

Construction and Design Manual Architectural Photography

Axel Hausberg/Anton Simons

With additional contributions by
Christoph GbUmann and Florian Meuser

Contents

PREFACE

ARCHITECTURE AND PHOTOGRAPHY

- What is architectural photography
- 9 What makes a good architectural photograph
- 10 Who this book is aimed at
- 10 - How this book is structured

CHAPTER 1

THE HISTORY OF ARCHITECTURAL PHOTOGRAPHY

- 16- Early technology
- 23 The beginnings of architectural photography
- 26 Pictorialism
- 34 Straight photography
- 37 *Neue Sachlichkeit*
- 45 •The postwar period

CHAPTER 2

OPTICAL PRINCIPLES

- 54 Lenses and focal lengths
- 55" Image circles
- 55 Stitching
- 57 360-degree panoramas
- 57 Shifting, swinging and tilting
- 57 Framing and perspective
- 60 Adjusting perspective
- 60 Correcting horizontal lines
- 63 Contrast
- 64 High dynamic range imaging
- 68 • Resolution and sharpness
- 68 -.Depth of field
- 71- • Increasing depth of field using the Scheimpflug principle

CHAPTER 3

EQUIPMENT

- 92 — Photographic disciplines
- 93 — Architectural photography with a small-format camera
- 95 — The view camera
- 97 — Digital backs
- 103 — Lenses for analogue and digital architectural photography
- 109 — The tripod
- 110 — The tripod head

CHAPTERS
PHOTOGRAPHIC PRACTICE

- 119 • Realisation
- 136 • Light and lighting
- 166 Exposure metering
- 169 The RAW format

CHAPTER 5
COMPOSITION

- 173 — Subject
- 173 — Camera viewpoint, angle of view and distance from the subject
- 173 — Focal length
- 178 — Aperture and depth of field
- 178 — Image formats
- 178 — Foreground, middle distance and background
- 179 — The Golden Ratio
- 179 — The art of using lines

CHAPTER 6
POST-PROCESSING

- 196 Developing
- 197 Scanning
- 199 Image editing
- 208 Finishing

CHAPTER 7
COLOUR MANAGEMENT

- 224 — Camera calibration
- 225 — Calibration of the development process
- 225 — Monitor calibration
- 228 — Scanner calibration
- 228 — Printer calibration

CHAPTER 8
**COMPOSITION AND ARTIFICIAL WORLDS,
MODEL PHOTOGRAPHY, PHOTOGRAMMETRY**

- 234 Computer-generated imaging
- 234 Photogrammetry
- 234 Model photography

CHAPTER 9
EQUIPMENT TIPS

- 244 Cameras
- 244 Lenses
- 245 Flash equipment
- 248 Accessories
- 248 Developing equipment
- 248 • Computers and monitors
- 248 Scanner and scanning software
- 249 Printers
- 249 Image processing software

CHAPTER 10
**EARNING MONEY FROM
ARCHITECTURAL PHOTOGRAPHY**

- 254 — Pathways into photography
- 256 — Tax and insurance
- 256 — Marketing
- 258 — Quotations, calculations, offers and orders
- 259 — Working with picture agencies
- 266 — Photographic right in practice using five legal cases

CHAPTER 11
APPENDIX

- 272 — Glossary
- 278 — Bibliography
- 280 — Directory of links
- 284 — Index
