

Liechtenstein's Greenhouse Gas Inventory 1990-2016

National Inventory Report 2018

Submission of 12.4.2018 under the United Nations Framework Convention on Climate Change (UNFCCC) and the second commitment period (CP2) under the Kyoto Protocol

Authors

INFRAS, Zurich/Switzerland

Jürg Heldstab	(Lead author) Executive Summary, Introduction
Bettina Schächli	Uncertainty Analysis, Energy, IPPU, Indirect Emissions
Felix Weber	KCA, Uncertainty Analysis, Trends, Agriculture, Other, Annex

Meteotest, Bern/Switzerland

Beat Rihm	LULUCF, KP-LULUCF
-----------	-------------------

CSD Engineers, Bern/Switzerland

Markus Sommerhalder	Waste
---------------------	-------

Emission modelling

Acontec, Schaan/Liechtenstein

Jürgen Beckbüssinger

Office of Environment, Vaduz/Liechtenstein (www.au.llv.li)

Helmut Kindle	National Focal Point, Quality Manager (QA/QC)
Heike Summer	National Focal Point, Project manager, National Inventory Compiler (NIC), Emission data, KP-LULUCF tables, National Registry, National Allocation Plan, CDM, JI
Hanspeter Eberle	LULUCF

Table of contents

Glossary	9
EXECUTIVE SUMMARY	12
ES.1 Background information on climate change, greenhouse gas inventories and supplementary information required under Art. 7.1. KP	12
ES.1.1 Background information on climate change	12
ES.1.2 Background information on greenhouse gas inventories	12
ES.1.3 Background information on supplementary information required under Article 7.1. of the Kyoto Protocol (KP)	14
ES.2 Summary of national emission and removal-related trends as well as emissions and removals from KP-LULUCF activities	15
ES.2.1 GHG inventory	15
ES.2.2 KP-LULUCF activities	16
ES.3. Overview of source and sink category emission estimates and trends including KP-LULUCF activities	17
ES.3.1 GHG inventory	17
ES.3.2 KP-LULUCF activities	22
ES.4. Other information	22
Acknowledgement.....	22
PART 1: Annual inventory submission under the UNFCCC.....	25
1. Introduction.....	25
1.1 Background information on Liechtenstein’s greenhouse gas inventory, climate change and supplementary information of the Kyoto Protocol (KP)	25
1.2 National inventory arrangements	31
1.3 Inventory preparation, and data collection, processing and storage	43
1.4 Methodologies and data sources	46
1.5 Brief Description of Key Categories	50
1.6 Uncertainty evaluation	53
1.7 Assessment of completeness	62

2. Trends in greenhouse gas emissions and removals	63
2.1 Aggregated greenhouse gas emissions 2016	63
2.2 Emission trends by gas	65
2.3 Emission trends by sector	67
2.4 Emission trends for precursor greenhouse gases and SO ₂	71
2.5 Emission trends in KP-LULUCF inventory	73
3. Energy	75
3.1 Overview	75
3.2 Source category 1A – Fuel combustion	78
3.3 Source category 1B – Fugitive emissions from solid fuels and oil and natural gas and other emission from energy production	119
3.4 Source category 1C – CO ₂ transport and storage	124
4. Industrial processes and product use.....	125
4.1 Overview	125
4.2 Source category 2A – Mineral industry.....	127
4.3 Source category 2B – Chemical industry.....	127
4.4 Source category 2C – Metal industry	127
4.5 Source category 2D – Non-energy products from fuels and solvent use	128
4.6 Source category 2E – Electronic industry.....	130
4.7 Source category 2F – Product uses as ODS substitutes	130
4.8 Source category 2G - Other product manufacture and use.....	140
4.9 Source category 2H - Other.....	144
5. Agriculture.....	145
5.1 Overview	145
5.2 Source category 3A – Enteric fermentation.....	147
5.3 Source category 3B – Manure management	158
5.4 Source category 3C – Rice cultivation	172
5.5 Source category 3D – Agricultural soils.....	172
5.6 Source category 3E – Prescribed burning of savannas	189
5.7 Source category 3F – Field burning of agricultural residues.....	189
5.8 Source category 3G – Liming.....	189
5.9 Source category 3H – Urea application.....	190

5.10 Source category 3I – Other carbon-containing fertilisers	191
6. Land Use, Land-Use Change and Forestry (LULUCF).....	193
6.1 Overview of LULUCF	193
6.2 Land-use definitions and classification systems	204
6.3 Approaches used for representing land areas and land-use databases.....	209
6.4 Source Category 4A – Forest Land	213
6.5 Source Category 4B – Cropland.....	222
6.6 Source Category 4C – Grassland	225
6.7 Source Category 4D – Wetlands.....	231
6.8 Source Category 4E – Settlements	233
6.9 Source Category 4F – Other Land.....	235
6.10 Categories 4(III), 4(IV) – N ₂ O from nitrogen mineralization	236
6.11 Source Category 4G – Harvested Wood Products (HWP)	238
7. Waste	243
7.1 Overview GHG Emissions	243
7.2 Source Category 5A – Solid waste disposal.....	244
7.3 Source Category 5B – Biological treatment of solid waste	249
7.4 Source Category 5C – Incineration and open burning of waste	251
7.5 Source Category 5D – Wastewater treatment and discharge	254
7.6 Source Category 5E – Other	258
8. Other	259
Memo items	259
9. Indirect CO₂ and N₂O emissions.....	261
10. Recalculations.....	263
10.1 Explanations and justifications for recalculations.....	263
10.2 Implications for emission levels 1990 and 2015	266
10.3 Implications for emissions trends, including time series consistency	268
10.4 Recalculations in response to the review process and planned improvements ...	268
PART 2: Supplementary information required under the Kyoto Protocol	269
11. KP – LULUCF.....	269
11.1 General information.....	272

11.2 Land-related information	277
11.3 Activity-specific information	278
11.4 Article 3.3. (Afforestation and Deforestation)	283
11.5 Article 3.4 (Forest Management)	285
11.6 Key category analysis for Article 3.3 and 3.4 activities	286
11.7 Technical correction Forest Management Reference Level	287
11.8 Natural disturbances	288
11.9 Harvested Wood Products (HWP).....	289
11.10 Information relating to Article 6	290
12. Accounting on Kyoto Units	291
12.1 Background Information	291
12.2 Summary of Information Reported in the SEF Tables.....	291
12.3 Discrepancies and Notifications	291
12.4 Publicly Accessible Information	292
12.5 Calculation of the Commitment Period Reserve (CPR).....	294
12.6 KP-LULUCF Accounting.....	294
13. Information on Changes in National System	295
14. Information on Changes in National Registry	297
15. Minimization of Adverse Impacts in Accordance with Article 3, Paragraph 14	301
16. Other Information.....	303
Annexes to the National Inventory Report	305
Annex 1: Key categories.....	305
Annex 2: Detailed discussion of methodology and data for estimating CO₂ emissions from fossil fuel combustion	305
Annex 3: Other detailed methodological descriptions for individual source or sink categories.....	305
A3.1 Road Transportation	305
A3.2 Enteric Fermentation	306
A3.3 2F Product uses as ODS substitutes and 2G N ₂ O from Product use.....	308
Annex 4: CO₂ reference approach and comparison with sectoral approach, and relevant information on the national energy balance.....	309

Annex 5: Assessment of completeness and (potential) sources and sinks of greenhouse gas emissions and removals excluded	309
Annex 6: Additional information to be considered as part of the NIR submission (where relevant) or other useful reference information	310
A6.1 Additional information on sewage sludge prohibition	310
Annex 7: Supplementary information to the uncertainty analysis.....	311
A7.1 Aggregation of categories for application of uncertainty analyses to key categories	311
A7.2 Detailed information on Approach 2 uncertainty evaluation (Monte Carlo).....	313
Annex 8: Supplementary information the QA/QC system	317
A8.1 Checklists for QC activities	317
A8.2 Checklists for QA activities (internal review)	320
A8.3 Inventory development plan submission 2017	322
Annex 9: Voluntary supplementary information for article 3 paragraph 3 of the Kyoto Protocol: Kyoto tables	325
References	326
