

The Natural History of

WHALES & DOLPHINS

PETER G. H. EVANS

Facts On File Publications

Contents

List of colour plates	vi
List of tables	vii
List of figures	viii
Series editor's foreword <i>Ernest Neal, MBE</i>	xii
Preface	xiv
1 Whales and dolphins — an introduction to the order Cetacea	1
2 Evolution	20
3 Classification	32
4 Systematics and zoogeography	76
5 Present distribution	90
6 Food and feeding	119
7 Social organisation and behaviour	159
8 Life history	206
9 Whales and man — history of whaling	249
10 Whales and man — the present day	267
11 Postscript	293
Bibliography	302
Index	336

C colour plates

1. Dusky dolphin breaching off New Zealand
2. Southern right whale breaching, Peninsula Valdés, Argentina
3. Southern right whale with calf, Peninsula Valdés, Argentina
4. Minke whale lunge-feeding, eastern Pacific
5. Fin whale surfacing showing open blowhole, Iceland
6. Humpback whale breaching off Iceland
7. Sperm whale with open jaw, off Sri Lanka
8. Herd of long-finned pilot whales in lateral formation, off western Ireland
9. Sperm whale underwater, off Sri Lanka
10. Mixed herd of long-finned pilot whales and bottle-nosed dolphins, off western Ireland
11. Killer whale breaching, Puget Sound
12. Killer whale attacking southern sea lion from shore, Patagonia
13. Bowhead whale killed by Eskimos in aboriginal whale fishery, Barrow, Alaska
14. Sperm whale after harpooning, Denmark Strait south of Greenland
15. Pilot whale 'grind' in the Faroe islands
16. Herd of narwhals, Baffin Bay
17. Common dolphin breaching, west of Ushant, Brittany
18. White-beaked dolphin breaching, Minches, western Scotland
19. Gray whale spyhopping, San Ignacio lagoon
20. Long-snouted spinner dolphins bow-riding in the Red Sea

Tables

1.1	Sounds produced by various cetaceans	15–19
6.1	Diet of mysticetes	134–5
6.2	Diet of odontocetes	136–42
6.3	Energy contents of plankton, squid and fish	153
6.4	Energy budgets for blue and fin whales, sperm whale and harbour porpoise	156–7
7.1	Typical group sizes and social structure of mysticetes	161
7.2	Typical group sizes and social structure of odontocetes	163–6
7.3	Putative mating systems of cetaceans	174
8.1	Breeding seasons of mysticetes	208
8.2	Breeding seasons of odontocetes	209–12
8.3	Gestation and lactation periods, and calving intervals for mysticetes	216–17
8.4	Size and growth parameters for mysticetes	223–4
8.5	Gestation and lactation periods, and calving intervals for odontocetes	226–8
8.6	Size and growth parameters for odontocetes	233–6
10.1	Possible changes in patterns of consumption of krill by major groups of predators in the Southern Ocean	280
11.1	Past and present population estimates for the great whales	296–7

Figures

1.1	Skeletons of toothed and baleen whales compared with terrestrial mammal	3
1.2	Nasal passages of toothed and baleen whales	3
1.3	Modifications of forelimbs of cetaceans compared with human	4
1.4	External sex differences in cetaceans	5
1.5	Respiratory system of a whale in action during a deep dive	7
2.1	The world during the Eocene, Miocene and Present showing changes to the continents and seas, and sites of fossil cetacean ancestors	22
2.2	The first cetaceans — the archaeocete <i>Basilosaurus</i>	23
2.3	Telescoping of the skull during the evolution of cetaceans	24
2.4	The evolutionary history of cetaceans	31
3.1	The river dolphins: Indus/Ganges susus, boto, baiji and franciscana	34
3.2	The family Monodontidae: narwhal, white whale and Irrawaddy dolphin	37
3.3	The family Phocoenidae: harbour porpoise, Burmeister's porpoise, vaquita, spectacled porpoise, Dall's porpoise and finless porpoise	39
3.4	The family Delphinidae — subfamily Steninae: rough-toothed dolphin, tucuxi and hump-backed dolphin	41
3.5	The family Delphinidae — subfamily Delphininae: the genus <i>Lagenorhynchus</i> (white-beaked, Atlantic white-sided, dusky, Pacific white-sided, hourglass and Peale's dolphins)	44
3.6	The family Delphinidae — subfamily Delphininae: genera <i>Lagenodelphis</i> and <i>Delphinus</i> (Fraser's and common dolphins)	46
3.7	The family Delphinidae — subfamily Delphininae: genera <i>Tursiops</i> and <i>Stenella</i> (bottle-nosed, spotted, striped, long-snouted spinner and clymene dolphins)	48

LIST OF FIGURES

3.8	The family Delphinidae — subfamily Lissodelphininae: northern and southern right whale dolphins	50
3.9	The family Delphinidae — subfamily Cephalorhynchinae: Heaviside's, Hector's, black and Commerson's dolphins	52
3.10	The family Delphinidae — subfamily Globicephalinae: melon-headed, pygmy killer, false killer, killer, Risso's and long-finned/short-finned pilot whales	54
3.11	Beaked whales of the family Ziphiidae: Baird's, Arnoux's, northern/southern bottlenose whale, Cuvier's and Tasman beaked whales	58
3.12	Beaked whales of the family Ziphiidae: the genus <i>Mesoplodon</i> (Blainville's, Sowerby's, Gervais', True's, strap-toothed, Gray's, Andrew's, Hector's, ginkgo-toothed, Stejneger's and Hubbs' beaked whales	62–3
3.13	The superfamily Physeteroidea: pygmy sperm, dwarf sperm and sperm whales	66
3.14	The right whales (families Balaenidae and Neobalaenidae): bowhead, northern/southern right and pygmy right whales	70
3.15	The family Eschrichtiidae: gray whale	71
3.16	The rorquals (family Balaenopteridae): humpback, blue, fin, sei, Bryde's and minke whales	73
4.1	Range of latitudes occupied by different rorqual whale species on feeding grounds in the southern hemisphere	78
4.2	Map of the distribution of members of genera <i>Lagenorhynchus</i> and <i>Lagenodelphis</i>	81
4.3	Map of the distribution of members of genus <i>Cephalorhynchus</i>	82
4.4	Map of the distribution of river dolphins and the franciscana	83
4.5	Possible evolutionary development of pigmentation patterns in the family Delphinidae	85
4.6	Map of the distribution of members of the family Phocoenidae	87
4.7	Map of the distribution of members of the genus <i>Mesoplodon</i>	88
6.1	How baleen works	120
6.2	Variation in baleen in the mysticete whales	121
6.3	Productive ocean regions of the world	125
6.4	Satellite imagery of plankton fronts	126
6.5	Coincidence of plankton and whale concentrations in Antarctica	127
6.6	Temperature variation, plankton fronts and dolphin distribution on the continental shelf edge, southwest of Britain	128–9
6.7	Movements of radio-tagged common dolphin in association with undersea escarpments	131
6.8	Plankton food of baleen whales: (a) <i>Thysanoessa</i> ; (b) <i>Euphausia</i> ; (c) <i>Calanus</i> ; (d) <i>Ampelisca</i> ; (e) <i>Mysis</i>	132
6.9	Gray whale mud-skimming	146

LIST OF FIGURES

6.10	Bubble-net feeding by humpback whale	147
6.11	Method of fish capture by toothed whales	149
6.12	Food-herding by white-beaked dolphins	150-1
7.1	Latitudinal distribution of sperm whale schools of different social structure	168
7.2	Bottle-nosed dolphin school dynamics	171
7.3	Birth and parental care in dolphins	182
7.4	Epimeletic (caring) behaviour in dolphin mother-calf pair	183
7.5	Courtship behaviour: the nuclear female-calf pair, and satellite male humpback whale	185
7.6	Mating behaviour: (a) humpback whale; (b) sperm whale	187
7.7	The song of the humpback whale	190-2
7.8	Song dialects in the killer whale	196-7
7.9	'Language' in Delphinids	198-9
8.1	Migration patterns of rorqual whales: (a) blue whale; (b) humpback whale	213
8.2	Migration patterns of the gray whale	215
8.3	Fetal growth rates of various rorquals and sperm whale	218
8.4	Growth rates of Mysticetes	219
8.5	Generalised breeding cycle of the fin whale	221
8.6	Method to determine age of baleen whales by ear-plug layers	222
8.7	Growth rates of odontocetes	229-31
8.8	Method to determine age of toothed whales by dentine tooth layers	232
8.9	Parasites and commensals of cetaceans	240
8.10	Food web in the Southern Ocean	246
8.11	Changes in reproductive parameters of the great whales in response to exploitation	247
9.1	History of whaling	252
9.2	Map of main whaling areas in the world: (a) up to 1970; (b) from 1970 to 1985	254
9.3	Catches of the great whales since 1900 in the southern hemisphere	257
9.4	Rationale behind harvesting of whales: (a) recruitment curve; (b) maximum sustainable yield (MSY) curve	260
10.1	Areas where substantial incidental catches of cetaceans occur in fishing gear	282
10.2	Incidental capture of dolphins in the purse-seine tuna fishery and method to reduce mortality	283
10.3	Major polluted regions of the world where cetaceans may be affected	290
11.1	Estimated decline of the great whales during the present century	294
11.2	Methods used to recognise cetaceans individually: (a) humpback tail flukes; (b) right whale head callosities; (c) dorsal fin variations	298

11.3	Methods used to follow individuals: (a) 'Discovery' tag; (b) streamer tag; (c) numbered tag on dorsal fin; (d) freeze branding; (e) radio package	299
