

# SOURCES AND EFFECTS OF IONIZING RADIATION

United Nations Scientific Committee on the  
Effects of Atomic Radiation

UNSCEAR 2008  
Report to the General Assembly  
with Scientific Annexes

VOLUME I

UNITED NATIONS  
New York, 2010

# CONTENTS

	<i>Page</i>
<b>VOLUME I: SOURCES</b>	
Report of the United Nations Scientific Committee on the Effects of Atomic Radiation to the General Assembly .....	1
<b>Scientific Annexes</b>	
Annex A. Medical radiation exposures .....	21
Annex B. Exposures of the public and workers from various sources of radiation .....	221
<b>VOLUME II: EFFECTS</b>	
Annex C. Radiation exposures in accidents	
Annex D. Health effects due to radiation from the Chernobyl accident	
Annex E. Effects of ionizing radiation on non-human biota	

# Report of the United Nations Scientific Committee on the Effects of Atomic Radiation to the General Assembly

## Contents

	<i>Page</i>
I. Introduction .....	1
II. Deliberations of the United Nations Scientific Committee on the Effects of Atomic Radiation at its fifty-sixth session. ....	1
III. Strategic plan and programme of work of the Committee .....	2
IV. Scientific report .....	3
A. Sources of radiation exposure .....	5
B. Chernobyl accident .....	15
C. Effects on non-human biota .....	18
Appendices	
I. Members of national delegations attending the fiftieth to fifty-sixth sessions of the United Nations Scientific Committee on the Effects of Atomic Radiation, at which the 2008 scientific report was elaborated .....	19
II. Scientific staff and consultants cooperating with the United Nations Scientific Committee on the Effects of Atomic Radiation in the preparation of the 2008 scientific report of the Committee .....	20

## ANNEX A

### MEDICAL RADIATION EXPOSURES

#### CONTENTS

	<i>Page</i>
MEDICAL EXPOSURE TO IONIZING RADIATION .....	23
I. INTRODUCTION .....	23
II. SCOPE AND BASIS FOR THE ANALYSIS .....	23
III. MEDICAL RADIATION EXPOSURE .....	24
IV. METHODOLOGY AND SOURCES OF DATA .....	24
V. ASSESSMENT OF GLOBAL PRACTICE .....	25
A. Diagnostic radiology .....	25
B. Nuclear medicine .....	28
C. Radiation therapy .....	30
VI. IMPLICATIONS FOR THE FUTURE ANALYSIS OF MEDICAL EXPOSURES .....	30
VII. SUMMARY AND CONCLUSIONS .....	31
APPENDIX A: METHODOLOGY FOR ESTIMATING WORLDWIDE MEDICAL EXPOSURES .....	37
I. INTRODUCTION .....	37
II. METHODOLOGY FOR ANALYSIS OF DOSIMETRY IN DIAGNOSTIC AND INTERVENTIONAL RADIOLOGY .....	38
A. Projection radiography .....	42
B. Fluoroscopy .....	43
C. Mammography .....	44
D. CT dosimetry .....	44
E. Dental panoramic tomography .....	46
F. Dual-energy absorptiometry .....	46
III. METHODOLOGY FOR ANALYSIS OF DOSIMETRY IN NUCLEAR MEDICINE .....	46
A. Dosimetric approaches .....	46
IV. METHODOLOGY FOR ANALYSIS OF DOSIMETRY IN RADIATION THERAPY .....	47
APPENDIX B: LEVELS AND TRENDS OF EXPOSURE IN DIAGNOSTIC RADIOLOGY .....	49
I. SUMMARY FROM UNSCEAR 2000 REPORT .....	49
II. DOSES FOR SPECIFIC X-RAY PROCEDURES .....	50
A. Diagnostic radiography .....	50
B. Mammography .....	50
C. Fluoroscopy and angiography .....	51
D. Interventional radiology .....	51
E. Interventional cardiology .....	53

	<i>Page</i>
F. Computed tomography .....	53
G. Dental radiology .....	55
H. Bone mineral densitometry and dual-energy X-ray absorptiometry .....	56
III. DOSES FOR SPECIFIC POPULATIONS .....	56
A. Paediatric patients .....	56
B. Foetal dosimetry .....	57
IV. TRENDS .....	58
A. Trends in practice .....	58
B. Trends in patient doses .....	62
C. Survey results .....	62
V. SUMMARY .....	68
APPENDIX C: LEVELS AND TRENDS OF EXPOSURE IN NUCLEAR MEDICINE .....	139
I. INTRODUCTION .....	139
II. ANALYSIS OF PRACTICE .....	141
III. DOSES FOR SPECIFIC NUCLEAR MEDICINE PROCEDURES .....	142
A. Diagnostic uses .....	142
B. Therapeutic uses .....	143
IV. DOSES FOR SPECIFIC POPULATIONS .....	144
A. Paediatric patients .....	144
B. Foetal dosimetry .....	144
C. The breast-feeding infant .....	144
V. SURVEY .....	145
VI. SUMMARY .....	145
APPENDIX D: LEVELS AND TRENDS IN THE USE OF RADIATION THERAPY .....	169
I. INTRODUCTION .....	169
II. TECHNIQUES .....	170
III. SUMMARY FROM THE UNSCEAR 2000 REPORT .....	175
IV. DOSIMETRIC APPROACHES .....	175
V. ANALYSIS OF PRACTICE .....	177
A. Frequency of treatments .....	177
B. Exposed populations .....	178
C. Doses from treatments .....	178
D. Assessment of global practice .....	179
VI. TRENDS IN RADIATION THERAPY .....	180
A. Teletherapy .....	180
B. Brachytherapy .....	181
C. Other modalities .....	181
VII. ACCIDENTS IN RADIATION THERAPY .....	183
VIII. SUMMARY .....	184
References .....	199

## ANNEX B

### EXPOSURES OF THE PUBLIC AND WORKERS FROM VARIOUS SOURCES OF RADIATION

#### CONTENTS

	<i>Page</i>
INTRODUCTION .....	223
I. DOSE ASSESSMENT ISSUES .....	225
A. Public exposure .....	225
B. Occupational exposure .....	226
C. Special quantities for radon .....	228
II. PUBLIC EXPOSURE .....	229
A. Natural sources .....	229
1. Cosmic radiation .....	229
2. Terrestrial radiation .....	233
3. Summary of the exposures to natural sources .....	236
B. Enhanced sources of naturally occurring radioactive material .....	237
1. Metal mining and smelting .....	237
2. Phosphate industry .....	237
3. Coal mining and power production from coal .....	238
4. Oil and gas drilling .....	239
5. Rare earth and titanium oxide industries .....	239
6. Zirconium and ceramics industries .....	240
7. Applications of radium and thorium .....	241
8. Other exposure situations .....	241
9. Summary on exposure to enhanced NORM .....	242
C. Use of man-made sources for peaceful purposes .....	242
1. Nuclear power production .....	242
2. Transport of nuclear and radioactive material .....	249
3. Applications other than nuclear power .....	252
4. Summary on exposure due to peaceful uses of man-made sources of radiation .....	255
D. Use of man-made sources for military purposes .....	255
1. Nuclear tests .....	255
2. Residues in the environment .....	262
E. Historical situations .....	276
F. Exposure from accidents .....	277
G. Summary on public exposure .....	277
III. OCCUPATIONAL RADIATION EXPOSURE .....	279
A. Assessment methodology .....	280
1. Dose recording .....	280
2. Characteristics of dose distributions .....	280
3. Estimation of worldwide exposures .....	281

	<i>Page</i>
B. Natural sources of radiation . . . . .	281
1. Cosmic ray exposures of aircrew and space crew . . . . .	282
2. Exposures in extractive and processing industries . . . . .	284
3. Gas and oil extraction . . . . .	287
4. Radon exposure in workplaces other than mines . . . . .	288
5. Conclusions on occupational exposure to natural sources of radiation . . . . .	289
C. Man-made sources for peaceful purposes . . . . .	290
1. Nuclear power production . . . . .	290
2. Medical uses of radiation . . . . .	300
3. Industrial uses of radiation . . . . .	309
4. Miscellaneous uses . . . . .	315
D. Man-made sources for military purposes . . . . .	317
1. Other exposed workers . . . . .	319
E. Summary on occupational exposure . . . . .	319
CONCLUSIONS ON PUBLIC AND WORKER EXPOSURE . . . . .	322
TABLES . . . . .	325
FIGURES . . . . .	379
