Introduction: mapping the global architect of alterity

Globalization: two divergent views 3

Globalization and architecture 6

The global architect of alterity 9

FRAME I

Twenty-first-century global design processes, practices, identities, and philosophies

1 Architecture writ large: the re-presentation of architectural agency in an age of complexity

Architectural representation: object, interpretation, process, and the "aesthetics of agency" 22

Practice, representation, and complexity: navigating a globalizing world 26

Transformational representation: the necessity of critical practice 28

The power of being precisely open and representation 30

- 2 Subverting the "spaight and narrow":
the potential of philosophical enquiry in design
- Architecture and philosophy: past forays and
missed opportunities 35*
- What is philosophy? 36*
- Embracing the power of fluid reasoning, dialogue,
and interpretation 38*
- Philosophy's influence on architectural design 41*
- The potential role of philosophy in the design process 43*
- 3 Towards a globally equitable relationship between
nature and humanity
- The conflict of the rational and the environment 48*
- Phenomenology and the radical return to beginnings 52*
- Reviving sustainability with an architecture writ
large agenda 54*

FRAME II

Global design perspectives: identity, materiality, and cultural diversity

- 4 New urban topologies: public place in the age
of virtual geography
- Contemporary urban space and the public sphere 61*
- Public and virtual space: global connections,
myths, and desire 69*
- Urbanity and cyberspace: a compatibilist approach 13*
- 5 Wholesale urbanism: selling the American dream of
urbanity to the world
- Retail malls, Marx, false consciousness, and global
capitalism 19*
- Reconceptualizing malls: towards temporal, social, and
programmatic diversity 81*
- Participation, entrepreneurialism, and community:
localized redevelopment within global capitalism 84*
- Sustainable, flexible, and uniquely identifiable,
"new town centers" 81*

6 Towards a globalized "junk" architecture of magnitude

Globalization and modern architecture: contemporary dialogues 94

High/low architecture and the necessity of critical participation 96

New global paradigms of architectural agency 99

The five points of a globalized "junk" architecture of magnitude 101

7 The global nomad: navigating mediated space at a global scale

Lived space, placelessness, and the modern technological landscape 107

Speed, collapse, and the emergence of supraterritorialism 110

The stereotypic geographical imagination 112

The modern nomad: navigating space/mediated space globally 114

FRAME III

Globalizing architecture and design education

8 Towards a "globalized" studio environment: configuring reflexive spatial agendas

The importance of localized educational space in a globalizing world 124

Cultivating a global design consciousness 127

Global studio culture: (dis)locating the reflexive space of architectural education 129

The educational space of the twenty-first-century designer 132

9 Educating the twenty-first-century global architect: complexity, innovation, and interdisciplinary research in design

Empowerment or enslavement: guilds and the idea of disciplinarity 138

Embracing complexity: the necessity of interdisciplinary research in architecture/urbanism 140

Urban X: navigation complexity as a pedagogical vehicle 144
*Shots across the bow: design innovation in the twenty-
first-century urban environment* 147

Conclusion: complexity, alterity, and the
contemporary architect: embracing the promise,
power, and alterity of globalization 150

*In the shadows of cathedrals: the present context of
globalization and architecture* 151

A global master builder? 157

Towards a global architect of alterity 159
