# Contents

<b>List of Tables</b>	<b>XIII</b>
<b>List of Figures</b>	<b>XV</b>
<b>I Utility and risk analysis</b>	<b>1</b>
<b>1 Utility theory</b>	<b>5</b>
1.1 Preferences under uncertainty. . . . .	7
1.1.1 Lotteries. . . . .	7
1.1.2 Axioms on preferences. . . . .	8
1.2 Expected utility. . . . .	9
1.3 Risk aversion. . . . .	11
1.3.1 Arrow-Pratt measures of risk aversion. . . . .	13
1.3.2 Standard utility functions. . . . .	15
1.3.3 Applications to portfolio allocation. . . . .	17
1.4 Stochastic dominance. . . . .	19
1.5 Alternative expected utility theory. . . . .	24
1.5.1 Weighted utility theory. . . . .	25
1.5.2 Rank dependent expected utility theory. . . . .	27
1.5.3 Non-additive expected utility. . . . .	32
1.5.4 Regret theory. . . . .	33
1.6 Further reading. . . . .	35
<b>2 Risk measures</b>	<b>37</b>
2.1 Coherent and convex risk measures. . . . .	37
2.1.1 Coherent risk measures. . . . .	38
2.1.2 Convex risk measures. . . . .	39
2.1.3 Representation of risk measures. . . . .	40
2.1.4 Risk measures and utility. . . . .	41
2.1.5 Dynamic risk measures. . . . .	43
2.2 Standard risk measures. . . . .	48
2.2.1 Value-at-Risk. . . . .	48
2.2.2 CVaR. . . . .	54
2.2.3 Spectral measures of risk. . . . .	59
2.3 Further reading. . . . .	62

<b>II</b>	<b>Standard portfolio optimization</b>	<b>65</b>
<b>3</b>	<b>Static optimization</b>	<b>67</b>
3.1	Mean-variance analysis . . . . .	68
3.1.1	Diversification effect . . . . .	68
3.1.2	Optimal weights. . . . .	71
3.1.3	Additional constraints. . . . .	78
3.1.4	Estimation problems. . . . .	82
3.2	Alternative criteria . . . . .	85
3.2.1	Expected utility maximization. . . . .	85
3.2.2	Risk measure minimization . . . . .	93
3.3	Further reading . . . . .	100
<b>4</b>	<b>Indexed funds and benchmarking</b>	<b>103</b>
4.1	Indexed funds. . . . .	103
4.1.1	Tracking error. . . . .	104
4.1.2	Simple index tracking methods. . . . .	105
4.1.3	The threshold accepting algorithm. . . . .	106
4.1.4	Cointegration tracking method. . . . .	112
4.2	Benchmark portfolio optimization. . . . .	117
4.2.1	Tracking-error definition. . . . .	118
4.2.2	Tracking-error minimization. . . . .	119
4.3	Further reading. . . . .	127
<b>5</b>	<b>Portfolio performance</b>	<b>129</b>
5.1	Standard performance measures. . . . .	130
5.1.1	The Capital Asset Pricing Model. . . . .	130
5.1.2	The three standard performance measures. . . . .	132
5.1.3	Other performance measures. . . . .	140
5.1.4	Beyond the CAPM. . . . .	145
5.2	Performance decomposition. . . . .	151
5.2.1	The Fama decomposition. . . . .	151
5.2.2	Other performance attributions. . . . .	153
5.2.3	The external attribution. . . . .	153
5.2.4	The internal attribution. . . . .	155
5.3	Further Reading. . . . .	163
<b>III</b>	<b>Dynamic portfolio optimization</b>	<b>165</b>
<b>6</b>	<b>Dynamic programming optimization</b>	<b>169</b>
6.1	Control theory. . . . .	169
6.1.1	Calculus of variations. . . . .	169
6.1.2	Pontryagin and Bellman principles. . . . .	175
6.1.3	Stochastic optimal control. . . . .	182
6.2	Lifetime portfolio selection. . . . .	187

6.2.1	The optimization problem. . . . .	187
6.2.2	The deterministic coefficients case. . . . .	188
6.2.3	The general case. . . . .	195
6.2.4	Recursive utility in continuous-time. . . . .	203
3	Further reading. . . . .	205
<b>Optimal payoff profiles and long-term management</b>		<b>207</b>
1	Optimal payoffs as functions of a benchmark. . . . .	207
7.1.1	Linear versus option-based strategy. . . . .	207
2	Application to long-term management. . . . .	214
7.2.1	Assets dynamics and optimal portfolios. . . . .	214
7.2.2	Exponential utility. . . . .	220
7.2.3	Sensitivity analysis. . . . .	223
7.2.4	Distribution of the optimal portfolio return. . . . .	225
3	Further reading. . . . .	226
<b>Optimization within specific markets</b>		<b>229</b>
1	Optimization in incomplete markets. . . . .	230
8.1.1	General result based on martingale method. . . . .	230
8.1.2	Dynamic programming and viscosity solutions. . . . .	238
2	Optimization with constraints. . . . .	242
8.2.1	General result. . . . .	242
8.2.2	Basic examples. . . . .	249
3	Optimization with transaction costs. . . . .	256
8.3.1	The infinite-horizon case. . . . .	256
8.3.2	The finite-horizon case. . . . .	260
4	Other frameworks. . . . .	263
8.4.1	Labor income. . . . .	263
8.4.2	Stochastic horizon. . . . .	272
5	Further reading. . . . .	276
<b>Structured portfolio management</b>		<b>279</b>
<b>Portfolio insurance</b>		<b>281</b>
11	The Option Based Portfolio Insurance. . . . .	282
9.1.1	The standard OBPI method. . . . .	284
9.1.2	Extensions of the OBPI method. . . . .	286
12	The Constant Proportion Portfolio Insurance. . . . .	294
9.2.1	The standard CPPI method. . . . .	295
9.2.2	CPPI extensions. . . . .	303
13	Comparison between OBPI and CPPI. . . . .	305
9.3.1	Comparison at maturity. . . . .	305
9.3.2	The dynamic behavior of OBPI and CPPI. . . . .	310
14	Further reading. . . . .	318

<b>10 Optimal dynamic portfolio with risk limits</b>	<b>319</b>
10.1 Optimal insured portfolio: discrete-time case. . . . .	321
10.1.1 Optimal insured portfolio with a fixed number of assets	321
10.1.2 Optimal insured payoffs as functions of a benchmark .	326
10.2 Optimal Insured Portfolio: the dynamically complete case . .	333
10.2.1 Guarantee at maturity. . . . .	333
10.2.2 Risk exposure and utility function. . . . .	335
10.2.3 Optimal portfolio with controlled drawdowns. . . . .	337
10.3 Value-at-Risk and expected shortfall based management . . . .	340
10.3.1 Dynamic safety criteria . . . . .	340
10.3.2 Expected utility under VaR/CVaR constraints . . . . .	347
10.4 Further reading . . . . .	350
<b>11 Hedge funds</b>	<b>351</b>
11.1 The hedge funds industry. . . . .	351
11.1.1 Introduction. . . . .	351
11.1.2 Main strategies. . . . .	352
11.2 Hedge fund performance. . . . .	354
11.2.1 Return distributions. . . . .	354
11.2.2 Sharpe ratio limits . . . . .	355
11.2.3 Alternative performance measures. . . . .	362
11.2.4 Benchmarks for alternative investment . . . . .	368
11.2.5 Measure of the performance persistence. . . . .	369
11.3 Optimal allocation in hedge funds. . . . .	370
11.4 Further reading . . . . .	371
<b>A Appendix A: Arch Models</b>	<b>373</b>
<b>B Appendix B: Stochastic Processes</b>	<b>381</b>
