

August-Wilhelm Scheer

ARIS -

Business Process Modeling

Third Edition

With 179 Figures

HOCHSCHULE
LIECHTENSTEIN
Bibliothek

Springer

Table of Contents

	ARIS - Business Process Modeling	1
A.I	Strategic Business Process Analysis	7
A.I.1	Modeling Strategic Business Processes	7
A.I.2	PROMET	18
A.I.3	Additional Methods for Strategic Business Process Modeling	20
A.II	Modeling Individual ARIS Views	21
A.II.1	Modeling the Function View	21
A.II.1.1	Requirements Definition of the Function View	21
A.II.1.1.1	Function Structure	23
A.II.1.1.2	Procedure Sequences	31
A.II.1.1.3	Processing Types	34
A.II.1.1.4	Decision Models	35
A.II.1.1.5	Consolidating the Function View Requirements Definition	37
A.II.1.2	Function Configurations	39
A.II.1.3	Requirements Definition of the Function View	42
A.II.1.3.1	Designing Modules	42
A.II.1.3.2	Mini-Specification	47
A.II.1.3.3	Output Presentation	48
A.II.1.4	Implementing the Function View	50
A.II.2	Modeling the Organization View	52
A.II.2.1	Requirements Definitions of the Organization View	52
A.II.2.1.1	Organizational Structures (Hierarchical Organizations)	53
A.II.2.1.2	Role Concept	57
A.II.2.2	Configuring Organizations	58
A.II.2.3	Design Specification of the Organization View	58
A.II.2.3.1	Network Topology	59
A.II.2.3.2	Component Types	62
A.II.2.4	Implementing the Organization View	63
A.II.3	Modeling the Data View	67
A.II.3.1	Requirements Definition of the Data View	67
A.II.3.1.1	Macro Description	69
A.II.3.1.2	Micro Descriptions	70
A.II.3.1.2.1	The Simple ERM	71
A.II.3.1.2.2	The Enhanced ERM	74
A.II.3.2	Data Configuration	76
A.II.3.3	Design Specification of the Data View	79

X Table of Contents

A.II.3.3.1	Creating Relations	80
A.II.3.3.2	Normalization - Denormalization	83
A.II.3.3.3	Integrity Conditions	85
A.II.3.3.4	Logical Access Paths	87
A.II.3.3.5	Database Schema	88
A.II.3.4	Implementing the Data View	89
A.II.4	Modeling the Output View	93
A.II.4.1	Requirements Definition of the Output View	94
A.II.4.2	Output Configuration	100
A.III	Modeling the Relationships between the Views (Control View)	102
A.III.1	Relationships between Functions and Organization	102
A.III. 1.1	Modeling the Requirements Definition	103
A.III. 1.1.1	Function-Organization Allocation Diagrams	103
A.III. 1.1.2	Use Case Diagram	105
A.III.1.2	Configuration	107
A.III. 1.3	Design Specification	110
A.III.2	Relationships between Functions and Data	111
A.III.2.1	Modeling the Requirements Definition	112
A.III.2.1.1	Function-Data Allocations	112
A.III.2.1.1.1	Object Oriented Class Diagrams	112
A.III.2.1.1.2	Function Allocation Diagrams	118
A.III.2.1.1.3	DataFlow	118
A.III.2.1.1.4	Screen Association	120
A.III.2.1.2	Event and Message Control	124
A.III.2.1.2.1	ECARule	124
A.III.2.1.2.2	Event-Driven Process Chains (EPCs)	125
A.III.2.1.2.3	Statecharts	128
A.III.2.1.2.4	Message Control	129
A.III.2.1.2.5	Linking Object Oriented Modeling and EPC	133
A.III.2.2	Configuration	136
A.III.2.3	Design Specification	139
A.III.2.3.1	Linking Modules and Databases	139
A.III.2.3.1.1	Allocating Schema	139
A.III.2.3.1.2	Deriving Control Structures	140
A.III.2.3.1.3	Database Transactions	141
A.III.2.3.2	Trigger Control	142
A.III.2.3.3	Object Oriented Design Specification	144
A.III.2.3.3.1	Common Detailing	144
A.III.2.3.3.2	Database Links	146
A.III.2.4	Implementation Description	147

A.III.3	Relationships between Functions and Output	148
A.III.3.1	Modeling the Requirements Definition	148
A.III.3.2	Configuration	152
A.III.4	Relationships between Organization and Data	153
A.III.4.1	Modeling the Requirements Definition	153
A.III.4.2	Configuration	156
A.III.4.3	Design Specification	156
A.III.4.3.1	Detailing Authorizations	156
A.III.4.3.1	Distributed Databases	158
A.III.5	Relationships between Organization and Output	162
A.III.5.1	Modeling the Requirements Definition	162
A.III.5.2	Configuration	165
A.III.6	Relationships between Data and Output	166
A.III.6.1	Modeling the Requirements Definition	166
A.III.6.2	Configuration	169
A.III.7	Comprehensive Models for all ARIS Views	170
A.III.7.1	Modeling the Requirements Definition	170
A.III.7.1.1	Process Models	170
A.III.7.1.2	Business Objects	171
A.III.7.2	Configuration	173
A.III.7.2.1	Leveraging Business Process Models for Configuration	173
A.III.7.2.2	Configuring Business Objects	175
A.III.7.3	Design Specification	175
B	ARIS Procedural Models and Applications	177
B.I	Implementing Standard Software with ARIS Models	177
	<i>Dr. Peter Mattheis, Dr. Wolfram Iost, IDS Prof. Scheer GmbH</i>	
B.I.1	Resolving Critical Issues in Conventional Project Management	177
B.I.2	- ARIS Quickstep for R/3	178
B.I.3	Quickstep for R/3: Illustrating the Phases of SAP Implementation	180
B.I.4	Summary	183

B.II	Implementing Workflow Systems Using ARIS Models	184
	<i>Dipt. -Inform. Andreas Kronz, IDS Prof. Scheer GmbH</i>	
B.II. 1	Success Factors for the Implementation of Workflow Systems	184
B.II.2	ARIS Procedural Model for Workflow Implementation	184
B.III	Model Supported System Development Using the ARIS Framework	189
	<i>Dipl.-Inform. Saeed Emrany, Dipl.-Inform. Richard Bock, IDS Prof. Scheer GmbH</i>	
B.III.1	General Procedural Model	189
B.III.2	Procedural Model for Modeling Target Concepts	190
B.IV	Object Oriented System Development Using the Unified Modeling Language (UML)	196
	<i>Dr. Markus Niittgens, Dipl.-Hdl. Michael Hoffmann, Dipl. -Inform. Thomas Feld, Institute for Information Systems (IW), University of Saarland</i>	
B.IV. 1	Developing and Describing Procedural Models	196
B.IV.2	Procedural Model Phases	198
B.IV.3	Outlook	201
	References	203
	Index	215
