Building with Steel

Contents

7	<i>Introduction</i>
	<i>Example A - Single-storey shed</i>
8	Overview
10	Structure/Envelope
12	Details, scale 1:20
	<i>Example B - Extension</i>
20	Overview
22	Structure/Envelope
24	Details, scale 1:20
30	<i>Designing the loadbearing structure</i>
31	The evolution of a loadbearing structure
32	Steel production
33	Mechanical properties
34	Structural systems, structural elements
42	Grids, geometrical arrangement
43	Transport and erection
	<i>Assembling and connecting</i>
45	Introduction
46	Means of connection
48	Columns/Beams
52	Column base/Column-beam connection
54	Bracing
56	Examples
	<i>Semi-finished products of steel</i>
65	Sections, bars and wires
68	Plates and sheets
73	Open-grid flooring, fabrics, meshes
76	Wire ropes/Tie bar systems
	<i>Corrosion protection, fire protection, building performance</i>
79	Corrosion protection
84	Fire protection/Thermal performance/Acoustic performance
	<i>Case studies in steel</i>
87	Overview
88	Private house in Oldenburg
90	Pretensioned strip bridge in the Via Mala gorge
92	Additional storey in Stuttgart
94	Private house with medical practice in Saugau
96	Restaurant and casino in Dresden
98	Conversion of mine building in PeiBenberg
100	Private house in Dornbirn
102	Hinzert documentation pavilion
	<i>Appendix</i>
104	Tables
109	Standards and directives/Associations
110	Manufacturers/Further reading
111	Index
112	Picture credits
