

Six Sigma for Sustainability

How Organizations Design and
Deploy Winning Environmental Programs

CONTENTS

Prologue	xv	
Introduction	xxiii	
Acknowledgments	xxix	
A Letter from the Next Generation	xxxi	
CHAPTER 1	Developing the Business Case	1
	Who Should Address This Challenge?	2
	Developing the Sustainability Business Case at the Company Level	4
	<i>Workforce</i>	6
	<i>Customers</i>	7
	<i>Regulations</i>	8
	Developing the Sustainability Business Case at the Project Level	12
	Chapter Summary—Key Points	18
	Notes	19
CHAPTER 2	Sustainability and the Collaborative Management Model	21
	The Paradox	21
	New Levels of Organizational Complexity	22
	Evolution of the Six Sigma Leadership Framework	26
	Six Sigma as a Leadership Framework	27
	The Collaborative Leadership and Governance Model	30
	Developing a Set of Leadership and Management Practices	31
	<i>Annual Planning and Strategy</i> <i>Development Workshop</i>	33
	<i>CMT Strategic Planning Dialogue Agenda</i>	33

	<i>Midpoint Dialogue Session</i>	33
	<i>Weekly Reviews and Alerts Dialogue</i>	34
	Collaborative Management Process Summary	34
	The Need for Real-Time Performance Data	34
	The Role of the Facilitator/Coach	35
	Moving from Model to Practical Application	36
	The Key to Breakthrough Performance	36
	<i>The Need for Discipline and a Collaborative Leadership Environment</i>	43
	Chapter Summary—Key Points	45
CHAPTER 3	The Sustainability Transfer Function	47
	Transfer Functions and Why They Are Important	47
	Building the Sustainability Transfer Function	49
	The Transfer Function for Office Waste	53
	The Role of Location	58
	The Transfer Function for Office Water	61
	Conclusion	64
	Chapter Summary—Key Points	65
	Notes	65
CHAPTER 4	Sustainability Measurement and Reporting	67
	Reporting Overview	68
	Benefits and Drivers for Reporting	69
	<i>Brand</i>	72
	<i>Track Progress toward Goals</i>	72
	<i>Regulatory Compliance</i>	72
	<i>Shareholder Pressure/Securities and Exchange Commission (SEC) Guidance</i>	74
	Reporting and Measurement Standards/Protocols	75
	<i>The Greenhouse Gas Protocol</i>	76
	<i>The Global Reporting Initiative (GRI)</i>	78
	<i>The Climate Registry</i>	80
	<i>The Carbon Disclosure Project (CDP)</i>	81
	<i>International Standards Organization (ISO)</i>	83
	Process and/or Tools	83

Consider Business Goals 84
Consider GHG Accounting Principles 85
Define Organizational Boundaries 85
Define Operational Boundaries 86
Select Base Year 86
Identify Emissions Sources/Calculate Emissions . . . 86
Verify Inventory 87
Reporting Emissions 87
Establish a GHG Reduction Target 87
 Examples of Voluntary Reporting Initiatives 88
 Sustainability Investment-Rating Agencies 88
 Buildings 90
 Chapter Summary—Key Points 93

CHAPTER 5

**Transformational Change and
 the Power of Teams** 95
 Why Green Project Teams Fail 96
 Uncertainty of Purpose, Lack of Goal Clarity 96
 Narrow Focus 97
 Lack of Authority 97
 *Insufficient Data and Tools for Analyzing
 the Data* 98
 Weak Leadership 98
 Eliminating the Potential Failure Modes 98
 The Six Sigma Methodology for Driving
 Team Success 99
 *Development of Detailed, One-Page
 Team Charters* 99
 Business Case 100
 Opportunity Statement 100
 Goal Statement 101
 Project Scope 102
 Team Selection 102
 Team Charter Evaluation 103
 Establishing a Supporting Leadership Structure 103
 Sponsors 103
 Champions 104

<i>Team Leader</i>	105
Adoption of a Consistent Team Problem-Solving	
Model Known as DMAIC	105
<i>Define</i>	106
<i>Measure</i>	107
<i>Analyze</i>	109
<i>Improve</i>	111
<i>Control</i>	113
Blitz Teams	115
Summary of DMAIC	116
Change Management	116
Do You Change or Just Think about Change?	117
Myriad Theories, Universal Formula	118
<i>Create a Shared Need</i>	119
<i>Shape a Vision</i>	119
<i>Mobilize Commitment</i>	121
<i>Monitor Progress</i>	121
<i>Make the Change Last</i>	121
Organized for Change	126
Leading Change	127
Six Sigma Integrated Team Framework as a Model	
for Driving Transformational Change	128
<i>Sponsors' Launch</i>	128
<i>Champions' Launch</i>	133
<i>Project Launch</i>	134
DMAIC, Blitz Teams, Organization-Wide Adoption ..	135
Putting It All Together	135
The Six Sigma Methodology Applied to	
Sustainability Projects	136
<i>Background</i>	136
<i>Define</i>	136
<i>Measure</i>	137
<i>Analyze</i>	137
<i>Improve</i>	138
<i>Control</i>	139
Chapter Summary—Key Points	140
Note	141

CHAPTER 6	Sustainability and Real Estate	143
	Real Estate Decisions Relating to Energy and the Environment	146
	The Right Steps in the Right Order	147
	Reduce Your Space Requirements	149
	Factor Carbon into Location Decisions	150
	<i>Transportation</i>	151
	<i>Energy and Water Consumption</i>	151
	<i>Electrical Power Sources</i>	151
	<i>Site Selection for New Space</i>	151
	<i>Physical Risk of Climate Change</i>	152
	Apply Green Standards to New Buildings or Space	153
	Existing Building Operations and Retrofits	156
	Engage Employees in Support of Green Initiatives	158
	Green Leasing	160
	Financing Multitenant Building Retrofits and Existing Lease Constraints	165
	Measuring Success and Environmental Reporting	166
	Chapter Summary—Key Points	167
	Notes	168
CHAPTER 7	Six Sigma Sustainability Project Examples	169
	Selecting Projects	169
	Example Project: Reducing Cost and Carbon Through Energy Efficiency in Office Buildings	171
	Example Project: Reducing the Environmental Impact of Company Office Space through Increased Office Space Agility	177
	Example Project: Greening Leased Space	186
	<i>Define</i>	187
	<i>Measure</i>	188
	<i>Analyze</i>	189
	<i>Improve</i>	189
	<i>Control</i>	190
	Chapter Summary—Key Points	190
	Notes	190

CHAPTER 8	Design for Six Sigma	193
	Designing the Corporate Sustainability Program	
	Using the House of Quality	195
	Step 1: <i>Identify and Prioritize Customer Requirements</i>	195
	Step 2: <i>Translate Customer Requirements into Measurements That Reflect Those Requirements</i>	197
	Step 3: <i>Set Performance Targets</i>	198
	Step 4: <i>Identify Critical Process Features Required to Achieve Performance Targets</i>	200
	Step 5: <i>Design the Processes That Will Meet the Critical Features</i>	204
	Design and Innovation in Projects Using DMADV	208
	Measure Phase: Operational Definitions	213
	Chapter Summary—Key Points	221
CHAPTER 9	Stakeholder Management	223
	Defining Stakeholder Management	225
	Understanding Stakeholder Needs	225
	Converting Needs to Requirements	226
	<i>The Stakeholder’s Type and Level of Influence on the Sustainability Project/Initiative</i>	230
	<i>Assignment of a Team Member to Own a Stakeholder Relationship and Drive the Strategy</i>	232
	<i>Likelihood/Degree of Stakeholder Support/Opposition to a Project and Associated Factors</i> ..	235
	The Web of Stakeholder Groups	237
	Conclusion	242
	Chapter Summary—Key Points	243
	Notes	244
CONCLUSION	Letters to Tomorrow’s Corporate Leaders	245
	Letter to Tomorrow’s Chief Sustainability Officer	245
	Letter to Tomorrow’s Corporate Real Estate Leader ..	247
