Editors

Process Management

A Guide for the Design
of Business Processes

Second edition

 Springer

Table of Contents

Preface to the 2 nd Edition	V
Preface to the 1 st Edition	VII
Table of Contents	IX
Figures	XXI
Tables.....	XXVII

Part A: Process-Oriented Organizational Design 1

1 The Process in Focus	3
Jörg Becker, Dieter Kahn.....	3
1.1 Environment	3
1.2 From Function Orientation to Process Orientation	4
1.3 The Term "Process"	5
1.4 Consequences for Management – Six Theses for Process Orientation.....	7
1.4.1 Every Organizational Business Structure has its Own Efficiency Relation.....	7
1.4.2 The Pressure to Survive in Competition Causes Sensitive Adaptation Processes to Develop	7
1.4.3 People and Their Environment Determine Process Changes	8
1.4.4 Flexibility Guarantees a Leading Position in an Achievement-orientated Society	9
1.4.5 High Innovation Potential and its Effective Use Lead to the Top	9
1.4.6 The Ability to Integrate all Participants in the Process Ensures Success.....	9
1.5 The Case Study – DeTeImmobilien	10
1.5.1 Corporate Structure	11
1.5.2 Products.....	12
1.6 Objective and Structure of This Book	12

2	Project Management	15
	Jörg Becker, Dieter Kahn, Clemens Wernsmann.....	15
2.1	Project Goals	15
2.2	Project Plan.....	18
2.3	Project Organization.....	21
2.4	Project Controlling	28
2.5	Critical Success Factors.....	36
2.6	Checklist.....	39
3	Preparation of Process Modeling	41
	Michael Rosemann, Ansgar Schwegmann, Patrick Delfmann	41
3.1	Required Preparation of Process Modeling	41
3.1.1	Quality of Conceptual Models	41
3.1.2	Generalities of Orderly Modeling	43
3.1.3	Overview of Activities to Prepare for Process Modeling.....	45
3.2	Identification and Selection of Relevant Perspectives.....	45
3.2.1	Relevant Perspectives of Process Models	46
3.2.2	Definition of Relevant Perspectives	52
3.3	Determination of the Communication Channel	53
3.4	Specification of Modeling Technologies	54
3.4.1	Basic Terms of Information Modeling	54
3.4.2	Selection of Model Types.....	56
3.4.3	Specification of Modeling Conventions.....	66
3.4.4	Specification of Rules for the Perspective-specific Adaptation of the Models	71
3.5	Selection of a Modeling Tool	79
3.6	Conversion of Modeling Conventions With a Modeling Tool	81
3.6.1	Customizing of Modeling Tool	81
3.6.2	Extension of Customizing Settings Through Organizational Rules.....	82
3.6.3	Execution of Acceptance Tests	83
3.7	Description of the Organizational Framework Conditions.....	84
3.8	Creation and Use of a Modeling Standard.....	85
3.8.1	Types of modeling standards.....	85
3.8.2	Contents and Design of Company- and/or Project-specific Modeling Standards.....	86
3.8.3	Communication and Maintenance of Modeling Standard	86
3.9	Checklist.....	87

4	Strategy and Organizational Frame	91
	Jörg Becker, Volker Meise.....	91
4.1	The Tasks of the Organizational Frame.....	91
4.2	The Procedure Model	93
4.3	The Definition of the Structural Goals	93
4.3.1	Goals of the Organization.....	94
4.3.2	The Goals of the Organization Members	94
4.3.3	Balancing of Goals.....	95
4.3.4	Concretizing of Goals.....	95
4.4	The Definition of the Macro Structure	95
4.5	The Market-based View	96
4.5.1	The Strategy of Comprehensive Cost Leadership	97
4.5.2	The Strategy of Differentiation	98
4.6	The Resource-based View	99
4.7	The Combination of Views.....	102
4.8	The Strategic Organization Areas.....	103
4.9	The Efficiency Goals for the Organizational Areas.....	105
4.10	Definition of the Process Structure.....	105
4.11	The General Process Identification.....	106
4.12	The Individual Process Identification	107
4.12.1	Determining the Process Goals	108
4.12.2	Differentiating by Core and Support Goals.....	109
4.12.3	Process Identification and Process Structuring	110
4.13	Determining Design Goals	113
4.14	The Behavior Finding Process.....	113
4.14.1	The Perception Phase	114
4.14.2	The Evaluation Phase	115
4.14.3	The Assessment of the Efficiency Degree.....	116
4.14.4	Behavior	116
4.15	Possibilities of Influencing the Design of the Organizational Frame	116
4.16	The Types of Perception Influences	118
4.17	Determining the Structural Design	121
4.18	The Spatial Arrangement of Elements.....	123
4.19	The Determination of Size Relations.....	124
4.20	The Use of Reference Designs	125
4.21	The Individual Design of the Elements	126
4.21.1	Colors	126
4.21.2	Shapes	127
4.21.3	Text and Fonts.....	127
4.22	Checklist.....	131

5	As-Is Modeling and Process Analysis	133
	Ansgar Schwegmann, Michael Laske	133
5.1	Objectives of As-Is Modeling.....	133
5.2	Procedure of As-is Modeling.....	134
5.2.1	Preparation of As-Is Modeling	134
5.2.2	Identifying and Prioritizing Problem Areas to be Eliminated	136
5.2.3	Collection and Documentation of As-is Models	140
5.2.4	Consolidation of Models	144
5.3	Analysis of the As-is Models.....	147
5.3.1	Criteria for the Evaluation of As-is Models	147
5.3.2	Support of As-Is Modeling by Reference Models.....	149
5.3.3	Support of As-is Modeling by Benchmarking.....	151
5.3.4	Identification and Documentation of Weaknesses and Potential Improvements.....	152
5.3.5	Implementation of Immediate Measures to Eliminate Weaknesses	153
5.4	Checklist.....	155
6	To-Be Modeling and Process Optimization	157
	Mario Speck, Norbert Schnetgöke	157
6.1	Objectives of To-Be Modeling	157
6.2	Procedure of To-Be Modeling	159
6.2.1	Preparing for To-Be Modeling	159
6.2.2	Identification and Rough Draft.....	165
6.2.3	Design and Documentation of To-Be Models.....	173
6.3	Analysis of To-Be Models.....	180
6.3.1	Reference Points for the Evaluation of To-Be Models.....	180
6.3.2	Support of To-Be Modeling through Process Simulation	182
6.3.3	Support of To-Be Modeling through Reference Models.....	183
6.4	Editing the Results.....	184
6.5	Checklist.....	185
7	Design of a Process-Oriented Organizational Structure	187
	Martin Kugeler, Michael Vieting.....	187
7.1	Subject and Goal of a Process-Oriented Organization.....	187
7.1.1	Process Organization and Organizational Structure from the Process-Oriented Point of View	187
7.1.2	Interfaces in the Organizational Structure – the Most Important Joints.....	190
7.2	Comparison of Organization Types.....	194

7.2.1	Efficiency Criteria of Organizations	194
7.2.2	Traditional Organization Types.....	198
7.2.3	Process-Oriented Organization – Path or Goal?.....	202
7.3	Modeling the Organizational Structure View and its Integration into the Process View	203
7.4	Procedural Model for Designing a Process-Oriented Organizational Structure.....	212
7.4.1	Traditional Method: Analysis-Synthesis Concept.....	212
7.4.2	Process Model-Aided Approach Using a Reference Model.....	213
7.4.3	Process Model Using the Example of DeTe Immobilien	223
7.5	Checklist.....	228
8	Process Implementation – Process Roll-Out	
	Holger Hansmann, Michael Laske, Redmer Luxem	229
8.1	Position of Implementation in the Total Project	229
8.2	Roll-Out Strategy.....	230
8.2.1	Implementation Sequence of Organizational Structure and Processes	230
8.2.2	Step-by-Step vs. Big-Bang.....	231
8.3	Project Marketing and Information	235
8.3.1	Target: Creating Acceptance	235
8.3.2	Communication Concept.....	237
8.3.3	Training Concept.....	243
8.4	Measures for Personnel Transfer.....	244
8.5	Technical Realization	247
8.5.1	Realization by Proprietary Methods.....	248
8.5.2	Realization by Groupware.....	250
8.5.3	Realization by Intranet Concepts.....	251
8.5.4	Realization by Hybrid Methods	253
8.5.5	Comparison of Methods	253
8.6	Checklist.....	254
9	Continuous Process Management	
	Stefan Neumann, Christian Probst, Clemens Wernsmann	257
9.1	From Process-Oriented Reorganization to Continuous Process Management	257
9.2	Management of Process Performance.....	260
9.3	Phase and Process Model for Continuous Process Management.....	266
9.3.1	Implementation Phase	267
9.3.2	Analysis Phase	268
9.3.3	Goal Redefinition Phase.....	270
9.3.4	Modeling and Implementation Phase	270

9.4	Institutional Embedding of Process Responsibility	273
9.4.1	Responsibility for a Process	274
9.4.2	Process Owner.....	275
9.4.3	Process Manager	276
9.5	Checklist.....	279
 Part B: Additional Application Options and Development Perspectives		281
 10 Process-Oriented Implementation of ERP Systems		283
Holger Hansmann, Stefan Neumann		283
10.1	Features of ERP Systems.....	283
10.2	How to Implement ERP Systems	287
10.2.1	Implementation Strategies.....	287
10.2.2	Phase Model for the Introduction of Standard ERP Systems ..	288
10.3	Process-oriented ERP Selection	292
10.3.1	Preselection	292
10.3.2	Final Selection.....	301
10.4	The Role of Process Management in the Project Organization	304
10.4.1	Roles in ERP Introduction Projects.....	304
10.4.2	Project Structure.....	306
10.5	As-is Analysis, To-be Concept and Realization	308
10.5.1	Contribution of Process Models to Solutions	308
10.5.2	To-be Modeling Based on the ERP Reference Models	311
10.5.3	Independent Modeling of an Ideal State.....	312
10.5.4	Creation of the To-be Model on the Sole Basis of As-is Models.....	312
10.6	Roll-out and Change Management	316
10.6.1	Preparation for Roll-out.....	316
10.6.2	User Training	317
10.6.3	Check of System Application.....	318
 11 Workflow Management		323
Michael zur Mühlen, Holger Hansmann.....		323
11.1	Principles of Workflow Management.....	323
11.1.1	Development of Office Automation.....	323
11.1.2	Conceptual Foundations	325
11.1.3	Workflow Life Cycle	326
11.2	What Does Workflow Bring?.....	328

11.2.1 Potential Benefits Through the Use of Workflow Management Systems.....	328
11.2.2 Risks When Workflow Management Systems Are Used.....	329
11.3 Fields of Application of Workflow Applications.....	330
11.3.1 Production and Ad-hoc Workflows.....	330
11.3.2 Inner and Inter-company Workflows.....	332
11.3.3 Embedded and Stand-alone Workflow.....	333
11.3.4 Workflow Management in Domain-specific Applications.....	334
11.4 Procedure Model for the Introduction of Workflow Management Systems.....	335
11.4.1 Overview.....	335
11.4.2 Project Preparation and Organization.....	336
11.4.3 Technical and Organizational Requirement Analysis.....	337
11.4.4 Market Analysis and System Selection.....	342
11.4.5 Modeling and Optimization of Processes and Workflows.....	343
11.4.6 Development of Workflow Applications.....	348
11.5 Operation of Workflow Applications.....	349
11.5.1 Operation.....	349
11.5.2 Controlling Workflow Applications.....	350
11.6 Summary.....	351

12 Process-based Design of the (Organizational) Structure and Authorization Concept Using the Example of SAP R/3

Michael Vieting, Johannes Kumpf.....	353
12.1 Starting Situation.....	353
12.1.1 Problem Description.....	353
12.1.2 Requirements of Process Documentation.....	353
12.2 Transfer of Business Processes to the Line Organization.....	354
12.3 Development of an Authorization Concept.....	358
12.3.1 Basics of the SAP Authorization Concept.....	358
12.3.2 Definition of Activity Groups.....	360
12.3.3 Definition of Collective Activity Groups.....	365
12.4 Transition to the Production System.....	366
12.4.1 Administration of Authorizations.....	366
12.4.2 Documentation and Tools.....	367
12.4.3 Testing Authorizations.....	367
12.4.4 Mass Filling of Users/Authorizations.....	368
12.5 Results and Experience from an Integrated Approach.....	368
12.5.1 Experience from the Development Phase.....	368
12.5.2 Experience from Going Live.....	371

13 Simulation of Business Processes	
Stefan Neumann, Michael Rosemann, Ansgar Schwegmann.....	373
13.1 Principles of Process-orientated Simulation	373
13.2 Typical Goals of Process Simulation.....	374
13.3 Procedural Model for Executing Simulation Studies.....	375
13.4 Construction of Business Process Simulation Models.....	377
13.4.1 Attributes of the Elements of Business Process Models	378
13.4.2 Modeling Probable Distributions	379
13.4.3 Modeling of Process Alternatives	380
13.4.4 Modeling Process Instancing.....	382
13.4.5 Modeling Resource Availability	383
13.5 Calculating and Evaluating Process Parameters.....	384
13.6 Simulation Applications in Business Process Management	384
13.6.1 Process Simulation Using the Example of Order Control at DeTe Immobilien	384
13.6.2 Process Simulation at Television New Zealand	386
14 Supply Chain Management and Customer Relationship Management – Process Modeling for Extended Enterprises	
Martin Kugeler	389
14.1 Extended Enterprise – from the In-company to the Inter-company View	389
14.1.1 Effective and Efficient Customer Relationships Through Customer Relationship Management	390
14.1.2 Coordination of Inter-company Performance Links with the Supply Chain Management	398
14.2 Inter-company Process Modeling.....	412
14.2.1 Requirements of Inter-company Process Modeling	412
14.2.2 Presentation Technologies in Comparison	413
15 Profitability of Business Processes	
Jan vom Brocke, Heinz Lothar Grob.....	421
15.1 Measuring Profitability of Business Processes	421
15.2 Foundations of Measuring Profitability of Business Processes	424
15.2.1 General Characteristics.....	424
15.2.2 Elements of an Profitability Calculation	425
15.3 Method for Measuring Profitability of Business Processes	427
15.3.1 Assumptions and Overview.....	427
15.3.2 Calculating Out-Payments Related to Functions.....	428
15.3.3 Calculating In-Payments Related to Functions	430
15.3.4 Calculating Series of Payments Related to Processes	431

15.3.5 Calculating Financial Consequences of Processes with VOFI	434
15.3.6 Calculating Measures for Profitability of Processes.....	435
15.4 Application of the Method for Measuring Profitability of Business Processes	437
 Part C: Process Management Case Studies	447
 16 The Integrated Management System at T-Systems International GmbH / T-Systems Computer Service Management GmbH Martin Niemöckl, Jürgen Pillasch, Christian Probst	449
16.1 The Company T-Systems / DeTeCSM	449
16.2 Objectives of Integrated Management Systems.....	450
16.3 Organization	451
16.3.1 Methodical and Technical Responsibility	451
16.3.2 Procedure.....	451
16.3.3 Responsibility and Processes in Continuous Process Management.....	454
16.4 Structure of the Process Models	455
16.4.1 Structuring of Contents	455
16.4.2 Hierarchization	455
16.4.3 Modeling the Process Structure in ARIS.....	456
16.4.4 Modeling Conventions for Sub-processes.....	457
16.5 Acquired Experience	462
16.5.1 Migration from Project to Standard Operation.....	462
16.5.2 Responsibility of the CPP.....	462
16.5.3 Rigid Vertical Process Structuring.....	463
16.5.4 Interfaces vs. Process Modules	463
16.5.5 Modeling Conventions – Information Object Types.....	463
16.5.6 Communication	464
16.5.7 Integration in the Management System.....	464
16.6 Current and Future Activities	465
 17 Workflow and Process Modeling in a Power Supply Company Michael zur Mühlen	467
17.1 Project Structure	467
17.1.1 Definition of Tasks.....	467
17.1.2 Company Profile	467
17.1.3 Project Flow	468
17.2 Empirical Study	470

17.2.1 Objective and Methodology	470
17.2.2 Important Findings of the Empirical Study	471
17.2.3 Related Studies	474
17.3 Market Study	475
17.4 Determination of Processes Suitable for Workflows	477
17.4.1 Structure of the Catalog of Criteria	477
17.4.2 Preselection of Processes	479
17.4.3 Selection of To-be Processes	480
17.5 Selection of a Workflow Management System	481
17.6 Economic Considerations	484
17.7 Summary	484
18 Introduction of Workflow Management at Hotset Heizpatronen und Zubehör GmbH	
Stefan Neumann, Wolf-Dietrich Wiechel	487
18.1 Project Goals	487
18.1.1 Brief Presentation of the Company	487
18.1.2 Problems	488
18.1.3 Improvements Aimed at in the Project	489
18.2 Project Organization	489
18.2.1 Project Setup	490
18.2.2 Analysis	491
18.2.3 Concept	492
18.2.4 Implementation	492
18.2.5 Operation	493
18.3 Structure of Process Models	493
18.3.1 Modeling Method and Tool	493
18.3.2 Modeled Processes	494
18.3.3 From the As-is Workflow Model to the Target Workflow Model to the Workflow Model	495
18.4 Experience	497
18.5 Current and Future Activities	498
19 Process Reorganization at the Corporate Services Agency (CSA)	
Marit Schallert, Michael Rosemann	501
19.1 The CSA	501
19.1.1 Structure	501
19.1.2 Product and Services	501
19.1.3 Target System and Vision	502
19.2 Project Goal: Reorganization (Using the Example of Travel Management)	503
19.3 Project Organization	504

19.3.1 Project Plan and Project Team	504
19.3.2 As-is Modeling and Process Analysis	506
19.3.3 To-be Modeling and Process Optimization	511
19.4 Structure of the Process Models	514
19.5 Gained Experience.....	515
19.5.1 Use of Reference Models for As-is and To-be Modeling.....	515
19.5.2 Critical Factor of Success: Change Management.....	515
19.5.3 Factors of Success Specific to the CSA	515
19.6 Current and Future Activities	516
20 Prioritizing Business Processes for Process-oriented Reorganization in Public Administrations	
Lars Algermissen, Patrick Delfmann, Thorsten Falk, Björn Niehaves	517
20.1 Reorganization of Public Services.....	517
20.2 The Project Regio@KomM.....	518
20.3 Prioritizing of Process Candidates in Public Services	520
20.3.1 Identification of Activity Fields of Reorganization in Municipal Administrations.....	520
20.3.2 Phase Model to Prioritize Process Candidates	522
20.4 Processes in the Project	528
20.5 Gained Experience.....	538
20.6 Present and Future Activities.....	538
21 Process-based Project Application Processing	
Thore Dörnemann, Christoph Köster, Dirk Oelbracht.....	541
21.1 The Company DFMG.....	541
21.1.1 Foundation and Profile	541
21.1.2 Structure and Organization.....	541
21.2 Process Management at DFMG.....	544
21.2.1 Goals of Process Management	544
21.2.2 Development of an Organizational Frame.....	544
21.2.3 Development and Modeling of Processes	547
21.2.4 Organizational Procedure for Modeling.....	549
21.3 Process-orientated Project Application Processing	551
21.4 Workflow-based Project Application Processing	555
21.5 Experiences with Workflow Design.....	556
21.6 Present and Future Activities.....	557

Appendix:	
Examples of Modeling Conventions at DeTe Immobilien	559
Bibliography	567
Index.....	587
