

# **Diploma Thesis**

**Titel of the thesis**

**"Synthesis, Structure, Spectroscopic Properties and  
Antiproliferative Activity of  $[\text{Os}^{\text{IV}}\text{Cl}_5(\text{azole})]^-$ "**

**Author**

**Gabriel E. Buchel**

**Aspired academic degree**

**Magister rerum naturalium (Mag. rer. nat.)**

**Vienna, 2009**

**Study code: A419**

**Branch of study: Chemistry**

**Adviser: Ao. Univ.-Prof. Dr. Vladimir B. Arion**

# Table of Contents

1 Abstract	6
2 Introduction	7
3 Categorization of Metals in Medicine	8
3.1 Radiopharmaceuticals	8
3.2 Diagnostic Agents	8
3.3 Essential Elements and Mineral Supplements	9
3.4 Chelation Therapy	9
3.5 Therapeutic Agents	10
4 Categorization of Metal Anticancer Compounds	10
4.1 Functional Compounds	10
4.2 Structural Compounds	12
4.3 Metal Ions as Carriers of Active Ligands	12
4.4 Metal Complexes that Behave as Catalysts	13
4.5 Photoactive Metal Compounds	14
5 Platinum	14
5.1 Mechanisms of Action	16
6 Ruthenium	17
6.1 Mechanisms of Action	18
7 Osmium	20
7.1 Osmium-chlorido-azole Compounds	21
8 Anderson Rearrangement	23
9 Publication Biichel et al.	25
10 Supplementary Information to Biichel et al.	55
11 Abstract (German)	67
12 Table of Figures	68
13 Abbreviations	68
14 Used Symbols and Constants	70
14 Chemicals	71
15 Curriculum Vitae	72
