
	Querying and Setting IR Socket Options	473
	The MySquirt Example Program	474
	Bluetooth	490
	Stack	491
	Discovery	492
	Publishing a Service	501
	Bluetooth Communication with Winsock	504
	Bluetooth Communication with Virtual COM Ports	506
	The BtSquirt Example Program	511

15	System Programming	535
	The Windows CE Memory Architecture	535
	Application Space	536
	Kernel Space	538
	Writing Cross-Platform Windows CE Applications	539
	Platforms and Operating System Versions	539
	Compile-Time Versioning	541
	Explicit Linking	542
	Run-Time Version Checking	543
	Power Management	544
	Defining the Meaning of "Off"	544
	Querying the Power State	545
	The Power Manager	547
	Managing Power without the PowerJvManager	550
16	Serial Communications	555
	Basic Serial Communication	555
	Opening and Closing a Serial Port	556
	Reading from and Writing to a Serial Port	556
	Asynchronous Serial I/O	557
	Configuring the Serial Port	559
	Setting the Port Timeout Values	561
	Querying the Capabilities of the Serial Driver	563
	Controlling the Serial Port	564
	Clearing Errors and Querying Status	565
	Stayin' Alive	566
	The CeChat Example Program	567
17	Device Drivers and Services	581
	Basic Drivers	581
	Driver Names	582
	The Device Driver Load Process	583
	Enumerating the Active Drivers	587
	Reading and Writing Device Drivers	588
	Writing a Windows CE Stream Device Driver	590
	The Stream Driver Entry Points	591
	Managing Buffers	598
	Device Interface Classes	604
	Device Driver Power Management	606

Building a Device Driver.	609
Debug Zones.	609
The Generic Driver Example.	611
Services.	618
Service Architecture.	618
The Life of a Service.	619
Application Control of a Service.	620
The Service DLL Entry Points.	622
The Service IOCTL Commands.	623
Super Service.	626
Services.exe Command Line.	630
TickSrv Example Service.	630
Index.	645
