# BRIEF CONTENTS

<i>Guided tour of the book</i>	xv
<i>List of case studies and boxes</i>	xvii
<i>Preface</i>	xix
<i>Publisher's acknowledgements</i>	xxii
<b>1 Macroeconomic essentials</b>	<b>1</b>
<b>2 Booms and recessions (I): the Keynesian cross</b>	<b>36</b>
<b>3 Money, interest rates and the global economy</b>	<b>67</b>
<b>4 Exchange rates and the balance of payments</b>	<b>103</b>
<b>5 Booms and recessions (II): the national economy</b>	<b>127</b>
<b>6 Enter aggregate supply</b>	<b>157</b>
<b>7 Booms and recessions (III): aggregate supply and demand</b>	<b>189</b>
<b>8 Booms and recessions (IV): dynamic aggregate supply and demand</b>	<b>217</b>
<b>9 Economic growth (I): basics</b>	<b>248</b>
<b>10 Economic growth (II): advanced issues</b>	<b>280</b>
<b>11 Endogenous economic policy</b>	<b>314</b>
<b>12 The European Monetary System and the Eurozone at work</b>	<b>338</b>
<b>13 Inflation and central bank independence</b>	<b>372</b>
<b>14 Budget deficits and public debt</b>	<b>403</b>
<b>15 A closer look at economic crises</b>	<b>438</b>
<b>16 Sticky prices and sticky information: new perspectives on booms and recessions (I)</b>	<b>477</b>
<b>17 Real business cycles: new perspectives on booms and recessions (II)</b>	<b>500</b>
<b>Appendix A: A primer in econometrics</b>	<b>528</b>
<b>Appendix B: Glossary</b>	<b>545</b>
<b>Appendix C: Economics Nobel prize winners and earlier giants</b>	<b>559</b>
<b><i>Index</i></b>	<b>561</b>

# CONTENTS

<i>Guided tour of the book</i>	xv
<i>List of case studies and boxes</i>	xvii
<i>Preface</i>	xix
<i>Publisher's acknowledgements</i>	xxii
<b>1 Macroeconomic essentials</b>	<b>1</b>
1.1 The issues of macroeconomics	1
1.2 Essentials of macroeconomic accounting	6
1.3 Beyond accounting	22
Chapter summary	27
Key terms and concepts	28
Exercises	28
Online resources	30
Recommended reading	30
Appendix: Logarithms, growth rates and logarithmic scales	31
<b>2 Booms and recessions (I): the Keynesian cross</b>	<b>36</b>
2.1 The circular flow model revisited: terminology and overview	41
2.2 Income determination: a first look	45
2.3 Income determination: a second look	51
2.4 An intertemporal view of consumption and investment	54
Chapter summary	61
Key terms and concepts	61
Exercises	62
Online resources	64
Recommended reading	64
Applied problems	64
<b>3 Money, interest rates and the global economy</b>	<b>67</b>
3.1 The money market, the interest rate and the <i>LM</i> curve	68
3.2 Aggregate expenditure, the interest rate and the exchange rate: the <i>IS</i> curve	80
3.3 The <i>IS-LM</i> or the global-economy model	86
Chapter summary	97
Key terms and concepts	98
Exercises	98
Online resources	100
Recommended reading	100
Applied problems	101

<b>4</b>	<b>Exchange rates and the balance of payments</b>	<b>103</b>
4.1	Globalization	104
4.2	The exchange rate and the balance of payments	106
4.3	Back to <i>IS-LM</i> : enter the <i>FE</i> curve	110
4.4	Equilibrium in all three markets	118
	Chapter summary	123
	Key terms and concepts	123
	Exercises	123
	Online resources	125
	Recommended reading	125
	Applied problems	125
<b>5</b>	<b>Booms and recessions (II): the national economy</b>	<b>127</b>
5.1	Fiscal policy in the Mundell-Fleming model	128
5.2	Monetary policy in the Mundell-Fleming model	131
5.3	The algebra of monetary and fiscal policy in the Mundell-Fleming model	136
5.4	Comparative statics versus adjustment dynamics	137
5.5	Adjustment dynamics with expected depreciation	139
5.6	When prices move	143
5.7	Today's exchange rate and the future	146
5.8	Speculative bubbles	148
	Chapter summary	152
	Key terms and concepts	152
	Exercises	153
	Online resources	154
	Recommended reading	154
	Applied problems	154
<b>6</b>	<b>Enter aggregate supply</b>	<b>157</b>
6.1	Potential income and the labour market	158
6.2	Why is there unemployment in equilibrium?	166
6.3	Why may actual output deviate from potential output?	181
	Chapter summary	184
	Key terms and concepts	184
	Exercises	185
	Online resources	186
	Recommended reading	186
	Applied problems	187
<b>7</b>	<b>Booms and recessions (III): aggregate supply and demand</b>	<b>189</b>
7.1	The short-run aggregate supply curve	190
7.2	The aggregate demand curve	191
7.3	The <i>AD-AS</i> model: basics	199
7.4	Policy and shocks in the <i>AD-AS</i> model	203
	Chapter summary	212
	Key terms and concepts	212

Exercises	212
Online resources	213
Recommended reading	214
Appendix: The algebra of the <i>AD</i> curve	214
<b>8 Booms and recessions (IV): dynamic aggregate supply and demand</b>	<b>217</b>
8.1 The aggregate supply curve in an inflation-income diagram	218
8.2 Equilibrium income and inflation: the <i>DAD</i> curve	219
8.3 The <i>DAD-SAS</i> model	220
8.4 Inflation expectations	223
8.5 The <i>DAD-SAS</i> model at work	226
Chapter summary	240
Key terms and concepts	241
Exercises	241
Online resources	242
Recommended reading	242
Appendix: The algebra of the <i>DAD</i> curve	243
Appendix: The genesis of the <i>DAD-SAS</i> model	243
Applied problems	245
<b>9 Economic growth (I): basics</b>	<b>248</b>
9.1 Stylized facts of income and growth	248
9.2 The production function and growth accounting	250
9.3 Growth theory: the Solow model	257
9.4 Why incomes may differ	259
9.5 What about consumption?	262
9.6 Population growth and technological progress	267
9.7 Empirical merits and deficiencies of the Solow model	272
Chapter summary	275
Key terms and concepts	276
Exercises	276
Online resources	277
Recommended reading	278
Applied problems	278
<b>10 Economic growth (II): advanced issues</b>	<b>280</b>
10.1 The government in the Solow model	281
10.2 Economic growth and capital markets	284
10.3 Extending the Solow model and moving beyond	292
10.4 Poverty traps in the Solow model	294
10.5 Human capital	298
10.6 Endogenous growth	302
Chapter summary	307
Key terms and concepts	307
Exercises	308
Online resources	310

Recommended reading	310
Appendix: A synthesis of the <i>DAD-SAS</i> and the Solow model	310
Applied problems	311
<b>11 Endogenous economic policy</b>	<b>314</b>
11.1 What do politicians want?	314
11.2 Political business cycles	317
11.3 Rational expectations	322
11.4 Policy games	324
11.5 Ways out of the time inconsistency trap	329
Chapter summary	334
Key terms and concepts	334
Exercises	335
Online resources	336
Recommended reading	336
Applied problems	336
<b>12 The European Monetary System and the Eurozone at work</b>	<b>338</b>
12.1 Preliminaries	339
12.2 The 1992 EMS crisis	342
12.3 Exchange rate target zones	348
12.4 Speculative attacks	354
12.5 Monetary and fiscal policy in the euro area	356
Chapter summary	365
Key terms and concepts	366
Exercises	366
Online resources	367
Recommended reading	368
Appendix: The two-country Mundell-Fleming model	368
Applied problems	370
<b>13 Inflation and central bank independence</b>	<b>372</b>
13.1 Inflation, central bank independence and the EMS	373
13.2 Supply shocks and central bank independence	381
13.3 Disinflations and the sacrifice ratio	388
13.4 Lessons for European Monetary Union	396
Chapter summary	398
Key terms and concepts	399
Exercises	399
Online resources	400
Recommended reading	401
Applied problems	401
<b>14 Budget deficits and public debt</b>	<b>403</b>
14.1 The government budget	404
14.2 The dynamics of budget deficits and the public debt	405
14.3 What is wrong with having deficits and debt?	421

14.4	Does monetary union need budget rules?	422
14.5	Government debt and the financial markets	423
	Chapter summary	432
	Key terms and concepts	433
	Exercises	433
	Online resources	435
	Recommended reading	435
	Applied problems	436
<b>15</b>	<b>A closer look at economic crises</b>	<b>438</b>
15.1	Linking unemployment and growth	439
15.2	The price of oil (and other raw materials)	441
15.3	Persistence in the <i>DAD-SAS</i> model	447
15.4	Financial crises and risk premiums: a closer look	451
15.5	Quantitative easing: unorthodox monetary policy	460
15.6	From financial crises to debt crises and austerity	464
15.7	Lessons learned	466
	Chapter summary	470
	Key terms and concepts	471
	Exercises	472
	Online resources	473
	Recommended reading	473
	Applied problems	474
<b>16</b>	<b>Sticky prices and sticky information: new perspectives on booms and recessions (I)</b>	<b>477</b>
16.1	Reality check: business cycle patterns and the <i>DAD-SAS</i> model	478
16.2	New Keynesian responses	482
16.3	The Phillips curves and monetary policy rules of current research	487
16.4	Supply shocks in the <i>DAD-SAS</i> model	495
	Chapter summary	497
	Key terms and concepts	498
	Exercises	498
	Online resources	499
	Recommended reading	499
<b>17</b>	<b>Real business cycles: new perspectives on booms and recessions (II)</b>	<b>500</b>
17.1	Real business cycle philosophy	501
17.2	A real business cycle model	502
17.3	A graphical real business cycle	516
	Chapter summary	525
	Key terms and concepts	526
	Exercises	526
	Online resources	527
	Recommended reading	527

Appendix A: A primer in econometrics	528
A.1 First task: estimating unknown parameters	529
A.2 Second task: testing hypotheses	531
A.3 A closer look at OLS estimation	533
Appendix summary	543
Key terms and concepts	543
Exercises	544
Recommended reading	544
Appendix B: Glossary	545
Online resources	558
Appendix C: Economics Nobel prize winners and earlier giants	559
Online resources	560
