Foreword	iii
List of illustrations	x
Work plan	xiv
INTRODUCTION: SEED; PROPERTIES OF SEED	1
<b>1. Seed</b>	<b>3</b>
Definition	3
Structure	3
<b>Exercise 1</b>	<b>3</b>
<b>2. Properties of seed</b>	<b>5</b>
Which properties determine seed quality in general?	5
Which seed properties are important in seed processing?	5
Analytical purity	5
Germination	11
Size grading	17
Moisture content	17
<b>Exercise 2</b>	<b>24</b>
PART I: SEED HARVESTING AND STORAGE	
<b>3. Seed harvesting</b>	<b>27</b>
Harvesting cereals and grain legumes	28
Time of grain-legume harvesting	28
Methods of cereal and grain-legume harvesting	29
Maize harvesting	30
Time of harvesting	30
Harvesting methods	31
Processing the harvested crop	31
<b>Exercise 3</b>	<b>32</b>

<b>4. Seed storage</b>	33
Pre-cleaning	33
Drying cereals and grain legumes	35
Natural drying	35
Artificial drying	35
Drying maize	37
Protective measures in seed storage	38
Important storage fungi	39
Important storage pests	39
Storage of grain legumes (for seed purposes)	43
Germination and storage period	43
Techniques and conditions of storage	43
Granaries	44
Silos, or floor storage	44
Maize storage	44
Exercise 4	45
<b>5. Protection of seed</b>	47
Organisms which attack seeds	47
Modes of infection	49
Seed-borne - exodermal	49
Seed-borne - endodermal	49
Seed- and soil-borne	49
Wind-borne	51
Damage caused by diseases	51
Impairment of germination	51
Damage to young plants	51
Damage to mature plants	53
Important pests that can be controlled by seed treatment	53
Seed treatment to prevent damage by birds	55
Seed treatment in the control of insects	69
<b>Exercise 5</b>	71

**PART II: SEED PROCESSING**

<b>6. The necessity of seed processing</b>	<b>77</b>
Methods of seed processing	79
<b>Exercise 6</b>	<b>79</b>
<b>7. Seed processing operations</b>	<b>81</b>
Characteristics of seeds	81
Separation methods	83
Separation by air	83
Separation by vibration	85
Screening	85
Separation by trieurs	93
Gravity separators	97
Mode of operation of gravity separators	99
Separation according to shape	101
Belt grader mode of operation	101
Spiral separator: mode of operation	101
<b>Exercise 7</b>	<b>104</b>
<b>3. Seed processing machines</b>	<b>107</b>
The components of a seed processing line	107
Operation of a seed processing line	109
How to start and operate a seed processing line	115
Lubrication and maintenance	121
Adjustment of the gravity separator	125
<b>Exercise 8</b>	<b>129</b>
<b>9. Seed treatment</b>	<b>131</b>
General remarks on seed treatment	131
Composition of a chemical treatment	133
Methods of seed treatment	134
Dry treatment	134
Liquid treatment	134
Slurry treatment	135
Seed-coating	137
Fundamental rules of seed treatment	137
Methods, equipment and machines for seed treatment	139
Methods, equipment and machines used in dry treatment	139
Methods, equipment and machines used in liquid and slurry treatment	143
<b>Exercise 9</b>	<b>145</b>

<b>10. Weighing and bagging seed</b>	<b>147</b>
Weighing	147
Bagging	149
<b>Exercise 10</b>	<b>149</b>
<b>Summary of Part II</b>	<b>153</b>
<b>Photo credits</b>	<b>154</b>
<b>References and further reading</b>	<b>155</b>
