Foreword	XI
Preface	xiii
Copyright and Trademark A<	xvii
Introduction	xix
I.1 What Is SAP?	xxi
1.2 What Is R/3?	xxi
1.3 What Is the R/3 Reference Model?	xxii
1.4 Who Uses R/3?	xxiii
1.5 How Do Customers View R/3?	xxvii
1.6 Conclusion	xxix

PART 1 BUSINESS ENGINEERING

1 Business Engineering and Enterprise Optimization	3
1.1 Significance of Business Engineering	4
1.2 Principles of Business Engineering	4
1.3 Objectives of Business Engineering	5
1.4 Benefits of Business Engineering	6
1.5 Business Engineering with Information Technology	7
1.6 Integration of Information Technology	9
1.7 Developments in Information Technology	10
1.8 Client/Server Technology	11

1.9	Benefits of Client/Server Technology	12
1.10	SAP and Client/Server Technology	14
1.11	Conclusion	16
2	The Business Blueprint	19
2.1	Pros and Cons of Business Blueprints	20
2.2	General Design of the R/3 Blueprint	22
2.3	Focus of the R/3 Blueprint	23
2.4	Event-Driven Process Chain Methodology (EPC)	24
2.5	Describing Complex Business Processes	27
2.5.1	Ordering Toner	28
2.5.2	Recruiting a New Employee	28
2.5.3	Planning a Seminar	30
2.6	EPC Methodology and Viewpoints in the R/3 Reference Model	32
2.6.1	Reference Model Viewpoints—Car Dealership	34
2.6.2	The Component Model—What Happens?	34
2.6.3	The Organizational Model—Who Does What?	37
2.6.4	The Data Model—What Is Needed?	38
2.6.5	The Interaction Model—How Do Company Models Interact?	40
2.7	Summary	42
3	Configure to Order	45
3.1	Standard Software Implementation Issues	47
3.2	Mapping with the Business Blueprint	48
3.3	Redlining the Blueprint	50
3.4	Extending the Business-Process Design	51
3.5	Implementation Case Studies	53
3.5.1	A Hypothetical Example	53
3.5.2	Real-Life Example: Schwarzkopf	54
3.5.3	Real-Life Example: Conoco Ltd.	56
3.6	Conclusion	57
PART 2	PROCESS DESIGN	59
4	Value Chain Thinking	61
4.1	The Value Chain Principle	62
4.2	R/3 and the Value Chain	64

Contents

4.3	Overview of Part 2: Value Chain Thinking	64
4.3.1	Value Chain Example: Order-to-Delivery of Copy Machines	65
4.3.2	Value Chain Example: Applied Micro Circuits Corporation (AMCC), San Diego, California	66
5	Sales Logistics	69
5.1	Standard Order Handling Scenario	71
5.1.1	Mailing Campaign Processing	74
5.1.2	Sales Activity Processing	75
5.1.3	Customer RFQ Processing	76
5.1.4	Customer Quotation Processing	76
5.1.5	Standard Order Processing	78
5.1.6	Delivery Processing	80
5.1.7	Goods Issue Processing for Stock Material	81
5.1.8	Billing	82
5.2	Contract Handling	82
5.3	Third-Party Order Handling	84
5.4	Customer Consignment Stock Handling	85
5.5	Cash Order Handling	86
5.6	Rush Order Handling	87
5.7	Decentralized Shipping	88
5.8	Sales and Distribution Examples	89
5.8.1	Micrografix Corporation, Richardson, Texas	89
5.8.2	Jet Aviation, Palm Beach, Florida, and Zurich, Switzerland	90
6	Production Logistics	93
6.1	Production by Lot Size	95
6.1.1	Processing of Sales and Operation Planning	98
6.1.2	Demand Management	99
6.1.3	Material Requirements Planning	99
6.1.4	Creation and Execution of Production Order	101
6.2	Repetitive Manufacturing	102
6.3	Make-to-Order Production	103
6.4	Process Manufacturing	104
6.5	Project-Related "Engineer to Order"	105
6.6	Quality Management for Goods Receipt from Production	106
6.7	Production Logistics Example: Autodesk Incorporated, Sausalito, California	107

7	Procurement Logistics	111
7.1	Processing Stock Material Scenario	112
7.1.1	Material Requirement Planning	114
7.1.2	Requisition Processing to Stock Material	116
7.1.3	Processing of RFQ Issued to Vendor	118
7.1.4	Vendor Quotation Processing	118
7.1.5	Purchase Order Processing for Stock Material	118
7.1.6	Goods Receipt Processing	119
7.2	Processing of Consumable Material	120
7.3	Management of Consignment Stocks	122
7.4	Subcontract Order Processing	124
7.5	Stock Transfer Processing	125
7.6	External Services Management	126
7.7	Materials Management Examples	127
7.7.1	Chevron Corporation, Tulsa, Oklahoma	127
7.7.2	Westcoast Energy, Inc., Vancouver, British Columbia	129
8	External Accounting	131
8.1	Vendor Processing	133
8.1.1	Vendor Master Record Processing	135
8.1.2	Vendor Invoice Processing	136
8.1.3	Down Payment Release	137
8.1.4	Automatic Payment	137
8.1.5	Manual Payment	138
8.2	Customer Processing	139
8.3	OTA Vendor Processing	141
8.4	Creditor Subsidiary /Head-Office Processing	141
8.5	General Ledger Processing	142
8.6	Special-Purpose Ledgers Processing	143
8.7	Consolidation	144
8.8	Customer Example: Syntex Corporation, Palo Alto, California, and Maidenhead, England	146
9	Organization and Human Resource Management	149
9.1	Personnel Management	151
9.1.1	Organizational Plan Processing	152
9.1.2	Job Description	154
9.1.3	Processing of Employee Status for Planning and Development	154

9.1.4	Staffing	155
9.1.5	Personnel Cost Planning	156
9.2	Business Event Processing	156
9.3	Travel Expense Processing	158
9.4	Time Management Processing	158
9.5	Payroll Processing	159
9.6	Salary Administration	161
9.7	Benefits Administration	162
9.8	Customer Example: The Wellmann Group, Enger, Germany	163
10	Business Planning and Controlling	165
10.1	Cost Object Controlling	167
10.1.1	Production Order Preliminary Costing	169
10.1.2	Production Order Simultaneous Costing	170
10.1.3	Period-End Closing and Final Costing	171
10.2	Profitability Analysis	172
10.3	Profit Center Accounting	174
10.4	Overhead Cost Management	176
10.5	Customer Example: Convex Computer Corporation, Richardson, Texas	177
11	Capital Asset Management	179
11.1	Planned Plant Maintenance	180
11.1.1	Maintenance Plan Processing	181
11.1.2	Maintenance Plan Scheduling	183
11.1.3	Maintenance Call Processing	183
11.1.4	Maintenance Order Creation and Processing	184
11.1.5	Maintenance Order Release	184
11.1.6	Maintenance Order Execution	184
11.1.7	Maintenance Order Completion Confirmation	185
11.1.8	Maintenance Order Settlement	186
11.2	Plant Maintenance Due to Damage	186
11.3	Project-Related Plant Maintenance	187
11.4	Cash Management	188
11.5	Budgeting	189
11.6	Fixed Asset Processing	191
11.7	Leased Asset Processing	192
11.8	Customer Example: Chevron Products Company, U.S.A.	193

PART 3	ARCHITECTURE, FRAMEWORK, AND TOOLS	195
---------------	---	------------

12	Architecture of the R/3 System	197
12.1	R/3 and the Distributed Environment	198
12.2	The Three-Tier Client/Server R/3 Architecture	200
12.3	Benefits of the R/3 Three-Tier Client/Server	202
12.4	Interprogram Communication	204
12.5	Middleware Transaction Management	205
12.6	Rationale for Distributed Business-Process Integration	208
12.7	Capabilities of Application Distribution in R/3	211
12.8	Tools for Application Distribution	213
	12.8.1 Model-based Application Distribution	214
	12.8.2 Distribution Reference Model	214
	12.8.3 Business Blueprint	215
12.9	Conclusion	216
13	R/3 Framework and Infrastructure	219
13.1	Background of Business Integration	220
13.2	SAP Business Framework	222
	13.2.1 Configuration of Enterprise Applications	223
	13.2.2 Rationale for the Business Framework	224
13.3	Repository as Integrating Factor	224
	13.3.1 Business Processes	227
	13.3.2 Business Objects	228
	13.3.3 Data Models	229
	13.3.4 Object-Oriented Interfaces	230
	13.3.5 Business Components	231
13.4	Enterprise Application Development	232
	13.4.1 ABAP/4 Development Workbench	233
	13.4.2 Development Workbench Features	234
13.5	Conclusion	237
14	Business Engineering in R/3	239
14.1	R/3 Business Engineer Overview	240
14.2	Benefits of the R/3 Business Engineer	242
14.3	Modeling and Configuring the Enterprise	244
	14.3.1 Application Components	245

Contents

14.3.2	Session Manager	246
14.3.3	Enterprise Organization	248
14.4	Using the R/3 Reference Model	249
14.4.1	Business Object Model	250
14.4.2	Object-Oriented Data Model	251
14.4.3	Business Process Model	253
14.4.4	Workflow Model	255
14.5	Guideline for Implementing R/3	258
14.6	Project Management	259
14.7	Workflow and Personnel Organization	260
14.8	Open Repository Interface	261
14.9	Business Engineer: Future Vision	265
15	New Age Enterprise	267
15.1	Electronic Commerce	270
15.2	New Age Application Components	271
15.3	R/3 Internet Application Scenarios	272
15.4	The Industry Reference Model, Process Configuration, and Vertical Markets	274
15.5	Autonomous Software Agents	275
15.6	Conclusion	278
	Index	280
