# Contents

1. **Difference Equations**
   1.1. First-Order Difference Equations 1
   1.2. pth-Order Difference Equations 7

   **APPENDIX 1.A. Proofs of Chapter 1 Propositions** 21

2. **Lag Operators** 25
   2.1. Introduction 25
   2.2. First-Order Difference Equations 27
   2.3. Second-Order Difference Equations 29
   2.4. pth-Order Difference Equations 33
   2.5. Initial Conditions and Unbounded Sequences 36

3. **Stationary ARMA Processes** 43
   3.1. Expectations, Stationarity, and Ergodicity 43
   3.2. White Noise 47
   3.3. Moving Average Processes 48
   3.4. Autoregressive Processes 53
   3.5. Mixed Autoregressive Moving Average Processes 59
3.6. The Autocovariance-Generating Function 61
3.7. Invertibility 64

APPENDIX 3. A. Convergence Results for Infinite-Order Moving Average Processes 69
Exercises 70 References 71

4 Forecasting 72
4.1. Principles of Forecasting 72
4.2. Forecasts Based on an Infinite Number of Observations 77
4.3. Forecasts Based on a Finite Number of Observations 85
4.4. The Triangular Factorization of a Positive Definite Symmetric Matrix 87
4.5. Updating a Linear Projection. 92
4.6. Optimal Forecasts for Gaussian Processes 100
4.7. Sums of ARMA Processes 102
4.8. Wold's Decomposition and the Box-Jenkins Modeling Philosophy 108

APPENDIX 4.A. Parallel Between OLS Regression and Linear Projection 113
APPENDIX 4.B. Triangular Factorization of the Covariance Matrix for an MA(1) Process 114
Exercises 115 References 116

5 Maximum Likelihood Estimation 117
5.1. Introduction 117
5.2. The Likelihood Function for a Gaussian AR(1) Process 118
5.3. The Likelihood Function for a Gaussian AR(p) Process 123
5.4. The Likelihood Function for a Gaussian MA(1) Process 127
5.5. The Likelihood Function for a Gaussian MA(q) Process 130
5.6. The Likelihood Function for a Gaussian ARMA(p, q) Process 132
5.7. Numerical Optimization 133

VI Contents
5.8. Statistical Inference with Maximum Likelihood Estimation 142
5.9. Inequality Constraints 146

APPENDIX 5.A. Proofs of Chapter 5 Propositions 148
Exercises 150 References 150

6 Spectral Analysis 152
6.1. The Population Spectrum 152
6.2. The Sample Periodogram 158
6.4. Uses of Spectral Analysis 167

APPENDIX 6.A. Proofs of Chapter 6 Propositions 172
Exercises 178 References 178

7 Asymptotic Distribution Theory 180
7.1. Review of Asymptotic Distribution Theory 180
7.2. Limit Theorems for Serially Dependent Observations 186

APPENDIX 7.A. Proofs of Chapter 7 Propositions 195
Exercises 198 References 199

8 Linear Regression Models 200
8.1. Review of Ordinary Least Squares with Deterministic Regressors and i.i.d. Gaussian Disturbances 200
8.2. Ordinary Least Squares Under More General Conditions 207
8.3. Generalized Least Squares 220

APPENDIX 8. A. Proofs of Chapter 8 Propositions 228
Exercises 230 References 231

9 Linear Systems of Simultaneous Equations 233
9.1. Simultaneous Equations Bias 233
9.2. Instrumental Variables and Two-Stage Least Squares 238
9.3. Identification 243
9.4. Full-Information Maximum Likelihood Estimation 247
9.5. Estimation Based on the Reduced Form 250
9.6. Overview of Simultaneous Equations Bias 252

APPENDIX 9.A. Proofs of Chapter 9 Proposition 253
Exercise 255 References 256

10 Covariance-Stationary Vector Processes 257

10.1. Introduction to Vector Autoregressions 257
10.2. Autocovariances and Convergence Results for Vector Processes 261
10.3. The Autocovariance-Generating Function for Vector Processes 266
10.4. The Spectrum for Vector Processes 268
10.5. The Sample Mean of a Vector Process 279

APPENDIX 10.A. Proofs of Chapter 10 Propositions 285
Exercises 290 References 290

11 Vector Autoregressions 291

11.1. Maximum Likelihood Estimation and Hypothesis Testing for an Unrestricted Vector Autoregression 291
11.2. Bivariate Granger Causality Tests 302
11.3. Maximum Likelihood Estimation of Restricted Vector Autoregressions 309
11.4. The Impulse-Response Function 318
11.5. Variance Decomposition 323
11.6. Vector Autoregressions and Structural Econometric Models 324
11.7. Standard Errors for Impulse-Response Functions 336

APPENDIX 11.A. Proofs of Chapter 11 Propositions 340
APPENDIX 11. B. Calculation of Analytic Derivatives 344
Exercises 348 References 349
15.3. Comparison of Trend-Stationary and Unit Root Processes 438
15.4. The Meaning of Tests for Unit Roots 444
15.5. Other Approaches to Trended Time Series 447

APPENDIX 15.A. Derivation of Selected Equations for Chapter 15 451
References 452

16 Processes with Deterministic Time Trends 454
16.1. Asymptotic Distribution of OLS Estimates of the Simple Time Trend Model 454
16.2. Hypothesis Testing for the Simple Time Trend Model 461
16.3. Asymptotic Inference for an Autoregressive Process Around a Deterministic Time Trend 463

APPENDIX 16.A. Derivation of Selected Equations for Chapter 16 472
Exercises 474 References 474

17 Univariate Processes with Unit Roots 475
17A. Introduction 475
17.2. Brownian Motion 477
17.3. The Functional Central Limit Theorem 479
17.4. Asymptotic Properties of a First-Order Autoregression when the True Coefficient Is Unity 486
17.5. Asymptotic Results for Unit Root Processes with General Serial Correlation 504
17.6. Phillips-Perron Tests for Unit Roots 506
17.7. Asymptotic Properties of a pth-Order Autoregression and the Augmented Dickey-Fuller Tests for Unit Roots 516
17.8. Other Approaches to Testing for Unit Roots 531
17.9. Bayesian Analysis and Unit Roots 532

APPENDIX 17.A. Proofs of Chapter 17 Propositions 534
Exercises 537 References 541

X Contents
18  Unit Roots in Multivariate Time Series  544

18.1. Asymptotic Results for Nonstationary Vector Processes 544
18.2. Vector Autoregressions Containing Unit Roots 549
18.3. Spurious Regressions 557

APPENDIX 18. A. Proofs of Chapter 18 Propositions 562
Exercises 568  References 569

19  Cointegration  571

19.1. Introduction 571
19.2. Testing the Null Hypothesis of No Cointegration 582
19.3. Testing Hypotheses About the Cointegrating Vector 601

APPENDIX 19.A. Proofs of Chapter 19 Propositions 618
Exercises 625  References 627

20  Full-Information Maximum Likelihood Analysis of Cointegrated Systems  630

20.1. Canonical Correlation 630
20.2. Maximum Likelihood Estimation 635
20.3. Hypothesis Testing 645
20.4. Overview of Unit Roots—To Difference or Not to Difference? 651

APPENDIX 20. A. Proofs of Chapter 20 Propositions 653
Exercises 655  References 655

21  Time Series Models of Heteroskedasticity  657

21.1. Autoregressive Conditional Heteroskedasticity (ARCH) 657
21.2. Extensions 665

APPENDIX 21.A. Derivation of Selected Equations for Chapter 21  673
References 674
