

A Natural Introduction to  
Computer Programming  
with Java™

Kari Laitinen

## Table of contents

### INTRODUCTORY PAGES

Some reasons to choose [his book . . . . .	iii
Noles for teachers and other experienced programmers. . . . .	iii
Acknowledgments . . . . .	iv
What kind of computer will you need? . . . . .	v
Some advice for studying . . . . .	v
The structure of this book . . . . .	vii
The structure of program descriptions . . . . .	viii
Table of contents . . . . .	x
Java programs in this book . . . . .	xiv
Pages where exercises can be found . . . . .	xvii

### PART I: THE WORLD OF COMPUTERS. . . . . 1

<b>1 COMPUTING: SOME CONCEPTS AND TERMINOLOGY. . . . .</b>	<b>3</b>
1.1 Hardware and software . . . . .	4
1.2 Operating systems, main memory, and memory devices . . . . .	4
1.3 Source programs and executable programs . . . . .	8
1.4 Programs, applications, and systems . . . . .	9
<b>2 A FIRST LOOK AT JAVA SOURCE PROGRAMS. . . . .</b>	<b>11</b>
2.1 A program that can print text to the screen . . . . .	12
2.2 A program that can read from the keyboard and calculate . . . . .	14
2.3 Getting a Java compiler to your computer . . . . .	20
2.4 Installing the electronic material of this book . . . . .	23
2.5 Compiling programs in a command prompt window . . . . .	25
2.6 Editor tools for writing and modifying source programs . . . . .	27
2.7 Modifying and compiling programs - introduction to exercises . . . . .	29
<b>3 HOW INFORMATION IS STORED IN THE MEMORY OF A COMPUTER. . . . .</b>	<b>31</b>
3.1 Numerical information: numbering systems . . . . .	32
3.2 Numerical information: the binary world of computers . . . . .	40
3.3 Textual information: character coding systems . . . . .	45
3.4 More information: pictures, sound, and moving pictures . . . . .	48
<b>4 LOGICAL OPERATING PRINCIPLES OF COMPUTERS. . . . .</b>	<b>49</b>
4.1 How does the main memory operate? . . . . .	50
4.2 The components of an imaginary computer . . . . .	54
4.3 Inside the imaginary processor . . . . .	56
4.4 Machine instructions . . . . .	59
4.5 The steps and states of program execution . . . . .	66
4.6 Programs to print text "Hello!". . . . .	68
4.7 Programming language IML and compilation . . . . .	73
4.8 IC8 and ICOM - simulator programs for the imaginary computer . . . . .	80
4.9 A program that contains a loop . . . . .	82
4.10 Subroutine calls and stack operations . . . . .	84
4.11 Programs that use the keyboard, memory area, and stack . . . . .	87
4.12 Chapter summary - towards high-level programming . . . . .	94

<b>PART II: FUNDAMENTALS OF PROGRAMMING</b> .....	<b>97</b>
<b>5 VARIABLES AND OTHER BASIC ELEMENTS IN JAVA PROGRAMS</b> .....	<b>99</b>
5.1 Integer variables (int, short, long, byte, char) .....	100
5.2 Keywords, names, spaces, and newlines. .... T7v. .	108
5.3 Floating-point variables. ....	110
5.4 Operators, assignments, and literal constants. .... r.	113
5.5 Reading data from the keyboard - a first look at strings .....	118
5.6 The double role of operator +. ....	121
5.7 Formatting the output on the screen. ....	125
5.8 Chapter summary. ....	131
<b>6 DECISIONS AND REPETITIONS: BASIC ACTIVITIES IN PROGRAMS</b> .....	<b>133</b>
6.1 Making decisions with keywords if and else. ....	134
6.2 Making decisions with switch-case constructs. ....	147
6.3 while loops enable repetition. ....	152
6.4 for loops repeat a known number of times. ....	158
6.5 do-while loops execute at least once. ....	164
6.6 The block structure of Java programs. ....	167
6.7 try-catch constructs handle exceptions. ....	171
6.8 Truth values and variables of type boolean. ....	174
6.9 Chapter summary. ....	176
<b>7 ARRAYS: SETS OF SIMILAR DATA ITEMS</b> .....	<b>177</b>
7.1 Creating arrays and referring to array elements. ....	178
7.2 Array declaration vs. array creation. ....	189
7.3 Initialized arrays. ....	191
7.4 Multidimensional arrays. ....	196
7.5 Chapter summary. ....	197
<b>8 STRINGS STORE SEQUENCES OF CHARACTER CODES</b> .....	<b>199</b>
8.1 "Variables" of type String. ....	200
8.2 String literals. ....	203
8.3 Accessing individual characters of a string. ....	204
8.4 String methods. ....	208
8.5 Class StringBuilder-mutable strings. ....	226
8.6 Arrays of strings. ....	231
8.7 Chapter summary. ....	236
<b>9 METHODS - LOGICAL PERFORMING UNITS IN PROGRAMS</b> .. ^	<b>239</b>
9.1 Simple static methods and the concept of calling. ....	240
9.2 Methods that take parameters. ....	244
9.3 Methods that return data to the caller. ....	254
9.4 Calling static methods of another class. ....	262
9.5 The role of the stack in method calls. ....	268
9.6 Scope of variables. ....	275
9.7 Parameters for the method main(). ....	278
9.8 Overloading method names. ....	282
9.9 Chapter summary. ....	286

<b>PART III: OBJECT-ORIENTED PROGRAMMING</b> .....	<b>287</b>
<b>10 CLASSES AND OBJECTS</b> .....	<b>289</b>
<b>10.1</b> Classes, fields, and instance methods .....	290
10.2 Constructors are methods that build objects .....	300
10.3 Several constructors in a class .....	306
10.4 Arrays containing references to objects .....	310
10.5 Value types vs. reference types .....	324
10.6 When objects become garbage .....	325
10.7 A stack that grows dynamically .....	326
10.8 Java packages .....	334
10.9 Chapter summary .....	337
<b>11 MORE ADVANCED CLASSES</b> .....	<b>341</b>
<b>11.1</b> Class Dale - an example of a larger class .....	342
11.2 The this keyword .....	362
11.3 Graphical UML class diagrams .....	365
11.4 "Objects inside objects" .....	366
11.5 Using object references as method parameters .....	379
1.16 Chapter summary .....	382
<b>12 INHERITANCE AND CLASS HIERARCHIES</b> .....	<b>383</b>
12.1 Base classes and derived classes .....	384
12.2 Larger class hierarchies .....	400
12.3 Polymorphism - redefining methods in derived classes .....	414
12.4 Chapter summary .....	428
<b>13 SOME STANDARD JAVA CLASSES</b> .....	<b>431</b>
13.1 Wrapper classes Byte, Short, Integer, Long, Float, Double, etc .....	432
13.2 Object: the class above all classes .....	434
13.3 Exception classes .....	438
13.4 Class Math provides static mathematical methods .....	446
13.5 Chapter summary .....	448
<b>14 STORING INFORMATION IN FILES</b> .....	<b>449</b>
<b>14.1</b> Classes to read and write files .....	450
14.2 Reading and writing text files .....	452
14.3 Handling files as binary files .....	469
14.4 A larger program that uses a binary file .....	478
14.5 Chapter summary .....	496
<b>15 MORE STANDARD JAVA TYPES</b> .....	<b>501</b>
15.1 ArrayList class .....	502
15.2 Comparable and other interfaces .....	514
15.3 Class GregorianCalendar and its superclass Calendar .....	521
15.4 Chapter summary .....	528
<b>16 GOING CLOSER TO THE MACHINE</b> .....	<b>529</b>
16.1 Bit operators &, j, <sup>A</sup> , ~, », and « .....	530
16.2 Playing with the time in programs - introduction to threads .....	538
16.3 Chapter summary .....	551

<b>APPENDIX A: SUMMARY OF IMPORTANT JAVA FEATURES.</b>	<b>555</b>
A - 1: Literals	555
A - 2: Variables, constants, and arrays of basic types	556
A - 3: Siring objects, other objects, and arrays of objects	557
A - 4: Expressions	~77.. 558
A - 5: Assignments and left-side expressions	558
A - 6: The most important Java operators in order of precedence	559
A - 7: Control structures to make decisions (selections)	560
A - 8: Control structures to perform repetitions (iterations)	561
A - 9: Some basic Java method structures	562
A - 10: Siring methods	563
<b>A 11: Mechanisms for keyboard input and screen output</b>	564
A - 12: Input/output from/to files	564
A - 13: Data conversions	565
A - 14: Java class declaration	566
<b>APPENDIX B: JAVA KEYWORDS (RESERVED WORDS).</b>	<b>567</b>
<b>APPENDIX C: PRACTICAL ADVICE FOR PROGRAMMING EXERCISES.</b>	<b>571</b>
C - <b>I</b> : Starling an exercise	571
C - 2: Writing your program	571
C - 3: Compiling and executing your program	572
C - 4: Correcting compilation errors	573
C - 5: Searching for errors that compilers do not detect	574
C - 6: Programs that do not terminate	575
C - 7: Incremental program development	576
C - 8: Printing your program on paper	577
C - 9: Program versions and backups	577
<b>INDEX</b>	<b>579</b>
<b>USEFUL TABLES</b>	<b>593</b>
