

Christoph Manuel Meyer

# **Vehicle Routing under Consideration of Driving and Working Hours**

A Distributed Decision Making Perspective

With a foreword by Prof. Dr.-Ing. Herbert Kopfer

**RESEARCH**

3.3	Combined Vehicle Routing and Break Scheduling in Practice . . . . .	32
3.3.1	Methodology of the Study . . . . .	32
3.3.2	Interviews with Freight Forwarding Companies . . . . .	33
3.3.3	Summary of the Findings . . . . .	37
<b>4</b>	<b>Model for the VRPTW-EU</b>	<b>39</b>
4.1	Model for the VRPTW-EU with Basic Rules . . . . .	40
4.1.1	Problem Definition . . . . .	41
4.1.2	Notation . . . . .	43
4.1.3	Model Formulation . . . . .	45
4.2	Model for the VRPTW-EU with Optional Rules . . . . .	50
4.2.1	Problem Definition . . . . .	50
4.2.2	Notation . . . . .	51
4.2.3	Model Formulation . . . . .	52
4.3	Computational Experiments . . . . .	58
4.3.1	Experimental Settings . . . . .	59
4.3.2	Computational Results for the VRPTW-EU . . . . .	60
4.3.3	Example of a Tour Plan . . . . .	64
<b>5</b>	<b>DDM in Combined Vehicle Routing and Break Scheduling</b>	<b>67</b>
5.1	DDM Framework . . . . .	68
5.1.1	Classification of Distributed Decision Making Systems . . . . .	69
5.1.2	Coordination in Distributed Decision Systems . . . . .	70
5.2	Vehicle Routing as DDM Problem . . . . .	73
5.2.1	Distribution of Tasks between Planners and Drivers . . . . .	73
5.2.2	Anticipation of the Drivers' Planning . . . . .	76
5.3	Model Formulations . . . . .	78
5.3.1	Driver's Model . . . . .	78
5.3.2	Dispatcher's Model . . . . .	83
5.3.3	Anticipation Functions . . . . .	84
5.3.3.1	Perfect Explicit Anticipation . . . . .	84
5.3.3.2	Approximate Explicit Anticipation . . . . .	85
5.3.3.3	Implicit Anticipation . . . . .	87
5.4	Computational Experiments . . . . .	88
5.4.1	Experimental Settings and Solution Procedure . . . . .	88
5.4.2	Computational Results . . . . .	90
5.4.2.1	Perfect Explicit Anticipation . . . . .	90
5.4.2.2	Approximate Explicit Anticipation . . . . .	92

5.4.2.3	Implicit Anticipation . . . . .	94
5.4.3	Summary of the Findings . . . . .	98
<b>6</b>	<b>Restricted DP Heuristic for the VRPTW-EU</b>	<b>103</b>
6.1	DP Methods for Vehicle Routing Problems . . . . .	103
6.1.1	Dynamic Programming Algorithm for the Traveling Salesman Problem . . . . .	104
6.1.2	Restricted Dynamic Programming Algorithm for the Traveling Salesman Problem . . . . .	106
6.1.3	Solving Vehicle Routing Problems via Giant-Tour Representations . . . . .	106
6.2	Restricted DP Heuristic for the VRPTW-EU . . . . .	108
6.2.1	Basic Break Scheduling Method . . . . .	110
6.2.2	Extended Break Scheduling Method . . . . .	114
6.2.2.1	Extended Daily Driving Times . . . . .	114
6.2.2.2	Reduced Daily Rest Periods . . . . .	115
6.2.2.3	Split Breaks . . . . .	116
6.2.2.4	Split Daily Rest Periods . . . . .	117
6.2.2.5	Overview of the Implementations of the Optional Rules . . . . .	118
6.2.3	Extensions to Different Time Horizons . . . . .	119
6.2.4	Computational Experiments . . . . .	119
6.3	DDM using the Restricted DP Heuristic . . . . .	125
6.3.1	Computational Experiments for the Decentralized Planning Approach . . . . .	126
6.3.1.1	Team Situation . . . . .	126
6.3.1.2	Non-Team Situation . . . . .	130
6.3.2	Summary of the Findings . . . . .	132
<b>7</b>	<b>Conclusions and Further Research</b>	<b>135</b>
7.1	Conclusions . . . . .	135
7.2	Outline of Further Research Directions . . . . .	137
	<b>Bibliography</b>	<b>141</b>
