# CONTENTS

Preface	ix	3.3 Double Sums	59
<b>1 Introductory Topics I: Algebra</b>	<b>1</b>	3.4 A Few Aspects of Logic	61
1.1 The Real Numbers	1	3.5 Mathematical Proofs	67
1.2 Integer Powers	4	3.6 Essentials of Set Theory	69
1.3 Rules of Algebra	10	3.7 Mathematical Induction	74
1.4 Fractions	15	Review Problems for Chapter 3	76
1.5 Fractional Powers	19	<b>4 Functions of One Variable</b>	<b>79</b>
1.6 Inequalities	24	4.1 Introduction	79
1.7 Intervals and Absolute Values	29	4.2 Basic Definitions	80
Review Problems for Chapter 1	32	4.3 Graphs of Functions	86
<b>2 Introductory Topics II: Equations</b>	<b>35</b>	4.4 Linear Functions	89
2.1 How to Solve Simple Equations	35	4.5 Linear Models	96
2.2 Equations with Parameters	38	4.6 Quadratic Functions	99
2.3 Quadratic Equations	41	4.7 Polynomials	105
2.4 Linear Equations in Two Unknowns	46	4.8 Power Functions	112
2.5 Nonlinear Equations	48	4.9 Exponential Functions	114
Review Problems for Chapter 2	49	4.10 Logarithmic Functions	120
<b>3 Introductory Topics III: Miscellaneous</b>	<b>51</b>	Review Problems for Chapter 4	124
3.1 Summation Notation	51	<b>5 Properties of Functions</b>	<b>127</b>
3.2 Rules for Sums. Newton's Binomial Formula	55	5.1 Shifting Graphs	127
		5.2 New Functions from Old	132
		5.3 Inverse Functions	136
		5.4 Graphs of Equations	143
		5.5 Distance in the Plane. Circles	146

5.6 General Functions	150	<b>9 Integration</b>	<b>291</b>
Review Problems for Chapter 5	153	9.1 Indefinite Integrals	291
<b>6 Differentiation</b>	<b>155</b>	9.2 Area and Definite Integrals	297
6.1 Slopes of Curves	155	9.3 Properties of Definite Integrals	303
6.2 The Derivative. Tangents	157	9.4 Economic Applications	306
6.3 Increasing and Decreasing Functions	163	9.5 Integration by Parts	313
6.4 Rates of Change	165	9.6 Integration by Substitution	316
6.5 A Dash of Limits	169	9.7 Infinite Intervals of Integration	319
6.6 Simple Rules for Differentiation	174	9.8 A Glimpse at Differential Equations	326
6.7 Sums, Products, and Quotients	178	9.9 Separable and Linear Differential	
6.8 Chain Rule	184	Equations	331
6.9 Higher-Order Derivatives	189	Review Problems for Chapter 9	336
6.10 Exponential Functions	194	<b>10 Interest Rates and</b>	
6.11 Logarithmic Functions	197	<b>Present Values</b>	<b>339</b>
Review Problems for Chapter 6	203	10.1 Interest Periods and Effective Rates	339
<b>7 Derivatives in Use</b>	<b>205</b>	10.2 Continuous Compounding	343
7.1 Implicit Differentiation	205	10.3 Present Value	345
7.2 Economic Examples	210	10.4 Geometric Series	347
7.3 Differentiating the Inverse	213	10.5 Total Present Value	352
7.4 Linear Approximations	216	10.6 Mortgage Repayments	357
7.5 Polynomial Approximations	221	10.7 Internal Rate of Return	362
7.6 Taylor's Formula	224	10.8 A Glimpse at Difference Equations	363
7.7 Why Economists Use Elasticities	228	Review Problems for Chapter 10	367
7.8 Continuity	232	<b>11 Functions of Many</b>	
7.9 More on Limits	236	<b>Variables</b>	<b>369</b>
7.10 Intermediate Value Theorem.		11.1 Functions of Two Variables	369
Newton's Method	244	11.2 Partial Derivatives with Two Variables	373
7.11 Infinite Sequences	248	11.3 Geometric Representation	379
7.12 L'Hôpital's Rule	250	11.4 Surfaces and Distance	386
Review Problems for Chapter 7	254	11.5 Functions of More Variables	389
<b>8 Single-Variable</b>		11.6 Partial Derivatives with More Variables	392
<b>Optimization</b>	<b>257</b>	11.7 Economic Applications	396
8.1 Introduction	257	11.8 Partial Elasticities	398
8.2 Simple Tests for Extreme Points	260	Review Problems for Chapter 11	400
8.3 Economic Examples	264	<b>12 Tools for Comparative</b>	
8.4 The Extreme Value Theorem	268	<b>Statics</b>	<b>403</b>
8.5 Further Economic Examples	274	12.1 A Simple Chain Rule	403
8.6 Local Extreme Points	279	12.2 Chain Rules for Many Variables	408
8.7 Inflection Points	285	12.3 Implicit Differentiation along	
Review Problems for Chapter 8	289	a Level Curve	412
		12.4 More General Cases	416

12.5 Elasticity of Substitution	420	15.6 Gaussian Elimination	554
12.6 Homogeneous Functions of Two Variables	423	15.7 Vectors	559
12.7 General Homogeneous and Homothetic Functions	427	15.8 Geometric Interpretation of Vectors	562
12.8 Linear Approximations	432	15.9 Lines and Planes	567
12.9 Differentials	436	Review Problems for Chapter 15	571
12.10 Systems of Equations	441	<b>16 Determinants and Inverse Matrices</b>	<b>573</b>
12.11 Differentiating Systems of Equations Review Problems for Chapter 12	444 450	16.1 Determinants of Order 2	573
<b>13 Multivariable Optimization</b>	<b>453</b>	16.2 Determinants of Order 3	576
13.1 Two Variables: Necessary Conditions	453	16.3 Determinants of Order $n$	580
13.2 Two Variables: Sufficient Conditions	458	16.4 Basic Rules for Determinants	583
13.3 Local Extreme Points	462	16.5 Expansion by Cofactors	588
13.4 Linear Models with Quadratic Objectives	467	16.6 The Inverse of a Matrix	591
13.5 The Extreme Value Theorem	474	16.7 A General Formula for the Inverse	597
13.6 Three or More Variables	479	16.8 Cramer's Rule	600
13.7 Comparative Statics and the Envelope Theorem	482	16.9 The Leontief Model	603
Review Problems for Chapter 13	486	Review Problems for Chapter 16	607
<b>14 Constrained Optimization</b>	<b>489</b>	<b>17 Linear Programming</b>	<b>609</b>
14.1 The Lagrange Multiplier Method	489	17.1 A Graphical Approach	609
14.2 Interpreting the Lagrange Multiplier	496	17.2 Introduction to Duality Theory	615
14.3 Several Solution Candidates	499	17.3 The Duality Theorem	619
14.4 Why the Lagrange Multiplier Method Works	501	17.4 A General Economic Interpretation	622
14.5 Sufficient Conditions	505	17.5 Complementary Slackness	624
14.6 More Variables and More Constraints	508	Review Problems for Chapter 17	629
14.7 Comparative Statics	514	<b>Appendix: Geometry</b>	<b>631</b>
14.8 Nonlinear Programming: A Simple Case	517	<b>The Greek Alphabet</b>	<b>633</b>
14.9 More on Nonlinear Programming	523	<b>Answers to the Problems</b>	<b>635</b>
Review Problems for Chapter 14	530	<b>Index</b>	<b>715</b>
<b>15 Matrix and Vector Algebra</b>	<b>533</b>		
15.1 Systems of Linear Equations	533		
15.2 Matrices and Matrix Operations	537		
15.3 Matrix Multiplication	540		
15.4 Rules for Matrix Multiplication	545		
15.5 The Transpose	551
