

Doctoral Thesis

Clinical Impact of *JAK2 V617F* Mutation
in Peripheral Arterial Disease and
Accurate Quantitation of Allele Burden

Submitted by
Elena Kinz

For the Academic Degree of
Doctor of Medical Science
at the
Private University in the
Principality of Liechtenstein

Supervisor:

Prim.o.Univ.-Prof. Dr. med. Dr. h.c. Heinz Drexel
Prof. Dr. med. Lorenz Risch, PD, MPH

Vorarlberg Institute for Vascular Investigation
and Treatment (VIVIT),
Feldkirch

Triesen, November 2015

Content

1. Introduction	1
2. Hypothesis	4
3. Strategy.....	5
3.1. Study subjects and controls	5
3.2. Diagnosis and genotyping.....	5
3.3. Validation of <i>JAK2 V617F</i> plasmid model system and accurate quantitation of allele burden	6
3.4. Statistical methods.....	6
4. Results	8
5. Discussion.....	10
6. Author contributions	11
7. Scientific Publications.....	12
7.1. Overview of Scientific Publications	12
7.2. Scientific Publications.....	14
8. Overall Discussion	29
9. References.....	32
10. Curriculum Vitae	37
11. Author`s publication list	39
12. Acknowledgements	42
