
HARDY PERENNIAL PLANTS

including ALPINES

ALAN BLOOM

floraprint*

Preface	4	Plants for Specific Purposes	229-245
Adaptability	6	Perennials - for dry soils	230
Hardiness	7	Perennials - for moist/wet soils	230
The Fascination of Variety	8	Ornamental grasses - for moist/wet soils	231
Ways and Means	9	Flowering bulbs - for moist/wet soils and inclusion amongst perennials	231
Garden-worthiness	9	Perennials - grouped by colour	231-233
Guidelines for Success	10	Planting density - number of plants per square metre	232-233
Perennial Beds or Borders - the Choice	10	Perennials - grouped by flowering time	234-236
The Height/Width factor	11	Perennials - early flowering	234
Sites, Shapes and Sizes	11	Perennials - late flowering	235
Making the best of a one-sided Border	12	Perennials - flowering twice in a season	236
Perennials in Shade	13	Perennials - flowering again after being cut back	236
Renovating an old Border	14	Half-hardy shrubs - treated as perennials	236
Propagation	15	Perennials - as specimen plants	237
Making Selections	16	Perennials - tall varieties suitable for screening	237
Winter Protection for Tender Plants	17	Perennials - attractive forms (even out of flower)	237
Hardy Perennial Plants including Alpines	19-228	Perennials - grey/ornamental foliage	237
		Ferns	237
		Ornamental grasses	237
		Perennials - ground covering	238
		Perennials - evergreen	238
		Perennials - for Autumn planting	239
		Perennials - for any position	239
		Perennials - for sunny positions	239
		Perennials - for sunny and half-shaded positions	240
		Perennials - for half-shaded and shaded positions	240
		Perennials - attractive to butterflies and other insects	241
		Perennials - for limy soils	241
		Perennials - for acid soils (lime-haters)	241
		Perennials - where rabbits are a problem	241
		Alpines - for the rock garden	242
		Perennials and Alpines - on walls and between stones	242
		Perennials - for dried floral use	242
		Perennials - needing support	242
		Perennials - for troughs, tubs and pots	242
		Perennials - heavily spreading or self-seeding types	243
		Perennials - for easy propagation	243-245
		Perennials - for cut flower	244
		Perennials - scented	245
		Perennials - climbing	245
		Perennials - for the kitchen	245
		Index	246-252

* With the advent of wider European interest, extra plant groups have been included in addition to Alan Bloom's own selection. These are marked throughout by an asterisk*. All text for these extra groups, the colour panels and the picture captions are by the publisher.
