

## Dissertation

Title of the dissertation

**"Novel ruthenium nitrosyl complexes with azole heterocycles  
and osmium(IV) analogues of KP1019 as potential anticancer  
drugs. "**

Author

**Mag. Gabriel E. Buchel**

Aspired academic degree

**Doctor rerum naturalium (Dr. rer. nat.)**

Vienna, July 2012

Study code: A419

Branch of study: Chemistry

Adviser: Ao. Univ.-Prof. Dr. Vladimir B. Arion

# Table of Contents

<b>1. Introduction</b>	<b>18</b>
<b>2. Why Do People Die?</b>	<b>20</b>
<b>3. Cancer</b>	<b>25</b>
<b>3.1. Cancer Epidemiology</b>	<b>26</b>
<b>3.2. Carciogenesis</b>	<b>28</b>
<b>3.3 Mutagens</b>	<b>30</b>
<b>3.3.1. Chemical Mutagens</b>	<b>30</b>
<b>3.3.2. Physical Mutagens</b>	<b>31</b>
<b>3.3.3. Biological Mutagens</b>	<b>32</b>
<b>3.4 Therapeutic Approaches</b>	<b>32</b>
<b>3.3.1. Surgery</b>	<b>32</b>
<b>3.3.2. Physical</b>	<b>33</b>
<b>3.3.3. Chemical</b>	<b>34</b>
<b>3.5 Classes of Chemotherapeutics</b>	<b>35</b>
<b>3.5.1. Alkylating Agents</b>	<b>35</b>
<b>3.5.2. Antimetabolites</b>	<b>36</b>
<b>3.5.3. Anticancer Drugs Acting via Radical Species,                 Photosensitizers and Photodynamics</b>	<b>37</b>
<b>3.5.4. Hormone Inhibitors</b>	<b>39</b>
<b>3.5.5. DNA Intercalators and Topoisomerase Inhibitors</b>	<b>40</b>
<b>3.5.6. Tubulin and Mircotubules Targeting Anticancer Drugs</b>	<b>41</b>
<b>3.5.7. Tumor Cell Growth Signaling Pathway                 and Proliferation Inhibiting Drugs</b>	<b>43</b>
<b>3.5.8. Other Classes</b>	<b>44</b>
<b>4. Categorization of Metals in Medicine</b>	<b>44</b>
<b>4.1. Radiopharmaceuticals</b>	<b>45</b>
<b>4.2. Diagnostic Agents</b>	<b>45</b>

4.3. Essential Elements and Mineral Supplements	45
4.4. Chelation Therapy	46
4.5. Therapeutic Agents	47
5. Categorization of Metal Anticancer Compounds	47
5.1. Functional Compounds	47
5.2. Structural Compounds	49
5.3. Metal Ions as Carriers of Active Ligands	50
5.4. Metal Complexes that Behave as Catalysts	50
5.5. Photoactive Metal Compounds	51
6. Platinum	52
6.1. Mechanisms of Action	54
7. Ruthenium	55
7.1. Mechanisms of Action	56
8. Ruthenium Azole Chlorido Nitrosyl Complexes	58
8.1. NO in Biology	58
8.2. Medical Applications of Ruthenium-NO Complexes	61
8.3. Other Applications for Ru-NO Complexes	63
8.4. NO Identity and the Electronic Structure of the {M(NO)} Moiety	64
9. Osmium	66
10. Osmium Azole Chlorido Compounds	68
11 Azole Chemistry	68
11.1. Biological importance of azoles	69
12 Anderson Rearrangement	71
13. Results	74
13.1. Osmium complexes with azole heterocycles as potential antitumor drugs	74
13.2. En Route to Osmium Analogues of KP1019: Synthesis, Structure, Spectroscopic Properties and Antiproliferative Activity of trans-[Os <sup>IV</sup> Cl <sub>4</sub> (Hazole) <sub>2</sub> ]	99

13.2.1.,Supporting Information .	108
13.3. Osmium(IV) complexes with 1H- and 2H-indazoles: tautomer identity versus spectroscopic properties and antiproliferative activity	113
13.3.1. Supporting Information	122
13.4. On the electronic structure of the mer,trans-[RuCl <sub>3</sub> (1H-indazole) <sub>2</sub> (NO)] complex, a possible metabolite of the antitumor drug candidate KP1019: experimental and DFT study	127
13.4.1. Supporting Information	163
13.5. Striking Difference in Antiproliferative Activity of Ruthenium- and Osmium- Nitrosyl Complexes with Azole Heterocycles	170
13.5.1. Supporting Information	202
14 List of Charts, Figures and Tables	212
15 Abbreviations	213
16 Used Symbols and Constants	215
17 Chemicals	216
18 Curriculum Vitae	218
