1	STREAMS AND FILES	1
	Streams	2
	Reading and Writing Bytes	2
	The Complete Stream Zoo	4
	Combining Stream Filters	8
	Text Input and Output	11
	How to Write Text Output	12
	How to Read Text Input	14
	Saving Objects in Text Format	14
	Character Sets	19
	Reading and Writing Binary Data	23
	Random-Access Files	26
	ZIP Archives	32

Object Streams and Serialization	39	!..
Understanding the Object Serialization File Format	46	
Modifying the Default Serialization Mechanism	51	
Serializing Singletons and Typesafe Enumerations	53	*..
Versioning	54	
Using Serialization for Cloning	56	- « - ...
File Management	59	
New I/O	65	
Memory-Mapped Files	65	
The Buffer Data Structure	72	
File Locking	74	
Regular Expressions	75	
<b>2 XML</b>	<b>87</b>	
Introducing XML	88	
The Structure of an XML Document	90	
Parsing an XML Document	93	
Validating XML Documents	105	
Document Type Definitions	106	
XML Schema	112	
A Practical Example	115	
Locating Information with XPath	129	
Using Namespaces	136	
Streaming Parsers	138	
Using the SAX Parser	138	
Using the StAX Parser	143	- ]
Generating XML Documents	146	llv&.
Writing an XML Document with StAX	150	
XSL Transformations	157	
<b>3 NETWORKING</b>	<b>169</b>	; ,j^i.n/-... if..
Connecting to a Server	170	
Socket Timeouts	174	

	Internet Addresses	175	- akiiii
	Implementing Servers	177	•
	Serving Multiple Clients	180	.;iii.=4 <sup>l</sup> *
	Half-Close	184	. -i2
	Interruptible Sockets	184	^"?./ .M.
	Sending E-Mail	191	
	Making URL Connections	196	
	URLs and URIs	196	
	Using a URL Connection to Retrieve Information	198	
	Posting Form Data	207	
<b>4</b>	<b>DATABASE PROGRAMMING</b>	<b>217</b>	:
	The Design of JDBC	218	tnl
	JDBC Driver Types	219	
	Typical Uses of JDBC	220	
	The Structured Query Language	222	
	JDBC Configuration	227	
	Database URLs	227	
	Driver JAR Files	228	
	Starting the Database	228	
	Registering the Driver Class	229	
	Connecting to the Database	229	
	Executing SQL Statements	232	
	Managing Connections, Statements, and Result Sets	235	
	Analyzing SQL Exceptions	236	
	Populating a Database	238	
	Query Execution	242	-i^JxsF ^
	Prepared Statements	242	
	Reading and Writing LOBs	250	
	SQL Escapes	252	
	Multiple Results	253	
	Retrieving Autogenerated Keys	254	

Scrollable and Updatable Result Sets	254	
Scrollable Result Sets	254	
Updatable Result Sets	256	
Row Sets	260	
Cached Row Sets	261	
Metadata	263	
Transactions	273	
Save Points	274	
Batch Updates	274	
Advanced SQL Types	276	
Connection Management in Web and Enterprise Applications	278	
Introduction to LDAP	279	
Configuring an LDAP Server	280	
Accessing LDAP Directory Information	284	
<b>5</b>	<b>INTERNATIONALIZATION</b>	<b>297</b>
Locales	298	
Number Formats	303	
Currencies	309	
Date and Time	310	
Collation	318	
Collation Strength	318	
Decomposition	319	
Message Formatting	324	
Choice Formats	326	
Text Files and Character Sets	328	
Character Encoding of Source Files	328	
Resource Bundles	329	
Locating Resource Bundles	330	
Property Files	331	
Bundle Classes	331	
A Complete Example	333	

6	ADVANCED SWING	351	TWA CIU/iAVCr
	Lists	352	oMn,!
	The JList Component	352	>?qf>r
	List Models	358	i
	Inserting and Removing Values	363	
	Rendering Values	365	
	Tables	370	
	A Simple Table	370	
	Table Models	374	
	Working with Rows and Columns	378	
	Cell Rendering and Editing	392	
	Trees	405	
	Simple Trees	406	
	Node Enumeration	422	
	Rendering Nodes	424	
	Listening to Tree Events	427	
	Custom Tree Models	434	
	Text Components	442	
	Change Tracking in Text Components	443	
	Formatted Input Fields	447	
	The JSpinner Component	463	
	Displaying HTML with the JEditorPane	472	
	Progress Indicators	479	
	Progress Bars	479	
	Progress Monitors	483	
	Monitoring the Progress of Input Streams	487	
	Component Organizers	492	
	Split Panes	492	
	Tabbed Panes	496	
	Desktop Panes and Internal Frames	502	
	Cascading and Tiling	505	
	Vetoing Property Settings	509	

7	ADVANCED AWT	521	MA	0
	The Rendering Pipeline	522	'U	
	Shapes	524		
	Using the Shape Classes	527		
	Areas	540		
	Strokes	542		
	Paint	550		
	Coordinate Transformations	552		
	Clipping	557		
	Transparency and Composition	559		
	Rendering Hints	568		
	Readers and Writers for Images	575		
	Obtaining Readers and Writers for Image File Types	575		
	Reading and Writing Files with Multiple Images	576		
	Image Manipulation	585		
	Constructing Raster Images	585		
	Filtering Images	592		
	Printing	601		
	Graphics Printing	602		
	Multiple-Page Printing	611		
	Print Preview	613		
	Print Services	623		
	Stream Print Services	627		
	Printing Attributes	627		
	The Clipboard	635		
	Classes and Interfaces for Data Transfer	636		
	Transferring Text	636		
	The Transferable Interface and Data Flavors	640		
	Building an Image Transferable	642		
	Transferring Java Objects via the System Clipboard	647		
	Using a Local Clipboard to Transfer Object References	652		

Drag and Drop	652	sHa&wt'r o j <£hDgul*>U *
Data Transfer Support in Swing	654	
Drag Sources	658	
Drop Targets	660	
Platform Integration	668	.. , , , ,
Splash Screens	668	J*_~ •?
Launching Desktop Applications	673	
The System Tray	679	
<b>8 JAVABEANS COMPONENTS</b>	<b>685</b>	
Why Beans?	686	o <•
The Bean-Writing Process	688	.^.,V,
Using Beans to Build an Application	690	Vi
Packaging Beans in JAR Files	691	
Composing Beans in a Builder Environment	692	
Naming Patterns for Bean Properties and Events	698	
Bean Property Types	701	>
Simple Properties	701	)
Indexed Properties	701	
Bound Properties	702	• H/V
Constrained Properties	703	/Jto2
BeanInfo Classes	710	
Property Editors	713	
Writing Property Editors	716	
Customizers	723	
Writing a Customizer Class	725	i
JavaBeans Persistence	732	
Using JavaBeans Persistence for Arbitrary Data	736	
A Complete Example for JavaBeans Persistence	742	
<b>9 SECURITY</b>	<b>755</b>	
Class Loaders	756	. * fiT
The Class Loader Hierarchy	757	..*,.,.,.,;!

	Using Class Loaders as Namespaces	759
	Writing Your Own Class Loader	761
	Bytecode Verification	767
	Security Managers and Permissions	771
	Java Platform Security	772
	Security Policy Files	776
	Custom Permissions	783
	Implementation of a Permission Class	783
	User Authentication	790
	JAAS Login Modules	795
	Digital Signatures	805
	Message Digests	805
	Message Signing	812
	The X.509 Certificate Format	814
	Verifying a Signature	814
	The Authentication Problem	818
	Certificate Signing	820
	Certificate Requests	821
	Code Signing	822
	JAR File Signing	822
	Software Developer Certificates	827
	Encryption	828
	Symmetric Ciphers	828
	Key Generation	830
	Cipher Streams	834
	Public Key Ciphers	835
<b>10</b>	<b>DISTRIBUTED OBJECTS</b>	<b>841</b>
	The Roles of Client and Server	842
	Remote Method Calls	845
	Stubs and Parameter Marshalling	845
	The RMI Programming Model	846
	Interfaces and Implementations	846

	The RMI Registry	848	-miA
	Deploying the Program	852	
	Logging RMI Activity	855	
	Parameters and Return Values in Remote Methods	856	
	Transferring Remote Objects	857	
	Transferring Nonremote Objects	857	
	Dynamic Class Loading	860	
	Remote References with Multiple Interfaces	864	
	Remote Objects and the equals, hashCode, and done Methods	865	
	Remote Object Activation	865	
	Web Services and JAX-WS	871	
	Using JAX-WS	871	
	A Web Service Client	874	
	The Amazon E-Commerce Service	877	
11	SCRIPTING, COMPILING, AND ANNOTATION PROCESSING	883	
	Scripting for the Java Platform	884	
	Getting a Scripting Engine	884	
	Script Evaluation and Bindings	885	
	Redirecting Input and Output	887	
	Calling Scripting Functions and Methods	888	
	Compiling a Script	889	
	An Example: Scripting GUI Events	890	
	The Compiler API	895	
	Compiling the Easy Way	895	
	Using Compilation Tasks	895	
	An Example: Dynamic Java Code Generation	900	
	Using Annotations	905	
	An Example: Annotating Event Handlers	906	
	Annotation Syntax	911	
	Standard Annotations	915
