List of Figures and Tables	xi
List of Abbreviations	xiii
Preface	xiv
How to use this book	xv
Acknowledgements	xviii
1. Introduction	1
Aims of this book	1
The IS and computing disciplines	1
Evidence-based practice	2
The Internet and research	4
What is research?	4
Let's have an argument!	7
Evaluating research	8
'I just want to develop a computer-based system'	9
Rigour and relevance in research	10
The 6Ps of research	11
Structure of this book	13
Practical work	14
Further reading	14
References	14
2. The Purpose and Products of Research	16
Reasons for doing research	16
Possible products - the outcomes of research	21
Finding and choosing research topics	25
'I write therefore I think'	28
Evaluating the purpose and products of research	29
Practical work	30
Further reading	30
References	31
3. Overview of the Research Process	32
A model of the research process	33
Alternative models of the research process	39

Evaluating the research process	40
Practical work	41
Further reading	41
References	41
4. Internet Research	43
Background to the Internet and World Wide Web	43
Internet research topics	45
The Internet and a literature review	47
The Internet and research strategies and methods	47
Internet research, the law and ethics	51
Practical work	52
Further reading	52
References	52
5. Participants and Research Ethics	54
The law and research	55
Rights of people directly involved	" 55
Responsibilities of an ethical researcher	60
Design and creation projects and ethics	63
Internet research and ethics	64
'It's not that simple!'	65
Evaluating research ethics	67
Practical work	68
Further reading	69
References	69
6. Reviewing the Literature	71
Purpose of a literature review	71
Literature resources	73
The Internet and literature reviews	79
Conducting a literature review	80
Evaluating literature reviews	90
Practical work	90
Further reading	91
References	92
7. Surveys	93
Defining surveys	93
Planning and designing surveys	94
Grounded theory and surveys	101
The Internet and surveys	102

Examples of surveys in IS and computing research	103
Evaluating survey-based research	104
Practical work	106
Further reading	106
References	107
8. Design and Creation	108
Defining design and creation	108
Planning and conducting design and creation research	111
Creative computing and digital art	118
The Internet and design and creation research	119
Examples of design and creation research in IS and computing	120
Evaluating design and creation research	121
Practical work	123
Further reading	123
References	124
9. Experiments	126
Defining experiments	126
Planning and conducting experiments	128
The Internet and experiments	135
Examples of experiments in IS and computing research	136
Evaluating experiment-based research	137
Practical work	139
Further reading	139
References	140
10. Case Studies	141
Defining case studies	141
Planning and conducting case studies	143
The Internet and case studies	148
Examples of case studies in IS and computing research	149
Evaluating case study-based research	150
Practical work	151
Further reading	152
References	152
11. Action Research	154
Defining action research	154
Planning and conducting action research	156
Developments in action research	161
The Internet and action research	166
Examples of action research in IS and computing	167

Evaluating action research	168
Practical work	169
Further reading	170
References	170
12. Ethnography	173
Defining ethnography	173
Planning and conducting an ethnography	175
The Internet and ethnography	180
Examples of ethnography in IS and computing research	180
Evaluating ethnography-based research	181
Practical work	183
Further reading	183
References	184
13. Interviews	186
Defining interviews	186
Planning and conducting interviews	187
Group interviews	194
Internet-based interviews	196
Examples of interviews in IS and computing research	197
Evaluating interview-based research	198
Practical work	200
Further reading	201
References	201
14. Observations	202
Defining observations	202
Planning and conducting systematic observation	204
Planning and conducting participant observation	208
The Internet and observation	212
Examples of observations in IS and computing research	213
Evaluating observation-based research	214
Practical work	216
Further reading	217
References	217
15. Questionnaires	219
Defining questionnaires	219
Planning and designing questionnaires	220
The Internet and questionnaires	228
Examples of questionnaires in IS and computing research	229

Evaluating questionnaire-based research	229
Practical work	231
Further reading	231
References	232
16. Documents	233
Defining documents	233
Planning and conducting document-based research	235
The Internet and document-based research	239
Examples of documents in IS and computing research	240
Evaluating document-based research	241
Practical work	242
Further reading	243
References	243
17. Quantitative Data Analysis	245
Defining quantitative data analysis	245
Types of quantitative data	246
Data coding	248
Visual aids for quantitative data analysis	249
Using statistics for quantitative data analysis	254
Interpretation of data analysis results	262
Evaluating quantitative data analysis	263
Practical work	264
Further reading	265
References	265
18. Qualitative Data Analysis	266
Introduction	266
Analysing textual data	267
Analysing non-textual qualitative data	273
Grounded theory	274
Computer-aided qualitative analysis	276
Evaluating qualitative data analysis	277
Practical work	278
Further reading	279
References	279
19. Philosophical Paradigms - Positivism	281
'Do I have to study this philosophical, airy-fairy stuff?'	281
Positivism and the scientific method	283
Criticisms of positivism	288

Evaluating positivist research	289
Practical work	290
Further reading	290
References	290
20. Alternative Philosophical Paradigms	291
Introduction	291
Interpretivism	292
Critical research	296
Linking research strategies to philosophical paradigms	299
Which paradigm to choose?	303
Evaluating interpretive and critical research	305
Practical work	305
Further reading	305
References	306
21. Presentation of the Research	309
Writing up the research	309
Conference paper presentations	- 314
Posters and exhibitions	318
Software demonstrations	319
Presenting yourself	319
PhD vivas	320
Evaluating presentations	322
Practical work	323
Further reading	323
References	323
Final Words	325
Index	326
