Contents

Part I Foundations

Introduction . . . 3
1.1 An Introduction to This Book . . . 3
1.2 An Introduction to Financial Economics . . . 5
1.2.1 Trade and Valuation in Financial Markets . . . 5
1.2.2 No Arbitrage and No Excess Returns . . . 7
1.2.3 Market Efficiency . . . 8
1.2.4 Equilibrium . . . 9
1.2.5 Aggregation and Comparative Statics . . . 10
1.2.6 Time Scale of Investment Decisions . . . 10
1.2.7 Behavioral Finance . . . 11
1.3 An Introduction to the Research Methods . . . 12

Decision Theory . . . 15
2.1 Fundamental Concepts . . . 16
2.2 Expected Utility Theory . . . 20
2.2.1 Origins of Expected Utility Theory . . . 20
2.2.2 Axiomatic Definition . . . 28
2.2.3 Which Utility Functions are "Suitable"? . . . 36
2.2.4 Measuring the Utility Function . . . 43
2.3 Mean-Variance Theory . . . 47
2.3.1 Definition and Fundamental Properties . . . 47
2.3.2 Success and Limitation . . . 48
2.4 Prospect Theory . . . 52
2.4.1 Origins of Behavioral Decision Theory . . . 53
2.4.2 Original Prospect Theory . . . 56
2.4.3 Cumulative Prospect Theory . . . 60
2.4.4 Choice of Value and Weighting Function . . . 67
2.4.5 Continuity in Decision Theories* . . . 71
2.4.6 Other Extensions of Prospect Theory* . . . 73

2.5 Connecting EUT, Mean-Variance Theory and PT . . . 75
2.6 Ambiguity and Uncertainty* . . . 80
2.7 Time Discounting . . . 82
2.8 Summary . . . 85
2.9 Tests and Exercises . . . 86
2.9.1 Tests . . . 86
2.9.2 Exercises . . . 89

Part II Financial Markets

3 Two-Period Model: Mean-Variance Approach . . . 95
3.1 Geometric Intuition for the CAPM . . . 96
3.1.1 Diversification . . . 97
3.1.2 Efficient Frontier . . . 99
3.1.3 Optimal Portfolio of Risky Assets with a Riskless Security . . . 99
3.1.4 Mathematical Analysis of the Minimum-Variance Opportunity Set* . . . 100
3.1.5 Two-Fund Separation Theorem . . . 105
3.1.6 Computing the Tangent Portfolio . . . 106
3.2 Market Equilibrium . . . 107
3.2.1 Capital Asset Pricing Model . . . 107
3.2.2 Application: Market Neutral Strategies . . . 108
3.2.3 Empirical Validity of the CAPM . . . 109
3.3 Heterogeneous Beliefs and the Alpha . . . 110
3.3.1 Definition of the Alpha . . . 112
3.3.2 CAPM with Heterogeneous Beliefs . . . 116
3.3.3 Zero Sum Game . . . 120
3.3.4 Active or Passive? . . . 124
3.4 Alternative Betas and Higher Moment Betas . . . 126
3.4.1 Alternative Betas . . . 127
3.4.2 Higher Moment Betas . . . 128
3.4.3 Deriving a Behavioral CAPM . . . 130
3.5 Summary . . . 135
3.6 Tests and Exercises . . . 136
3.6.1 Tests . . . 136
3.6.2 Exercises . . . 139

4 Two-Period Model: State-Preference Approach . . . 141
4.1 Basic Two-Period Model . . . 141
4.1.1 Asset Classes . . . 142
4.1.2 Returns . . . 143
4.1.3 Investors . . . 145
4.1.4 Complete" and Incomplete Markets . . . 151
4.1.5 What Do Agents Trade? . . . 152

4.2 No-Arbitrage Condition . . . 152
4.2.1 Introduction . . . 152
4.2.2 Fundamental Theorem of Asset Prices . . . 154
4.2.3 Pricing of Derivatives . . . 160
4.2.4 Limits to Arbitrage . . . 162
4.3 Financial Markets Equilibria . . . 167
4.3.1 General Risk-Return Tradeoff . . . 168
4.3.2 Consumption Based CAPM . . . 169
4.3.3 Definition of Financial Markets Equilibria . . . 170
4.3.4 Intertemporal Trade . . . 174
4.4 Special Cases: CAPM, APT and Behavioral CAPM . . . 177
4.4.1 Deriving the CAPM by 'Brutal Force of Computations' . . . 178
4.4.2 Deriving the CAPM from the Likelihood Ratio Process . . . 180
4.4.3 Arbitrage Pricing Theory . . . 182
4.4.4 Deriving the APT in the CAPM with Background Risk . . . 183
4.4.5 Behavioral CAPM . . . 184
4.5 Pareto Efficiency . . . 185
4.6 Aggregation . . . 188
4.6.1 Anything Goes and the Limitations of Aggregation . . . 188
• 4.6.2 A Model for Aggregation of Heterogeneous Beliefs, Risk- and Time Preferences . . . 194
4.6.3 Empirical Properties of the Representative Agent . . . 195
4.7 Dynamics and Stability of Equilibria . . . 201
4.8 Summary . . . 206
4.9 Tests and Exercises . . . 207
4.9.1 Tests . . . 207
4.9.2 Exercises . . . 209

Multiple-Periods Model . . . 221
5.1 The General Equilibrium Model . . . 221
5.2 Complete and Incomplete Markets . . . 226
5.3 Term Structure of Interest . . . 228
5.3.1 Term Structure without Risk . . . 229
5.3.2 Term Structure with Risk . . . 232
5.4 Arbitrage in the Multi-Period Model . . . 234
5.4.1 Fundamental Theorem of Asset Pricing . . . 234
5.4.2 Consequences of No-Arbitrage . . . 236
5.4.3 Applications to Option Pricing . . . 236
5.4.4 Stock Prices as Discounted Expected Payoffs . . . 238
5.4.5 Equivalent Formulations of the No-Arbitrage Principle . . . 239
5.4.6 Ponzi Schemes and Bubbles . . . 240

5.5 Pareto Efficiency . . . 244
5.5.1 First Welfare Theorem . . . 244
5.5.2 Aggregation . . . 245
5.6 Dynamics of Price Expectations . . . 246
5.6.1 What is Momentum? . . . 246
5.6.2 Dynamical Model of Chartists and Fundamentalists . . . 247
5.7 Survival of the Fittest on Wall Street . . . 252
5.7.1 Market Selection Hypothesis with Rational Expectations . . . 252
5.7.2 Evolutionary Portfolio Theory . . . 253
5.7.3 Evolutionary Portfolio Model . . . 254
5.7.4 The Unique Survivor: A* . . . 258
5.8 Summary . . . 259
5.9 Tests and Exercises . . . 259
5.9.1 Tests . . . 259
5.9.2 Exercises . . . 260

Part III Advanced Topics

6 Theory of the Firm* . . . T . . . 267
6.1 Basic Model . . . 267
6.2 Modigliani-Miller Theorem . . . 274
6.2.1 When Does the Modigliani-Miller Theorem Not Hold? . . . 277
6.3 Firm's Decision Rules . . . 278
6.3.1 Fisher Separation Theorem . . . 278
6.3.2 The Theorem of Dreze . . . 282
6.4 Summary . . . 285

7 Information Asymmetries on Financial Markets* . . . 287
7.1 Information Revealed by Prices . . . 288
7.2 Information Revealed by Trade . . . 290
7.3 Moral Hazard . . . 292
7.4 Adverse Selection . . . 293
7.5 Summary . . . 295

8 Time-Continuous Model . . . 297
8.1 A Rough Path to the Black-Scholes Formula . . . 298
8.2 Brownian Motion and Ito Processes . . . 301
8.3 A Rigorous Path to the Black-Scholes Formula . . . 304
8.3.1 Derivation of the Black-Scholes Formula for Call Options . . . 304
8.3.2 Put-Call Parity . . . 307

8.4 Exotic Options and the Monte Carlo Method . . . 308
8.5 Connections to the Multi-Period Model . . . 310
8.6 Time-Continuity and the Mutual Fund Theorem . . . 315
8.7 Market Equilibria in Continuous Time . . . 318
8.8 Limitations of the Black-Scholes Model and Extensions . . . 321
8.8.1 Volatility Smile and Other Unfriendly Effects . . . 321
8.8.2 Not Normal: Alternatives to Normally Distributed Returns . . . 322
8.8.3 Jumping Up and Down: Levy Processes . . . 327
8.8.4 Drifting Away: Heston and GARCH Models . . . 329
8.9 Summary . . . 332

Appendices

Mathematics . . . 335
A.I Linear Algebra . . . 335
A.2 Basic Notions of Statistics . . . 338
A.3 Basics in Topology . . . 341
A.4 How to Use Probability Measureg . . . 343
A.5 Calculus, Fourier Transformations and Partial Differential Equations . . . 347
A.6 General Axioms for Expected Utility Theory . . . 351

Solutions to Tests and Exercises . . . 355

References . . . 357

Index . . . 367
