Contents

List of authors and contributors to EMEP assessment Part I	vii
Preface.....	ix
Executive Summary	1
Chapter 1: Introduction and background	9
1.1 Historical background of EMEP.....	9
1.2 Organisation of the EMEP programme.....	10
1.3 The convention and the protocols.....	10
1.3.1 Acidification.....	11
1.3.2 Eutrophication.....	11
1.3.3 Photochemical ozone formation.....	12
1.3.4 Heavy metals.....	12
1.3.5 Persistent organic pollutants.....	12
1.4 The EMEP assessment.....	13
1.5 References.....	13
Chapter 2: Sulphur	15
2.1 Emissions of sulphur to the atmosphere.....	15
2.1.1 The situation in Europe around 1980.....	15
2.1.2 Sources of sulphur emissions to the atmosphere.....	16
2.1.3 Sulphur emissions in Europe 1980-2000.....	16
2.1.4 Achieved emission situation in 2000.....	20
2.2 Concentrations of sulphur in air and precipitation.....	22
2.2.1 Sulphur pollution over Europe in 1980 ..	22
2.2.2 Concentrations of sulphur dioxide in air.....	24
2.2.3 Concentrations of sulphate particles in air.....	31
2.2.4 Concentrations of sulphate particles in precipitation.....	35
2.2.5 Sulphur deposition.....	37
2.3 What has been achieved during 25 years? The need for further reduction of sulphur pollution.....	42
2.3.1 Changes in risks for health effects.....	43
2.3.2 Changes in risks for vegetation damages.....	43
2.3.3 Changes in risks for material deterioration.....	44
2.3.4 Changes in deposition and effects of acidification.....	44
2.3.5 Further need of reductions ..!	44
2.4 Conclusions for the trends of sulphur pollution in the environment.....	44
2-5 References.....	45

Chapter 3:	Nitrogen oxides.....	47
	3.1 Emissions of nitrogen oxides to the atmosphere.....	47
	3.1.1 <i>The situation in Europe around 1980</i>	47
	3.1.2 <i>Sources of nitrogen emissions to the atmosphere</i>	48
	3.1.3 <i>Time series for nitrogen oxides emissions 1980 - 2000</i>	48
	3.1.4 <i>Progress in emission reduction</i>	51
	3.2 Oxidised nitrogen compounds in air and precipitation.....	52
	3.2.1 <i>Nitrogen oxides pollution in Europe during the 1980s</i>	52
	3.2.2 <i>Time series of nitrogen dioxide in air</i>	54
	3.2.3 <i>Concentrations of total nitrate in the air</i>	57
	3.2.4 <i>Nitrate in precipitation</i>	58
	3.2.5 <i>Trends in wet deposition of nitrate</i>	58
	3.2.6 <i>Dry and total deposition of oxidised nitrogen</i>	59
	3.3 What has been achieved during 25 years? Need for further reduction of nitrogen oxides pollution.....	60
	3.4 Conclusions for the time series of nitrogen oxides pollution in the environment.....	61
	3.5 References.....	62
Chapter 4:	Ammonia	63
4.1	Emissions of ammonia.....	63
	4.1.1 <i>Ammonia emissions</i>	63
	4.1.2 <i>Emission trend for ammonia 1980 - 2000</i>	64
4.2	Trends in concentrations of ammonium in air and precipitation.....	67
	4.2.1 <i>Ammonium pollution in the 1980s</i>	67
	4.2.2 <i>Trends in ammonium in air</i>	67
	4.2.3 <i>Trends in Ammonium in precipitation</i>	68
	4.2.4 <i>Deposition of ammonium</i>	69
4.3	What has been achieved during 25 years? Need for further reduction of ammonia.....	70
4.4	Conclusions for the time series of ammonia pollution in the environment.....	71
4.5	References.....	72
Chapter 5:	Base cations.....	73
	5.1 Base cations and their role to counteract acidification.....	73
	5.2 Emissions of base cations.....	73
	5.3 Base cations in air.....	74
	5.4 Base cations in precipitation.....	74
	5.5 Conclusions on base cations.....	74
	5.6 References.....	75

Chapter 6:	Ozone	77
6.1	The oxidant formation process and its long range transport.....	77
6.2	Emissions of ozone precursors to the atmosphere.....	78
6.3	Critical levels.....	81
6.4	Concentrations of ozone in air.....	82
	6.4.1 <i>Exceedance of the thresholds for vegetation</i>	85
	6.4.2 <i>Results from other ozone assessments</i>	88
6.5	Trends in ozone.....	89
	6.5.1 <i>Global and hemispheric trends</i>	90
	6.5.2 <i>Trends in measured ozone concentrations in Europe</i>	90
	6.5.3 <i>Calculated trends of ozone in Europe</i>	96
6.6	Implications of increased background concentrations.....	100
6.7	Conclusions and implications	102
	Acknowledgement.....	103
	References.....	103
Chapter 7:	Heavy metals	107
7.1	Introduction.....	107
7.2	Emissions of heavy metals.....	107
	7.2.1 <i>Emissions of lead</i>	108
	7.2.2 <i>Emissions of cadmium</i>	109
	7.2.3 <i>Emissions of mercury</i>	110
	7.2.4 <i>Discussion</i>	111
7.3	Heavy metal pollution levels.....	111
	7.3.1 <i>Pollution levels of lead</i>	112
	7.3.2 <i>Pollution levels of cadmium</i>	116
	7.3.3 <i>Pollution levels of mercury</i>	120
	7.3.4 <i>Special issues</i>	125
7.4	Conclusions.....	126
7.5	References.....	127
Chapter 8:	Persistent organic components	129
8.1	Introduction.....	129
8.2	Emissions of POPs.....	130
	8.2.1 <i>Emissions of PAHs</i>	131
	8.2.2 <i>Emissions of PCDD/Fs</i>	132
	8.2.3 <i>Emissions of PCBs</i>	133
	8.2.4 <i>Emissions of γ-HCH</i>	133
	8.2.5 <i>Discussion</i>	134
8.3	Pollution by POPs.....	135
	8.3.1 <i>Pollution by polyaromatic hydrocarbons</i>	136
	8.3.2 <i>Pollutions by polychlorinated dibenzo(p)dioxins and dibenzofurans (PCDD/Fs)</i>	139
	8.3.3 <i>Pollution by polychlorinated biphenyls (PCBs)</i>	141
	8.3.4 <i>Pollution by γ-Hexachlorocyclohexane (γ-HCH)</i>	143
8.4	Conclusions.....	147
8.5	References.....	147

Chapter 9:	Particles in the air	151
	9.1 Particles and their long-range transboundary nature. The situation around 1980s.....	151
	9.2 Emissions of particles.....	151
	9.3 Particles in European air.....	153
	9.4 Need for further work on particle pollution.....	157
	9.5 Conclusions.....	157
	9.6 References.....	157
Chapter 10:	The role of the EMEP monitoring network and EMEP results	159
	10.1 What have we learnt from the EMEP measurements during 25 years?.....	159
	10.2 EMEP results as a basis for environmental assessments and policy processes.....	160
	10.3 How can EMEP data help us understand the outcome of reductions done and the need for further abatement?.....	161
	10.4 Future need for emission decreases and potential difficulties. . . .	175
	10.5 The future of EMEP monitoring and modeling.....	166
	10.6 References.....	168
Appendix:	A proposed new statistical method for analysing the trends in measured concentration data at EMEP monitoring sites	169
	A.1 Introduction.....	169
	A.2 Basic ideas for detecting discontinuities.....	170
	A.3 Finding discontinuities in practice.....	170
	A.4 Modelling Trends.....	174
	A.5 Conclusions.....	176
	Acknowledgements.....	177
	Reference.....	177

Contents

Preface	v
List of contributing authors	vii
National Contributions:	
<i>Austria:</i> National Assessment - Austria W. Spangl.....	1
<i>Belarus:</i> EMEP Assessment Report - Belarus S. Kakareka.....	11
<i>Croatia:</i> National Assessment - Croatia S. Vidic.....	21
<i>Czech Republic:</i> EMEP Assessment Report - Czech Republic M. Vana, K. Dejmál, P. Machálek and I. Holoubek.....	39
<i>Denmark:</i> EMEP Assessment Report - Denmark N.Z. Heidam and IB. Illerup.....	49
<i>Estonia:</i> Estonian EMEP Assessment Report K. Pajuste, V. Kimmel, N. Kohv and T. Truuts.....	63
<i>Finland:</i> Assessment Report on the Finnish EMEP data 1980 - 2000 T. Ruoho-Airola, P. Anttila, J.-P. Tuovinen and T. Salmi.....	71
<i>France:</i> EMEP Assessment Report: French national contribution P. Coddeville, B. Oudart, N. Poisson, M. Rico and L. Rouil.....	85
<i>Germany:</i> EMEP Assessment Report Contribution from Germany M. Wallasch.....	97
<i>Italy:</i> Assessment Report, National Contribution of Italy C. Perrino and J.-P. Putaud.....	109
<i>Latvia:</i> Assessment Report on the Latvian EMEP data 1985 - 2000 I. Lyulko, M. Frolova, I. Indriksone and P. Berga.....	121

National Contributions:

<i>Lithuania:</i> EMEP Assessment Report - Lithuania D. Sopauskiene and D. Jasineviciene.....	133
<i>Netherlands:</i> The Netherlands contribution to the EMEP air quality assessment report Pieter Hammingh.....	145
<i>Norway:</i> National Assessments Norway J. Schaug, S. Soberg, K. T0rseth, K. Barrett, L. Hole and W. Aas.....	157
<i>Poland:</i> EMEP Assessment Report Poland G. Mitosek, A. Degorska, J. Iwanek, G. Przybylska and K. Skotak.....	175
<i>Slovak Republic:</i> EMEP Assessment Report - Slovak Republic M. Mitosinkova, D. Zavodsky, K. Mareckova and K. Pukancikova.....	189
<i>Spain:</i> Spanish EMEP Assessment Report M. Fernandez, A. Gonzalez and R. Javato.....	199
<i>Sweden:</i> Trends in Swedish background air 1980 - 2000 G. Lovblad, E. Henningsson, K. Sjoberg, E. Brorstrom-Lunden, A. Lindskog and J. Munthe.....	211
<i>Switzerland:</i> EMEP Assessment Report - Switzerland R. Ballaman,;B.Buchmann, R. Gehrig and R. Weber.....	221
<i>United Kingdom:</i> United Kingdom Contribution to the EMEP assessment 2004 R. Fowler, R. I. Smith, and J. Muller.....	233
