Contents

<i>Preface</i>	vii
<i>About the Editors</i>	xvii
<i>List of Contributors</i>	xix
<i>Acknowledgments</i>	xxi
Part I: Decision Making Under Uncertainty	1
Section A. Arbitrage and Asset Pricing	3
1. Ross, SA (1976). The arbitrage theory of capital asset pricing. <i>Journal of Economic Theory</i> , 13(3). 341-360.	11
2. Schachermayer, W (2010a). The fundamental theorem of asset pricing. In R Cont (Ed.), <i>Encyclopedia of Quantitative Finance</i> , 2, 792-801. New York: Wiley.	31
3. Schachermayer, W (2010b). Risk neutral pricing. In R Cont (Ed.), <i>Encyclopedia of Quantitative Finance</i> , 4, 1581-1585. New York: Wiley.	49
4. Kallio, M and WT Ziemba (2007). Using Tucker's theorem of the alternative to provide a framework for proving basic arbitrage results. <i>Journal of Banking and Finance</i> , 31, 2281-2302.	57
Section B. Utility Theory	79
5. Fishburn, P (1969). A general theory of subjective probabilities and expected utilities. <i>Annals of Mathematical Statistics</i> , 40(4), 1419-1429.	87
6. Kahneman, D and A Tversky (1979). Prospect theory: An analysis of decisions under risk. <i>Econometrica</i> , 47(2), 263-291.	99
7. Levy, M and H Levy (2002). Prospect theory: Much ado about nothing? <i>Management Science</i> , 48(10), 1334-1349.	129
8. Wakker, PP (2003). The data of Levy and Levy (2002) "Prospect theory: Much ado about nothing?" Actually support prospect theory. <i>Management Science</i> , 49(7), 979-981.	145

9.	Levy. M and H Levy (2004). Prospect theory and mean-variance analysis. <i>Review of Financial Studies</i> , 17(4). 101-5-1041.	149
10.	Baltussen, G, T Post and PV Vliet (2006). Violations of cumulative prospect theory in mixed gambles with moderate probabilities. <i>Management Science</i> , 52(8), 1288-1290.	177
11.	Kreps, DM and EL Porteus (1979). Temporal von Neumann-Morgenstern and induced preferences. <i>Journal of Economic Theory</i> , 20(1), 81-109.	181
12.	'Epstein. LG and SE Zin (1989). Substitution, risk aversion and the temporal behavior of consumption and asset returns: A theoretical framework. <i>Econometrica</i> , 57(4), 937-969.	207
13.	Rabin, M (2000). Risk aversion and expected-utility theory: A calibration theorem. <i>Econometrica</i> , 68(5), 1281-1292.	241
14.	Machina. M (2004). Non-expected utility theory. In JL Teugels and B Sundt (Eds.), <i>Encyclopedia of Actuarial Science</i> , 2, 1173-1179. New York: Wiley.	253
15.	Tversky, A and D Kahneman (1974). Judgment under uncertainty: Heuristics and biases. <i>Science</i> , 185(4157), 1124-1131.	261
16.	Kahneman, D and A Tversky (1984). Choices, values, and frames. <i>American Psychologist</i> . 39(4), 341-350.	269
Section C. Stochastic Dominance		279
17.	Hanoch, G and H Levy (1969). The efficiency analysis of choices involving risk. <i>Review of Economic Studies</i> , 36(3), 335-346.	287
18.	Levy, H (1973). Stochastic dominance, efficiency criteria, and efficient portfolios: The multi-period case. <i>American Economic Review</i> , 63(5), 986-994.	299
Section D. Risk Aversion and Static Portfolio Theory		309
19.	Pratt, JW (1964). Risk aversion in the small and in the large. <i>Econometrica</i> , 32(1-2), 122-136.	317
20.	Li, Y and WT Ziemba (1993). Univariate and multivariate measures of risk aversion and risk premiums. <i>Annals of Operations Research</i> , 45, 265-296.	333
21.	Chopra, VK and WT Ziemba (1993). The effect of errors in means, variances, and co-variances on optimal portfolio choice. <i>Journal of Portfolio Management</i> , 19, 6-11.	365

22.	Ziemba, WT, C Parkan and R Brooks-Hill (1974). Calculation of investment portfolios with risk free borrowing and lending. <i>Management Science</i> . 21(2), 209-222.	375
23.	Kallberg, JG and WT Ziemba (1983). Comparison of alternative utility functions in portfolio selection problems. <i>Management Science</i> , 29(11), 1257-1276.	389
24.	Li, Y and WT Ziemba (1989). Characterizations of optimal portfolios by univariate and multivariate risk aversion. <i>Management Science</i> . 35(3), 259-269.	409
25.	Ziemba, WT (1975). Choosing investment portfolios when the returns have stable distributions. In WT Ziemba and RG Vickson (Eds.), <i>Stochastic Optimization Models in Finance</i> , 243-266. San Diego: Academic Press.	421
26.	MacLean, LC, ME Foster and WT Ziemba (2007). Covariance complexity and rates of return on assets. <i>Journal of Banking and Finance</i> , 31(11), 3503-3523.	445
27.	Rabin, M and RH Thaler (2001). Anomalies: Risk aversion. <i>Journal of Economic Perspectives</i> , 15(1), 219-232.	467
Part II: From Decision Making to Measurement and Dynamic Modeling		481
Section E. Risk Measures		483
28.	Geyer, A and WT Ziemba (2008). The innovest'Austrian pension fund planning model InnoALM. <i>Operations Research</i> , 56(4), 797-810.	491
29.	Rockafellar, RT and WT Ziemba (2000). Modified risk measures and acceptance sets.	505
30.	Follmer, H and T Knispel (2012). Convex risk measures: Basic facts, law-invariance and beyond, asymptotics for large portfolios.	507
31.	Krokhmal, P, M Zabarankin and S Uryasev (2011). Modeling and optimization of risk. <i>Surveys in Operations Research and Management Science</i> , 16(2), 49-66.	555
Section F. Dynamic Portfolio Theory and Asset Allocation		601
32.	Edirisinghe, C, X Zhang and S-C Shyi (2012). DEA-based firm strengths and market efficiency in US and Japan.	611

Contents

33. MacLean, LC and WT Ziemba (2012). The Kelly strategy for investing: Risk and reward.	637
34. Browne. S (1999a). Reaching goals by'a deadline: Digital options and continuous-time active portfolio management. <i>Advances in Applied Probability</i> , 31, 551-577.	683
35. Browne. S (1999b). Beating a moving target: Optimal portfolio strategies for outperforming a stochastic benchmark. <i>Finance and Stochastics</i> , 3, 275-294.	711
36. Browne. S (2000). Stochastic differential portfolio games. <i>Journal of Applied Probability</i> , 37(1). 126-147.	731
37. Davis. M. and S Lleo (2012). Fractional Kelly strategies in continuous time: Recent developments.	753
38. Bahsoun, W, IV Evstigneev and MI Taksar (2012). Growth-optimal investments and numeraire portfolios under transactions costs.	789
39. Campbell, JY, YL Chan and LM Viceira (2003). A multivariate model of strategic asset allocation. <i>Journal of Financial Economics</i> , 67, 41-80.	809
40. Thorp, EO, and Mizusawa, S (2012). Maximizing capital growth with black swan protection.	849
<i>Author Index</i>	873
<i>Subject Index</i>	877
