Dry Construction

Contents

7	<i>Introduction</i>
11	<i>Materials for dry construction</i>
	<i>Principles of design and construction</i>
	<i>Wall systems</i>
22	Wall systems in dry construction
25	Structural and constructional requirements for non-loadbearing lightweight partitions
27	Building physics requirements
31	Junctions and details
	<i>Ceiling systems</i>
40	Components and construction
41	Design requirements
42	Applications
43	Ceiling systems using gypsum boards
48	Grid ceiling systems
55	Cooling ceilings
	<i>Flooring systems</i>
56	Dry subfloors
60	Hollow floor systems
60	Raised access floor systems
64	Mechanical requirements to be met by floor systems
65	Thermal and moisture requirements
65	Acoustic requirements
66	Fire protection requirements
68	Electrostatic requirements
	<i>Fire-resistant casing systems</i>
69	Beam and column casings
70	Ventilation, cable and service ducts
	<i>Interior design and surface finishes</i>
75	From flat surfaces to free forms
79	Surface finish requirements and qualities
83	Bathrooms and wet areas
	<i>Case studies for dry construction</i>
91	Overview
92	Presentation centre in Bad Driburg
95	Architectural setting and Berlinale Lounge in Berlin
96	Medical practice in Frankfurt
97	Synagogue in Bochum
98	Dental practice in Berlin
102	Rooftop extension in Frankfurt
105	Museum in Herford
	<i>Appendix</i>
107	Standards, directives
108	Associations, manufacturers, bibliography
110	Index
112	Picture credits
