Abstract	i
List of Figures	ix
List of Tables	xiii
1 Introduction	1
1.1 The large scale structure of the Universe in theory	3
1.2 Galaxy evolution in different environments	6
1.2.1 Multiwavelength studies	6
1.2.2 Neutral hydrogen studies	8
1.3 Extragalactic HI surveys	12
1.4 The Ursa Major region – Scientific motivation	13
1.5 Brief thesis outline	17
2 HIJASS Data and Source Finding	19
2.1 Introduction	19
2.2 Data acquisition and processing	19
2.3 Data analysis using DUCHAMP	21
2.4 Catalogue reliability	22
2.4.1 Negative troughs	22
2.4.2 GBT follow-up observations	23
2.5 Catalogue completeness	23
2.5.1 Synthetic source injection	23
2.5.2 Literature comparison	25
2.6 Conclusion	26
3 The HI Catalogue of the Ursa Major Region	27
3.1 Introduction	27
3.2 The HI catalogue	28
3.2.1 Parametrization	28
3.2.2 The HI catalogue	29
3.2.3 HI parameter uncertainties	32
3.2.4 Candidate galaxy/HI cloud	50

3.2.5	Comparison of measured HI parameters with values in the literature and follow-up observations	54
3.3	Discussion and results	57
3.3.1	Velocity distribution	57
3.3.2	HI mass distribution	58
3.3.3	Candidates for galaxy-galaxy interactions	59
3.3.4	HIJASS detections with extended HI envelopes	61
3.3.5	Comparison to large area blind HI surveys	63
3.4	WSRT Follow-up Observations	64
3.4.1	The NGC 4111 system	64
3.4.2	HIJASS J1219+46 - A tidal tail of NGC4288?	70
3.5	Conclusion	74
4	Identifying Bound Structures	75
4.1	Introduction	75
4.2	The galaxy sample	76
4.2.1	Optical data	76
4.2.2	HI data	81
4.3	Defining structures	83
4.3.1	'Friends-of-Friends' algorithm	83
4.3.2	Optimizing linking lengths using mock catalogues	84
4.4	Group properties	88
4.5	Bound structures in the Ursa Major region	94
4.6	Literature comparison	98
4.7	Conclusion	102
5	Galaxy and Group Properties	105
5.1	Introduction	105
5.2	Galaxy groups – Individual structures	106
5.2.1	The main structures in the southern part of the Ursa Major region	108
5.2.2	The main structures in the central part of the Ursa Major region	111
5.2.3	The main structures in the northern part of the Ursa Major region	115
5.3	Group dynamics	118
5.4	Will Ursa Major and Virgo merge?	126
5.5	Brightest group galaxies (BGG)	128
5.6	Galaxy properties	130

<i>CONTENTS</i>	ix
5.6.1 Morphology	131
5.6.2 Color	132
5.6.3 Luminosity	134
5.6.4 HI deficiency and excess	136
5.7 Conclusion	144
6 Summary and Future Prospects	147
6.1 Introduction	147
6.2 Summary of the main results	147
6.2.1 Individual chapters	147
6.2.2 The key science questions	150
6.3 Future prospects	151
6.3.1 Follow-up observations and future work	151
6.3.2 Next generation radio telescopes and source finders	152
Bibliography	153
Publications	164
