Contents

Foreword BIRD	009
Preface	011
Acknowledgements	015

1. DESIGNERLY WAYS OF KNOWING	017
Design in General Education	019
Educational Criteria	020
Ways of Knowing in Design	022
Design Processes	022
Design Products	026
<i>Intrinsic Value of Design Education</i>	027
The Discipline of Design	029

2. THE NATURE AND NURTURE OF DESIGN ABILITY	033
Nature	033
What Do Designers Do?	033
Studies of Designing	035
Design Ability is Possessed by Everyone	038
Design Ability Can Be Damaged or Lost	039
Design as a Form of Intelligence	041
Nurture	043
Learning to Design	043
Design Education in the Open	045
The Development of Design Ability	046

3. NATURAL AND ARTIFICIAL INTELLIGENCE IN DESIGN	049
Research in Design Thinking	049
What Expert Designers Say About Designing	051
The Role of Sketching in Design	054
Can a Machine Design?	058
Computation and Cognition	060

4. CREATIVE COGNITION IN DESIGN I: THE CREATIVE LEAP	065
An Example of a Creative Leap	066
Identifying the Leap	070
Modelling the Leap	072
Combination	073
Mutation	074
Analogy	075
First Principles	075

Emergence	076
Not Leaping but Bridging	078
Appendix A	079
Appendix B	081

5. CREATIVE COGNITION IN DESIGN II:	
CREATIVE STRATEGIES	085
Studies of Outstanding Designers	085
Victor Scheinman	085
Kenneth Grange	090
Gordon Murray	092
Comparing the Strategies	093
Design Expertise	097

6. UNDERSTANDING DESIGN COGNITION	
Problem Formulation	099
Goal Analysis	100
Solution Focusing	101
Co-evolution of Problem and Solution	102
Problem Framing	102
Solution Generation	103
Fixation	104
Attachment to Concepts	105
Generation of Alternatives	106
Creativity	107
Sketching	108
Process Strategy	109
Structured Processes	109
Opportunism	110
Modal Shifts	111
Novices and Experts	112
Issues in Design Cognition	113
Summary: Problem Formulation	114
Summary: Solution Generation	115
Summary: Process Strategy	116

7. DESIGN AS A DISCIPLINE	119
Scientific Design	121
Design Science	122
Science of Design	123
Design as a Discipline	123
Design Research	124
