

**THE
MOUNTAIN
GORILLA**

**ECOLOGY
AND BEHAVIOR**

GEORGE B. SCHALLER

THE UNIVERSITY OF CHICAGO PRESS
CHICAGO AND LONDON

CONTENTS

i. Introduction and Methods	1
INTRODUCTION / 1	
ACKNOWLEDGMENTS / 3	
THE COUNTRY / 6	
TAXONOMY / 10	
HISTORY OF THE DISCOVERY AND STUDY OF THE MOUNTAIN GORILLA / 12	
PROCEDURE AND METHOD / 18	
ii. Distribution and Ecology	25
DISTRIBUTION / 25	
ECOLOGY AND DESCRIPTION OF THE GORILLA HABITATS / 36	
iii. The Animals	66
AGE AND SEX CLASSES / 66	
PHYSICAL ATTRIBUTES AND INDIVIDUAL DIFFERENCES / 68	
INJURIES / 77	
BODY POSTURES / 78	
THE SENSES / 78	
TEMPERAMENT / 80	
ARBOREAL AND TERRESTRIAL LOCOMOTION / 81	
GORILLA SPOOR / 85	
IV. Population Density, Structure, and Behavior	92
POPULATION DENSITIES AND NUMERICAL ESTIMATES / 92	
POPULATION DYNAMICS / 95	
GROUP DYNAMICS / 102	
GROUP RANGES AND MOVEMENTS / 124	
THE DAILY ACTIVITY CYCLE / 137	
V. Individual Activities and Behavior	149
FOOD HABITS AND FEEDING BEHAVIOR / 149	
DRINKING BEHAVIOR / 169	

NESTS AND NESTING BEHAVIOR / 169	
TRANSPORT OF MATERIALS / 198	
TOOL-USING AND HANDLING OF OBJECTS / 199	
ELIMINATIVE AND SELF-CARE BEHAVIOR / 201	
FACIAL EXPRESSIONS / 208	
VOCALIZATIONS / 210	
DISPLAYS / 221	
VI. Social Behavior	237
LEADERSHIP / 237	
INTERNAL ORGANIZATION OF GORILLA GROUPS / 239	
INTERACTIONS OF INDIVIDUALS WITHIN THE GROUP / 240	
THE DEVELOPMENT OF INFANTS FROM BIRTH TO THE AGE OF SIX MONTHS / 273	
MATING BEHAVIOR / 275	
AGGRESSIVE AND SUBMISSIVE BEHAVIOR / 289	
VII. Responses to Environment	294
RESPONSE TO WEATHER / 294	
RESPONSE TO WATER / 298	
INTERACTIONS WITH OTHER ANIMALS, EXCLUDING PRIMATES / 299	
INTERACTIONS WITH OTHER PRIMATES / 304	
VIII. Conservation	320
CONSERVATION / 320	
IX. Summary	327
SUMMARY / 327	
Tables and Appendixes	337
A. ACCOUNTS BY CAPTAIN VON BERINGE CONCERNING HIS DISCOVERY OF THE MOUNTAIN GORILLA / 390	
B. WEATHER DATA / 391	
C. NOTES ON SKULLS OF THE MOUNTAIN GORILLA / 397	
D. FOOT CANDLE READINGS AT KABARA / 404	
Bibliography	405
Index	425

ILLUSTRATIONS

PLATE	FACING PAGE
1. A typical view of the Utu region	14
2. The Kayonza Forest with the Virunga Volcanoes in the distance	14
3. The rift mountains west of Lake Tanganyika	14
4. My wife watches a group of gorillas	15
5. The Lowa River at a point where it presents a barrier to gorilla dispersal	15
6. A field in lowland rain forest near Beni, Congo	15
7. Old secondary forest in the Utu region	46
8. A stand of tall bamboo	47
9. A typical ridge in the Kayonza Forest, showing the sparseness of the groundcover	47
10. A densely overgrown valley in the Kayonza Forest	47
11. A view of the Virunga Volcanoes	78
12. <i>Hypericum</i> woodland in the Virunga Volcanoes	78
13. The zone of giant senecios at an altitude of 12,800 feet in the Virunga Volcanoes	78
14. Mt. Karisimbi as seen from Kabara	79
15. A typical foggy day at Kabara	79
16. Two female gorillas and a blackbacked male in a tree	110
17. A female gorilla with an infant on her back	111
18. Ten gorillas, showing great individual differences in the facial features	126
19. A silverbacked male in a tree	126
20. A blackbacked male	126
21. A hole excavated by a gorilla in order to obtain a root	127
22. A banana stem torn apart by a gorilla to obtain the pith	127

PLATE	FACING PAGE
23. A typical gorilla ground nest of herbs	142
24. A gorilla ground nest of lobelia stems	142
25. A gorilla ground nest of branches	143
26. A gorilla nest in the crowns of bamboo	174
27. A gorilla nest in the crotch of a tree	175
28. "Symbolic feeding" by a silverbacked male preceding the chest- beating display	206
29. A female stands and beats her chest	207
30. A blackbacked male displays the strutting walk	238
31. A silverbacked male indicates his readiness to leave by standing motionless with legs spread	239
32. A juvenile rests its arms on the back of a blackbacked male	270
33. A silverbacked male and several other gorillas	271
34. Several gorillas have ascended a tree to watch me	302
35. An African weaving a bamboo basket in front of a bamboo hut	303

Photographs of gorillas are of free-living animals taken in the Kabara study area of the Virunga Volcanoes.

FIGURES

1. Regional map of the eastern Congo, western Uganda, and western Ruanda-Urundi	7
2. The present and hypothetical past distribution of the genus <i>Gorilla</i>	26
3. The geographic distribution of the mountain gorilla in 1959	28
4. Distribution of the mountain gorilla with respect to vegetation types	31
5. The relative abundance of bamboo shoots in the Virunga Volcanoes during 1959 and 1960	43
6. The Virunga Volcanoes of Albert National Park	49
7. A generalized vegetation map of the Uganda portion of the Virunga Volcanoes	52
8. A generalized vegetation map of the Mt. Visoke-Mt. Sabinio saddle area, Virunga Volcanoes	56
9. An aerial view of the Kabara study area, Virunga Volcanoes	56
10. A generalized vegetation map of the Kabara area	60
11. Shapes and individual identifying marks of noses of mountain gorillas at Kabara	73
12. Body weights of a female lowland gorilla from birth to the age of 4 years	74
13. Body weights of 4 gorillas from infancy to adulthood	75
14. Foot- and knuckle prints of gorillas at Kabara	86
15. Footprints of gorillas at Kabara	87
16. Cross-sections of gorilla dung showing size and shape	89
17. The joining and parting of silverbacked males in group IV at Kabara	107
18. The splitting and rejoining of group IV at Kabara	110
19. The close proximity, joining, and parting of groups VI and VIII at Kabara	113

20. Adjacent nest sites of groups VI and VIII at Kabara	113
21. The routes of groups VII and XI before, during, and after meeting	115
22. The routes of groups V and VII before, during, and after meeting	117
23. The routes of groups VII and ? during a meeting	118
24. A combined nest site of groups VII and III	119
25. The extent of home ranges of 3 gorilla groups in the Kabara area	125
26. The extent of home ranges of 2 gorilla groups in the Kabara area	126
27. The extent of home ranges of 5 gorilla groups in the Kabara area	127
28. The daily route of travel of group IV from August 28 to September 14, 1959	131
29. The daily route of travel of group VII from March 15 to April 2, 1960	131
30. The daily route of travel of group VII from October 19 to November 5, 1959	133
31. The daily route of travel of group II from November 5 to 21, 1959	133
32. The routes of travel of 3 groups through the same area at approximately the same time	134
33. The daily route of travel of one group in the Kisoro area from March 29 to April 5, 1959	135
34. The daily route of travel of one group in the Kayonza Forest from June 12 to 16, 1960	135
35. A typical scattering of animals in the midday resting area	140
36. A typical daily route of a group, showing feeding, resting, and nesting sites	141
37. Daily feeding and resting activity patterns of gorilla groups	142
38. Daily feeding and resting activity patterns of gorilla groups	143
39. Body positions of resting gorillas	144
40. Body positions of resting gorillas	145
41. The daily activity cycle of gorilla groups	147
42. Two consecutive nest sites of group IV, showing overlap of nesting locations	172
43. Typical nest sites of small gorilla groups	173
44. Two Kabara nest sites, one compact, the other split	174

45. Two typical nest sites of group VII at Kabara	175
46. Two typical Kabara nest sites	176
47. Two nest sites of group VII, one compact, the other split	177
48. Some typical nest sites from the Kayonza Forest	178
49. Some typical gorilla nest sites	179
50. A nest site of group IV at Kabara	183
51. A split nest site of group VIII at Kabara	184
52. A nest site of group IV showing the nesting positions of the various silverbacked males	185
53. Schematic diagrams of gorilla nests on the ground in the Virunga Volcanoes	189
54. Schematic diagrams of gorilla nests on or near the ground in the Kayonza Forest	190
55. Schematic diagrams of tree nests in the Utu region	192
56. Sketches of gorillas showing body positions in the nest and during eliminative behavior	202
57. Body positions of gorillas during self- and mutual grooming	206
58. Sound spectrograms of various gorilla vocalizations	218
59. Sound spectrograms of various gorilla vocalizations	218
60. Sound spectrograms of intensely roaring male gorillas	218
61. Sound spectrograms of chest beats by male gorillas	218
62. Sound spectrograms of chest beats by female and juvenile gorillas	218
63. Body positions of gorillas during play, and of a female carrying her wounded infant	251
64. Body positions and activities of gorillas during the midday rest period	256
65. Body positions of females and youngsters while resting near the silverbacked male	258
66. Copulatory positions of gorillas at Kabara and in the Columbus zoo	285
67. Nesting response of group VII to rain	296
68. Nesting response of group VII to rain	297
69. Cartoon	423

TABLES

1. A partial list of gorillas collected in the Virunga Volcanoes . . .	339
2. Recent investigations into gorilla behavior in Uganda . . .	340
3. Location and dates of gorilla field work	341
4. Number of visual encounters and hours of direct observation of gorilla groups	342
5. Location and dates of field work on apes other than gorillas .	343
6. The Virunga Volcanoes	344
7. Forage utilized by gorillas in mountain woodland and bamboo at Kisoro	345
8. Weights of lowland gorillas in captivity	346
9. Weights and heights of male mountain gorillas collected in the wild	347
10. The distribution of ischial callosities in six gorilla groups . .	347
11. Handedness in the chest-beating display of individual males .	348
12. Recent injuries noted in the Kabara gorilla population . . .	349
13. The frequency of tree climbing in Kabara gorillas	350
14. Relative abundance of gorilla nest sites in several areas . . .	351
15. Estimated population density of gorillas in selected areas . .	351
16. Sexual development of gorilla pairs in captivity	352
17. The occurrence of nematode eggs in gorilla dung samples from Kabara	353
18. Sex and age class composition of the Kabara population . . .	354
19. The composition of gorilla groups at Kabara	354
20. The composition of mountain and lowland gorilla groups . . .	355
21. Instances of inter-group contacts at Kabara	356
22. Seasonal variation in the presence or absence of bamboo shoots and gorilla sign in the bamboo zone along the trail between Rweru and Kabara	357

23.	Arrival dates of gorilla groups in the study area	357
24.	Extent of daily movement by gorilla groups at Kabara	358
25.	Distances traveled along the route from one nest site to the following nest site by groups at hourly intervals during the day at Kabara	359
26.	Gorilla group activity at various times of day	360
27.	Food plants utilized by gorillas at Kabara	361
28.	Food plants utilized by gorillas at Kisoro	362
29.	Food plants utilized by gorillas in the Kayonza Forest	363
30.	Food plants utilized by gorillas at Mt. Tshiaberimu and vicinity	364
31.	Food plants utilized by gorillas in the Mt. Kahuzi region west of Lake Kivu	365
32.	Food plants utilized by gorillas in the Mwenga-Fizi region	366
33.	Food plants utilized by gorillas in the Utu region	367
34.	Food plants utilized by gorillas in West Africa as noted in the literature	368
35.	Chemical analysis of <i>Peucedanum linderi</i>	368
36.	Similarities in food habits between study areas	369
37.	Presence and utilization of forage species in various study areas	370
38.	Analyses of soils eaten by gorillas	371
39.	Subjective evaluation of taste of some gorilla food plants	372
40.	Height of gorilla nests above ground	373
41.	Height above ground of chimpanzee and gorilla nests in the Kayonza Forest	374
42.	Distances between the nearest nests in 146 nest sites at Kabara	375
43.	Materials used in the construction of night nests at Kabara	376
44.	Use of night nest construction materials in three Kabara gorilla groups	377
45.	Presence and location of dung at the gorilla nest	378
46.	Frequency of self-grooming and parts of the body groomed by the various age and sex classes in gorillas	379
47.	Gorilla vocalizations, their probable underlying emotions, and their functions	380
48.	The number of individual beats per chest-beating display in Kabara gorillas	382
49.	Average number of beats per chest-beating display in gorilla males at Kabara	382

50. Occurrence of the various acts in the chest-beating sequence of the different age and sex classes	383
51. Dominance interactions between age and sex classes	383
52. Dominance interactions between the silverbacked males of group IV	384
53. Number of observations of mutual grooming in the various age and sex classes	384
54. Mutual grooming in <i>Papio ursinus</i>	385
55. The frequency of lone and social play in the various age and sex classes	385
56. Stages of behavioral development in free-living gorillas to the age of 6 months	386
57. Stages of behavioral development in the infant gorilla "Jambo" at the Basel zoo	387
58. The age of first appearance of various behavior patterns in captive gorillas, chimpanzees, and man	388
59. Estimated dates of birth of infants in the Kabara population	389
60. Mean number of chest beats by silverbacked males in response to my presence during the first hour of contact	389
61. Precipitation at Kisoro, Uganda	391
62. Weather data, Rumangabo, Albert National Park	392
63. Weather data, Rumangabo, Albert National Park, during period of study	393
64. Kabara temperatures	394
65. Kabara cloudcover	395
66. Kabara precipitation	395
67. Weather spells at Kabara	396
68. Collecting locations of gorilla skeletal material	398
69. Measurements of gorilla crania	399
70. Measurements of newborn gorilla infants	400
71. Measurements of the deformed arm bones of a mountain gorilla	400
72. Sequence of tooth eruption in the upper jaw	401
73. Dental attrition in teeth of the upper and lower jaws	402
74. Foot candle readings at Kabara	404
