List of scenarios discussed in this book xiii
About the companion website xvi
Acknowledgments xvii
About the 2nd edition xix

Introduction 1

Chapter 1 Getting to know Greenfoot 3
1.1 Getting started 3
1.2 Objects and classes 4
1.3 Interacting with objects 6
1.4 Return types 7
1.5 Parameters 8
1.6 Greenfoot execution 9
1.7 A second example 10
1.8 Understanding the class diagram 10
1.9 Playing with asteroids 12
1.10 Source code 13
Summary 15

Chapter 2 The first program: Little Crab 17
2.1 The Little Crab scenario 17
2.2 Making the crab move 19
2.3 Turning 20
2.4 Dealing with screen edges 23
Summary of programming techniques 27
Drill and practice 28

Chapter 3 Improving the crab: more sophisticated programming

3.1 Adding random behavior
3.2 Adding worms
3.3 Eating worms
3.4 Creating new methods
3.5 Adding a Lobster
3.6 Keyboard control
3.7 Ending the game
3.8 Adding sound
3.9 Making your own sounds
Summary of programming techniques
Drill and practice

Chapter 4 Finishing the crab game

4.1 Adding objects automatically
4.2 Creating new objects
4.3 Variables
4.4 Assignment
4.5 Object variables
4.6 Using variables
4.7 Adding objects to the world
4.8 Save the World
4.9 Animating images
4.10 Greenfoot images
4.11 Instance variables (fields)
4.12 Using actor constructors
4.13 Alternating the images
4.14 The if/else statement
4.15 Counting worms
4.16 More ideas
Summary of programming techniques
Drill and practice

Interlude 1 Sharing your scenarios

11.1 Sharing your scenario
11.2 Publishing to the Greenfoot website
11.3 Export to a Web page
11.4 Export to application
11.5 Export to Greenfoot archive

Chapter 5 Scoring

5.1 WBC:The starting point
5.2 WhiteCell: constrained movement
5.3 Bacteria: making yourself disappear
5.4 Bloodstream: creating new objects
5.5 Side-scroll movement
5.6 Adding viruses
5.7 Collision: removing bacteria
5.8 Variable speed
5.9 Red blood cells
5.10 Adding borders
5.11 Finally: adding a score
5.12 Scoring in the World
5.13 Abstraction: generalizing the scoring
5.14 Adding game time
Summary of programming techniques
Drill and practice

Chapter 6 Making music: an on-screen piano

6.1 Animating the key
6.2 Producing the sound
6.3 Abstraction: creating multiple keys
6.4 Building the piano
6.5 Using loops: the while loop
6.6 Using arrays
Summary of programming techniques
Drill and practice

Chapter 7 Object interaction: an introduction

7.1 Interacting objects
7.2 Object references
7.3 Interacting with the world
7.4 Interacting with actors
7.5 The null value
7.6 Interacting with groups of actors
7.7 Using Java library classes
7.8 The List type
7.9 A list of leaves

7.10 The for-each loop
Summary of programming techniques
Drill and practice

Chapter 8 Interacting objects: Newton's Lab

8.1 The starting point: Newton's Lab
8.2 Helper classes: SmoothMover and Vector
8.3 The existing Body class
8.4 First extension: creating movement
8.5 The Color class
8.6 Adding gravitational force
8.7 Applying gravity
8.8 Trying it out
8.9 Gravity and music
Summary of programming techniques
Drill and practice

Chapter 9 Collision detection: Asteroids

9.1 Investigation: what is there?
9.2 Painting stars
9.3 Turning
9.4 Flying forward
9.5 Colliding with asteroids
9.6 Game Over
9.7 Adding fire power: the proton wave
9.8 Growing the wave
9.9 Interacting with objects in range
9.10 Further development
Summary of programming techniques
Drill and practice

Interlude 2 The Greeps competition

12.1 How to get started
12.2 Programming your Greeps
12.3 Running the competition
12.4 Technicalities

Chapter 10 Creating images and sound

10.1 Preparation
10.2 Working with sound
10.3 Sound recording in Greenfoot
10.4 External sound recording and editing
10.5 Sound file formats and file sizes
10.6 More control: the GreenfootSound class
10.7 Working with images
10.8 Image files and file formats
10.9 Drawing images
10.10 Combining image files and dynamic drawing
Summary
Drill and practice

Chapter 11 Simulations

11.1 Foxes and rabbits
11.2 Ants
11.3 Collecting food
11.4 Setting up the world
11.5 Adding pheromones
11.6 Path forming
Summary

Chapter 12 Greenfoot and the Kinect

12.1 What the Kinect can do
12.2 Installing the software
12.3 Getting started
12.4 The simple camera
12.5 The next step: greenscreen
12.6 Stick-figure: tracking users
12.7 Painting with your hands
12.8 A simple Kinect game: Pong
Summary
Drill and practice

Chapter 13 Additional scenario ideas

13.1 Marbles
13.2 Lifts

13.3 Boids
13.4 Explosion
13.5 Breakout
13.6 Platform jumper
13.7 Wave
13.8 Map
Summary

Appendix A: Installing Greenfoot

A.1 Installing Greenfoot
A.2 Installing the book scenarios

Appendix B: Greenfoot API

Appendix C: Collision detection

C.1 Method summary
C.2 Convenience methods
C.3 Low versus high resolution
C.4 Intersecting objects
C.5 Objects at offset
C.6 Neighbors
C.7 Objects in range

Appendix D: Some Java details

D.1 Java data types
D.2 Java control structures
D.3 Java control structures
