

Eucalypts for planting

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS
Rome 1979

Cosilents

FOREWORD.	v
NOTE ON NOMENCLATURE.	vii
ACKNOWLEDGEMENTS.	viii
1. The life environment.	1
Limits of natural occurrence of the genus.	1
The Australian land form.	3
Australian climatic conditions.	4
Zones of summer rainfall.	4
Zones of uniform rainfall.	6
Zones of winter rainfall.	7
Alpine zone.	11
Australian soils.	11
Australian forest types.	12
Closed forest.	12
Open forests.	13
Local empirical terminology.	14
2. Growth characteristics.	15
Defensive growth mechanisms.	16
Colonizing ability.	16
Subterranean protective organs.	16
Aggressive mechanisms which permit rapid growth.	22
Indefinite shoots and naked buds.	22
Accessory buds.	22
Epicormic buds.	23
Structure of the "crown unit".	25
Branch shed.	25
The trunk.	27

3. Sysletnatics		30			
Early taxonomic classification		30			
The work of Eentham		30			
The work of Maiden and Blakely		31			
Recent taxonomic research		32			
The work of Pryor and Johnson		32			
Botanical characteristics of the eucalypts		35			
Bark		35			
Leaves		40			
The inflorescence		43			
Fruits		47			
Seed		48			
4. Eucalypts as plantation trees		51			
AREA REPORTS		51			
Algeria	51	Iran	35	Rwanda	121
Angola	52	Iraq	85	Senegal	122
Argentina	54	Ireland	85	Sierra Leone	122
Australia	57	Israel	86	South Africa,	
Bolivia	57	Italy	89	P.epublic of	122
Brazil	57	Ivory Coast	92	Spain	126
British Solomon		Jaolan	92	Sri Lanka	152
Islands	61	Jordan	92	Sudan	133
Brunei	65	Kenya	92	Swaziland	134
Burundi	56	Kuwait	94	Tanzania	134
Cameroon	67	Lebanon	94	Trinidad	
Chad	67	Lesotho	94	and Tobago	134
ChMe	67	Libya	94	Tunisia	134
China	69	Madagascar	95	Turkey	135
Colombia	69	Malawi	99	Uganda	135
Comoro Islands	71	Malaysia	104	United	
Congo	72	Mali	104	Kingdom	136
Costa Rica	72	Malta	104	United States	137
Cuba	73	Mauritius	104	Upper Voita	139
Cyprus	73	Mexico	104	Uruguay	139
Dominican		Morocco	105	Union of Soviet	
Republic	73	Mozambique	107	Socialist	
Ecuador	74	Nepal	108	Republics	140

5. Establishment and Management of poplar plantations	145
Seed	146
Collection and purchase	146
Storage	147
Dormancy	147
Treatment prior to sowing	147
Methods of raising seedlings	147
Container-raised stock	150
Bare-rooted stock	150
Nursery management	151
Management for container-raised plants	151
Management for bare-rooted stock	162
Establishment techniques	163
Clearing	164
Preparing the ground	165
Initial spacing	166
Planting procedure	167
Management of coppice crops	171
General comment	171
Early treatment	171
Felling the first crop	172
Mechanism of coppicing	173
Effect of season of felling	173
Height of stool	173
Stump diameter	176
Number of rotations	176
Treatment of sile between crops	177
Reducing number of coppice shoots	177
Killing old stumps	178
Thinning plantations	179
Mini-rotations; silage harvesting	180
6. Farm plantations, shelterbelts and ornamental plantings	181
Farm plantations	181
Farm parks	182
Shelterbelts	184
Roadside plantings	187
Ornamentals	187
7. Tree improvement	139
Factors that affect tree improvement	189
Provenances	190
Modes of reproduction	191

Possible breeding strategies	195
Species and provenance selection	136
Selection and management of seed stands	197
Individual selection	197
Progeny and dorsal testing	200
Seed orchards	201
Controlled crossing	203
Mass production by vegetative propagation	204
Predicted gains from tree-improvement programmes	205
8. Fire protection	206
Fire prevention	206
Roads as part of the firebreak system	206
Road standards	207
The firebreak system	207
Attacking facilities	208
Preparing loads and firebreaks	208
Detection and communication systems	209
Fire suppression	213
Attacking equipment	213
Slash-burning and control-burning: pro and con	214
9. Diseases, pests and disorders	215
Diseases	217
Root and butt diseases	217
Stem diseases including systemic infections	222
Leaf diseases	228
Heart and butt rots	229
Mycorrhiza	231
Damage by weeds and strangling vines	232
Insect pests	232
Seed-attacking insects	233
Nursery pests	233
Defoliating insects	233
Sap suckers	235
Park beetles and wood-borers	236
Termites and ant colonies	238
Other animal pests	241
Lower forms of animal life	241
Browsing mammals and palatability	241
Crown-feeding mammals	241
Disorders from inorganic causes	242
Mineral deficiencies	242

Mineral excesses	243
Other soil a&fects	245
Disorders caused by climate	245
Air pollution	246
Gum veins; gummosis	246
10. Utilization	247
Harvesting, planning	247
Working conditions	248
Economic parameters	249
Employment questions	249
Time planm-ig	249
Harvesting: operations	249
Felling	249
Trimming and topping	250
Debarking	251
Gosscutting	251
Skidding and forwarding	251
Road transport	252
Seasoning	254
Principles oil drying and seasoning	254
Air-seasoning	255
Kiln-seasoning	255
Special problems	256
Collapse- and reconditioning	257
Preservation	258
General	258
Hazards	261
Mode of penetration	261
Acceptable preservatives	262
Treatment processes	264
Standard pressure treatments	266
Preparation for treatment	262
Preservative retention	268
Trtatability of various species	269
Choice of treatment	271
Uses for energy	271
Changing attitudes	271
Fueiwood	273
Charcoal	274
Uses in building and construction	275
The raw material	275
Pvoudwccd	279
Sawnwood	281
Laminated wood	285

Hewn wood	235
Wood-based panels	235
Pulp aiici paper	2S8
Other products	290
Honey	290
Essential oils	294
Tannin	296
Other chemicals	296
Liqueurs	296
11. Yields	297
The importance of measurement and estimate of yield	297
Single-tree growth: volume tables	298
Solid volume or stacked volume	298
Branchwood	298
Stump volume	298
Top diameter	299
Bark	300
Form factors	302
Height growth as a measme of site quality	306
Yield tables	308
Other data on yield, for certain species	31.1
Coppice yield	313
Yield in thinned plantations	314
Weight yield	314
Biomass	314
Factors affecting yield	315
Site	315
Species	315
Provenance	316
Silvicultural treatment	316
Pests and diseases	316
Interaction	316
12. Costs of establishment and returns from eucalypt plantations ..	317
Tabulated establishment costs	317
Factors affecting establishment costs	317
Clearing of woody vegetation	317

Grass.	317
Slope.	324
Special site deficiencies.	324
Returns	324
Comparing costs and returns, determining profitability.	324
Effect of coppice rotations.	327
Selected examples.	328
Spain — <i>pulpwood</i>	328
Zambia — <i>sawntimber</i>	329
Sri Lanka — <i>pulpwood and sawntimber</i>	329
Israel — <i>fibre- and particle-board</i>	331
Nigeria — <i>fuelwood and poles</i>	332
British Solomon Islands — <i>line planting</i>	333
Upper Volta — <i>direct costs</i>	334
Malawi — <i>fuelwood and poles</i>	335
Papua New Guinea — <i>pulpwood</i>	336
13. Choice of species for planting	337
Matching species to site and climate.	338
Edaphic factors.	339
Tolerance of periodic flooding	339
Tolerance of periodic salinity.	340
Tolerance of calcareous soils.	340
Climatic factors	341
Drought resistance.	341
Adaptability	343
Resistance to cold	347
Quick reference tables	354
14. Species monographs	355
<i>Eucalyptus accedens</i>	
W.V. Fitzg.	356
<i>E. acmenoides</i> Schau.	357
<i>E. alba</i> Reinw. ex Bl.	358
<i>E. andrewsii</i> Maid	359
<i>E. asiringens</i> (Maid.) Maid.	360
<i>E. blakelyi</i> Maid. var.	
<i>blakelyi</i>	362
<i>E. bosistoana</i> F. Muell.	363
<i>E. botryoides</i> Sm	364
<i>E. brassiana</i> S.T. Blake	365
<i>E. bridgesiana</i> R.T. Bak.	366
<i>E. brockwayi</i> C.A. Gardn.	367
<i>E. calophylla</i> R. Br.	368
<i>E. camalclulensis</i> Dehnh. var.	
<i>camaldulensis</i>	369
<i>E. cinerea</i> F. Muell.	
ex Benth.	381
<i>E. citriodora</i> Hook f	382
<i>E. cladocalyx</i> F. Muell.	384
<i>E. cloeziana</i> F. Muell.	385
<i>E. cornuta</i> Labill	386
<i>E. crebra</i> F. Muell	387
<i>E. cypellocarpa</i> L. Johnson	388

<i>E. dairympleana</i> Maid.		<i>E. monnifera</i> Mudie subsp.	
subsp. <i>dairynipleana</i>	v39	<i>mannifeia</i>	445
<i>E. dcanei</i> Maid	390	<i>E. mar^oinata</i> Dcnn. ex 3m.	445
<i>E. deglv.pta</i> Bl	391	<i>E. mdanophioia</i> F. Muell.	446
<i>E. delsgalensis</i> R T. Bak.	395	<i>E. mel.Uodora</i> A. Cunn. ex	
<i>E. diversicclor</i> F. Muell.	397	Schau	447
<i>E. dives</i> Schai>.	397	<i>E. microcorys</i> F. Muell.	450
<i>E. drepanophylla</i> F. Mueli.		<i>E. microtheca</i> F. Muell.	451
ex Benth	398	<i>E. miniata</i> A. Cunn. ex	
<i>E. dur-d.asii</i> Maid	399	Schau	452
<i>E. dunnii</i> Mwcx.	400	<i>E. moluccana</i> P.oxb	453
<i>E. elata</i> Dehnh.	401	<i>E. muellerana</i> Hov/itt	454
<i>E. eryihrcorys</i> F. Muell.	402	<i>E. nesophila</i> Elakely	455
<i>E. eugerdoides</i> Sieb.		<i>E. miens</i> (Deane "i Maid.)	
ex Sprang	403	Maid	436
<i>E. exserta</i> F. Muell.	404	<i>E. obliqua</i> L'Herit	457
<i>E. fastigaia</i> De?.ne & Maid.	405	<i>E. occidentalis</i> Endl.	459
<i>E. ftcifoUa</i> F. Muell.	^07	<i>E. eleesa</i> F. Muell. ex Miq	460
<i>E. flockfoniae</i> (Maid.) Maid.	40S	<i>E. oreades</i> R.T. Bak.	461
<i>E. jor^estiar.a</i> Diels subsp.		<i>E. cvata</i> Labiil	462
for>-esua:ia	408	<i>E. pnciculata</i> Sm	463
<i>E. jraxinoides</i> Deane &		<i>E. patens</i> Benth	464
Maid	409	<i>E. pauciflora</i> Sieb. ex Spreng.	
<i>E. glaucescens</i> Maid. &		subsp. <i>pauciflora</i>	465
Btekely.	410	<i>E. pellita</i> F. Muell.	466
<i>E. globuh's</i> Labill. subsp.		<i>E. oilulans</i> Sm	467
<i>bico.itata</i>	411	<i>E. po'Lyanthemos</i> Schau.	468
<i>E. globulus</i> Labiil. subsp.		<i>E. polybractea</i> R.T. Bak.	469
<i>globulus</i>	412	<i>E. populnea</i> F. Muell.	470
<i>E. globith's</i> Labiil. subsp.		<i>E. propinqua</i> Deane & Maid.	
<i>maidenii</i> (F. Muell.) Kirkp.	419	var. <i>propinqua</i>	471
<i>E. gomphocephala</i> DC.	420	<i>E. pulchella</i> Desf	471
<i>E. grandis</i> Hill ex Maid.	422	<i>E. pulverulenia</i> Sims	472
<i>E. gummifera</i> (Sol. ex		<i>E. punctata</i> DC. var.	
Gaertn.) Hoclu.	433	<i>punctata</i>	473
<i>E. gunnli</i> Hook, f	434	<i>E. pyriformis</i> Turcz.	474
<i>E. intertexta</i> R.T. Bak.	434	<i>E. rodiate</i> Sieb. ex DC.	
<i>E. jacksonii</i> Maid	435	subsp. <i>radiate</i>	475
<i>E. laevopinea</i> R.T. Bak.	436	<i>E. radiata</i> Sieb. ex DC.	
<i>E. largiflorens</i> F. Muell.	437	subsp. <i>robertsonii</i> (Blakely)	476
<i>E. lehmannil</i> (Schau.) Benth.	438	<i>E. raveretiana</i> F. Muell.	476
<i>E. leucoxylon</i> F. Muell. var.		<i>E. regnans</i> F. Muell	477
<i>leucoxylon</i>	439	<i>E. resinifera</i> Sir.	473
<i>E. longifolia</i> Link & Otto	439	<i>E. robust a</i> Sm.	4S1
<i>E. macarthurii</i> Deane &		<i>E. rudis</i> Endl.	483
Maid	440	<i>E. scdigna</i> Sm	484
<i>E. macwrkyncha</i> F. Muell.		<i>E. salmonophloia</i> F. Muell.	485
ex Benth. subsp. <i>macro-</i>		<i>E. salubris</i> F. Muell.	488
<i>rhyncha</i>	441	<i>E. sargentii</i> Maid.	4S9
<i>E. maculate</i> . Hook, f	442	<i>E. side.cxylon</i> A. Cunn. e::	
		Wool Is subsp. <i>sideroxylcn</i>	490

<i>E. sie'oei</i> L. Johnson	491	<i>E. lorquala</i> Luehm.	501
<i>E. smitlvi</i> R.T. Bak	492	<i>E. transccntinen'alis</i> Maid	502
<i>E. s'aigerana</i> F. Muell. ex. F.M. Bail	493	<i>E. urnigera</i> Hook, f.	502
<i>E. s'cotei</i> C.A. Ga<dti.	494	<i>E. urophylla</i> S.T. Blake . . .	503
<i>E. tereticornis</i> Sm.	494	<i>E. vinrinaliz</i> L?'oil!	506
<i>E. tesseliaris</i> F. Muell.	498	<i>E. wandoo</i> Blakely	507
<i>E. teirodonta</i> F. Musll.	499	<i>E. woollsiana</i> R.T. Bak. (inch <i>E. inicroccrpd</i>)	508
<i>E. iorel liana</i> F. Muell	500	Brief notes on minor species	50?

Appendixes.	517
---------------------	-----

1. Climatic tables for Australia	517
1'. Comparative volume tables and form factors.	529
3. Examples of yield tables.	533
4. Quick reference tables of species characteristics and climatic requirements.	556
5. Area of euca'yot plantations.	581
6. Calculating profitability of plantations.	586
7. Illustrations of buds and fruits.	589
". Comparative climodiagrams.	610

Glossary.	614
